The compressors have a stream of water running in with the air, which takes up the heat, and also serves the double purpose of lubrication and filling up the lost space between the piston and the head of the cylinder, so that no air is left to expand back in the cylinder when the piston starts back on the return stroke. The compression piston is packed with the best manilla hemp, saturated with a composition which the maker will supply, this gives a semi-elastic packing ; it is very durable and easily repacked at any time, and if the pump should be required to work without water, it would lubricate the cylinder. This is claimed to be the best and simplest packing ever invented ; any how as there is no weight on the lower side of the cylinder, it cannot cut. One compressor can be disconnected from the other in a few minutes, so that if one should need repairing, it could be done without altogether stopping the works—in fact, by running faster with one compressor in most cases there would be no delay at all.

A fine feature of these compressors is that every interior part is of very easy access, which is an important feature in machinery that may need incidental looking after, as is the case with valves, especially when working under high pressures.

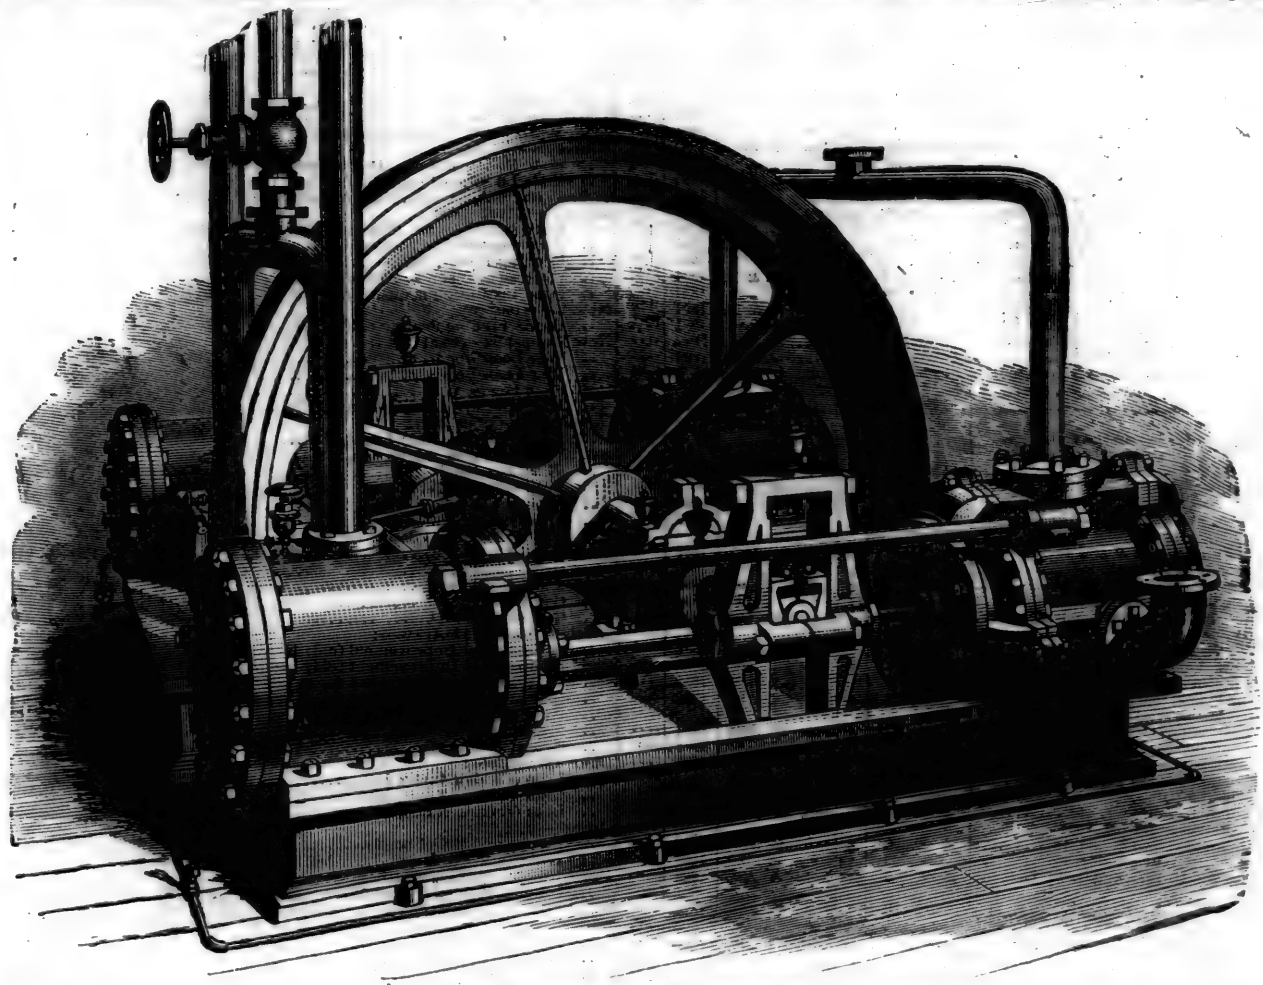

Fig. 1.—Improved Air Compressor.

The claim that these air compressors do a comparatively larger amount of work than others of their size and cost, we believe to be well founded, as they possess an important new feature which we will now explain. It is well known that a valve which has to be opened by pressure alone, will, at the moment of its starting, require a greater pressure, because the part acted upon by this pressure is always smaller than the total surface of the valve ; but if once started so that the pressure of the air can act upon its whole surface, it will easily be kept open to give exit to the compressed air. Mr. Clayton found practically that when compressing air to 60 pounds, the valves would not start before the pressure in the cylinder had reached say 90 pounds. This of course involves a considerable loss of power and effectiveness of the whole machine, and he therefore invented a special arrangement to start the valves giving exit to the compressed air as soon as the pressure has reached any given amount, say 60 pounds. This is accomplished by a few short levers inside the box containing these valves, which levers are moved by the turning of an air-tight axis inclosed in a packing-box, and this axis is moved by a separate eccentric on the axis of the fly-wheel, which eccentric, being adjustable, may be set to any pressure. This arrangement

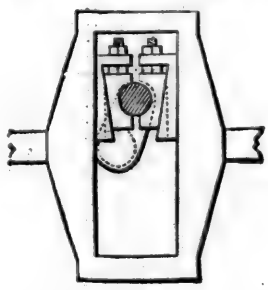

Fig. 2.

was patented by Mr. James Clayton, Jan. 16th, 1877.

These compressors have been satisfactorily used for the driving of rock drills and supplying air to the tunnels of the 4th avenue improvement in this city, and in the tunnel through the rocks at Ninety-second street. One engineer testified that he ran seven rock drills, two steam-pumps, and two hoisting machines, with the compressed air furnished by one of these double compressors, and this with the consumption of 70 hundred weight of coal in 24 hours, and all agreed respecting their noiseless motion, smooth uninterrupted run, and absence of repairs.

We close with the remark that our readers are doubtless aware that some parties claim that they have the exclusive right to compress air for mechanical purposes ; but this claim is a fraud on the public. It has been done for generations, and parties making, selling, or buying air compressors, need not fear any claims against the right to make, sell, or use them. It would be well that all persons needing air compressors should carefully examine their merits, and by personal calculation see the number of cubic feet of air given by various makes of compressors ; this would show them which give the greatest amount of air for the same amount of money.

# American Railroad Journal.

**Saturday, July 14, 1877.**

### Financial and Commercial Affairs.

Throughout the week, the supplies of Money have been steadily augmenting, mainly from the July interest and dividend disbursements, which, for this time of general business prostration, have been remarkably liberal. Lenders have been quite urgent in their offerings to responsible borrowers, with a view to the prompt placing of balances. Rates have ruled low and easy. Call loans have been quoted here at 1@3, with most of the important negotiations reported on the basis of two per cent; and very choice to prime mercantile credits are rated at 3@5, mainly 3@4 per cent per annum. The City banks, last week, reported a further increase in their specie reserves, with a decrease in their legal tender hoard, and a further moderate contraction of their circulation. The loan and discount item was again enlarged moderately, and the deposit average quite liberally. The loan and discount average shows an increase of $1,668,200. The item of circulation was reduced $85,100, and of deposits augmented $4,740,400. The legal tender reserve was reduced $1,912,500; and the specie average increased $3,806,300.

The City banks reported their average of gold last week at $21,259,300, as against $23,650,600 same date last year; and their greenback average at $58,447,000, as against $53,381,200 on July 8, 1876. Their deposits stood at $231,228,600, against $223,704,100 same time in 1876. The loan item was $253,823,800 against $255,653,300 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal

requirement of reserve to liabilities of $21,899,150, as against $21,190,450 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $345,922,956, or a daily average of $69,184,591.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $48,898,694, against $49,681,717 the preceding week; and a coin board of $82,926,868, against $83,613,320 on the return of a week earlier. The Customs revenue of the port during the past week was $1,149,000.

The aggregate of the outstanding U. S. currency of all denominations, July 1st, was $381,684,573. The outstanding amount of legal tender notes is $359,764,332. The National bank circulation is now $315,427,097 of currency notes and $1,423,520 of national gold bank notes.

National Bank notes received at the Treasury Department last week for redemption were to the amount of $3,305,600.

The income of the Government from internal revenues last week was about 2¾ millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,732 in the preceding fiscal year; and from Customs last week about 2¼ millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $6,822,358; special deposit of legal tenders for the redemption of certificates of deposit, $55,675,000; Coin, $104,004,049, including of Coin certificates, $41,146,600.

Gold has been ruling stronger, especially toward the close under a livlier speculative inquiry, stimulated, in good part, by the tenor of the political and war advices from Europe. The customs call has been light, and the export drain limited. The extremes of the price during the week have been 105⅛@105⅜, closing at 105⅜, as against 105⅛ on Wednesday of the preceding week. The lowest point yet touched was 104¼, on Friday, March 2d. The specie outflow last week was $801,584, (of which $139,548 to London, $505,000 to Liverpool, $153,000 to Paris, and $4,000 to Aspinwall,) making the total exports of specie hence since January 1, $20,362,756, against $31,604,052 the same time in the preceding year. The imports of specie at this port last week were $55,812, (of which were $36,720 from Havana, and since January 1st $7,896,681 as against $2,326,088 same time last year. The Customs demand for gold last week averaged only $230,000 per day. Foreign Exchange has been in comparatively limited request, at easier rates leaving off barely steady. Bankers' sixty day bills on London closed on Wednesday at $4 86¾@$4 87¼; sight bills on London at $4 89¼@$4 89¾ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $5,408,563 as against $2,538,262 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,002,563 of Dry Goods and $4,406,100 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $5,022,895, against $7,170,896 same week in 1876.

Government securities have been more active at generally stronger prices. The July interest and dividend disbursements served to stimulate purchases on investment account. At the close the market was quoted firm, leaving off on Wednesday as follows:

United States currency sixes, 123½@123¾; do. 6s, 1881, registered, 111@111⅛; do. coupon, 112@112¼; do. 1865, new, registered, 106¾@106⅞; do. coupon, 106¾@106⅞; do. 1867, registered, 109⅜@109⅝; do. coupon, 109⅜@109⅝; do. 1868, registered, 112⅜@113; do. coupon, 112⅜@113; do. ten-forties registered, 112⅝@113¾; do. coupon, 113⅛@113½; do. five per cents 1881, registered, 111⅝@111⅞; do. coupon, 111⅝@111⅞; do. 4½ per cents, 1891, registered, 108¾@109; do. coupon, 108¾@109; Central Pacific Gold bonds, 108@108¼.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $338,623,600, and $18,857,000 as security for public deposits.

State and Railway bonds have been moderately sought after and the more substantial loans have shown more firmness. And in the line of Railway and Miscellaneous share property business has been somewhat brisker toward the close, leaving off as to prices generally stronger.

General business has been more active, mainly in Breadstuffs, Provisions, and Petroleum, but prices have been again quite unsettled, closing as a rule weaker for Grain. Extensive dealings have been reported in No. 2 Red Western (Winter Wheat), new crop, for August delivery, chiefly on export account, closing at $1 48 per bushel. Foreign merchandise has been quiet, with values showing heaviness.

Hardware and Boots and Shoes have been moderately sought after; while Dry Goods have been in fair demand but quoted irregular.

In the line of Metals, business has been quite dull with prices quoted weak. Eglinton Pig Iron quoted at $25 50; Glengarnock $27 50; Coltness $28 50 @$29; No. 1 American Pig at $18 @$19; No. 2 do. at $17@$18; Forge $16@$17; American Rails at works $32@$35; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$48 at the mills. Ingot Copper quoted 19⅛@19¼ for early delivery.

Ocean freights have been more active but at low rates generally. Grain room by steam for British ports closed stronger. The business has been mainly in the line of Petroleum, Grain, Provisions, Tobacco, and Cotton shipments. Liverpool steamer rates at the close for Grain, 5@5½d. per standard bushel. Provisions, 20s.@40s.; Tallow, 20s.; Leather, 25s. Measurement Goods at 12s. 6d.@17s. 6d. per ton; Cotton, $\frac{7}{32}$d.@½d. per lb., Liverpool, by sail. Cotton, $\frac{3}{16}$d. Grain, nominal Oil Cake and Slate, 10s.@12s. 6d.; Measurement Goods 10s.@15s.; Tobacco 25s. Grain rates on charter hence for Cork and orders left off at 4s. 6d.@5s. for the Continent, at 5s.@5s. 6d. and from Baltimore for Cork and orders, 4s. 3d.@4s. 6d. and from Philadelphia at 3s. 9d.@4s. per quarter. Refined Petroleum hence for Cork and orders, 3s. 7½d.@3s. 10½; for the Continent, 3s. 3d. @4s. per bbl. And for Liverpool by steam, from Chicago, of through freight, Provisions, at 45@50c. via Boston, and from Cincinnati 40c. per 100lb.

# FISK & HATCH,

## Bankers,

No. 5 NASSAU ST., NEW YORK.

U. S. GOVERNMENT BONDS bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

### Redemption of Five-twenty Bonds.

The Secretary of the Treasury on the 5th inst. issued the fiftieth call for the redemption of five-twenty bonds of 1865—known as five-twenty bonds of the act of March 3, 1865, (consols of 1865.) The call is for $10,000,000, of which $7,000,000 are coupons and $3,000,000 registered bonds. The principal and accrued interest will be paid at the Treasury of the United States in the city of Washington on and after the 5th of October, 1877, and interest will cease on that day. The bonds designated are as follows:

Coupon bonds—Dated July 1, 1865, namely: $50, No. 11,001 to No. 17,000, both inclusive; $100 No. 18,001 to No. 29,000, both inclusive; $500, No. 18,001 to No. 27,000, both inclusive; $1,000, No. 41,001 to No. 52,000, both inclusive. Coupon total, $7,000,000.

Registered bonds—"Redeemable at the pleasure of the United States, after the 1st day of July, 1870," as follows: $50, No. 501 to No. 700, both inclusive; $100, No. 4,901 to No. 6,400, both inclusive; $500, No. 4,851 to No. 5,200, both inclusive; $1,000, No. 13,601 to No. 16,500, both inclusive; $5,000, No. 4,351 to No. 5,050, both inclusive; $10,000, No. 3,701 to No. 4,472, both inclusive. Registered total, $3,000,000.

The amount outstanding included in the numbers above is $10,000,000. All United States bonds forwarded for redemption should be addressed to the "Loan Division, Secretary's Office," and all registered bonds should be assigned to "The Secretary of the Treasury for redemption." Where parties desire checks in payment for registered bonds drawn to order of any one but the payee, they should assign them to the Secretary of the Treasury for redemption on account of the owner or owners.

☞ The Sydney, New South Wales, Herald says that a great agitation is just now being made for railway extension in almost every direction, but in no case has more earnestness and perseverance been shown than in the efforts made to have the railway extended from Redfern station, Sydney, to the Circular Quay, and to have all the lines laid down to the suburbs of Sydney. Public meetings have been held in various places, and resolutions affirming the necessity for at once extending the railway in these directions have been passed unanimously by large assemblies of people.

☞ The Philadelphia, Wilmington and Baltimore Railroad Company propose building a branch to the Delaware Division from Dover to Milford and Lewes. The scheme comprises a new route through the lower part of the peninsula from Dover to Virginia. The route will necessitate the cutting of a canal between Indian river and Assawaman. When the survey line has been completed to Lewes and Rehoboth, the other engineering work below at the canal and along the bay will be undertaken.

☞ The earnings of the Central Pacific Railroad for the month of June, 1877, were $1,891,000, against $1,646,269 for the month of June, 1876, and $1,788,869 for the month of June, 1875. For the first six months of 1877, the earnings were $7,700,000, against $8,026,944 for the first six months of 1876, and $7,910,188 for the first six months of 1875.

☞ The directors of the Spuyten Duyvil and Port Morris Railroad Company, elected on the 10th inst., are: W. H. Vanderbilt, Cornelius Vanderbilt, W. K. Vanderbilt, Frederick W. Vanderbilt, W. C. Wetmore, Augustus Schell, A. B. Baylis, John B. Dutcher, Robert J. Niven, Joseph Harker, Chauncey M. Depew, W. H. Leonard and Samuel F. Barger.

☞ The grantees of the Nashua and Plaistow Railroad Company have accepted the charter and elected the following directors: Greenleaf Clark, Nathan Gage, John W. Sleeper, George C. Goodwin, Nathaniel H. Clark, John Woodbury, Henry Parkinson, Joel C. Carey and Samuel Greeley. Clerk, William H. Hills. Treasurer, William C. Noyes.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the Delphos Southern Railway company, to run from Delphos to Dayton; capital stock $50,000, in shares of $50 each, by D. D. Williams and others.

☞ The Philadelphia and Atlantic City (Narrow Gauge) Railway, which was fully described in the JOURNAL of June 9th, was formaly opened on Saturday the 7th inst.

☞ The Pennsylvania Railroad Company has taken formal possession of the Columbia and Port Deposit Railroad, and it will now be run under the management of the former Company.

☞ A. W. Paine, of Bangor, Me., has been elected President, and John S. Ricker Secretary and Treasurer of the Maine Telegraph Co.

## BOOKS AND MAGAZINES.

A GENERAL CLASSIFICATION OF RAILWAY RIGHTS, REALTIES AND PERSONALTIES, designed to facilitate the work of taking an accurate inventory of such property. Illustrated by the indices of the franchises, real estate and personal property, used in the compilation of the receiver's inventory of the property of the Erie Railway Company, as prepared for the Supreme Court of the State of New York. By GEORGE F. BALCH, C. E., late Brevet Lieut-Colonel Ordnance Department, U. S. A. New York: J. J. Little & Co., Printers, 10 to 20 Astor Place. 1877.

This work, technical in character, has not been compiled without a great amount of mental labor; the object sought and, we think, admirably attained being a condensed form for the classification of railway property. "The intimate relation existing between the organization of a railway and a correct classification of its property is such that one may safely assume the latter to be a function of the former; but as the general principles governing the administration of all large railway corporations are identical in spirit if not in application, any scheme of classification of such property which can be successfully applied to the estate of one, will be applicable to the estate of others." The need of such a work has been long felt, and the very careful, judicious and systematic arrangement which is exhibited in the numerous indices are creditable to the compiler and cannot fail to be of great value to those whose office it is to record and classify railway property. The author, in concluding his preface, modestly and truthfully says: "In this spirit these results are submitted to those persons interested in the management of this class of works, not as a completed study, but rather as a suggestive step in the direction of a more perfect knowledge of the relation subsisting between railway property and railway organization, without which knowledge the most economic, efficient and pecuniarily successful administration of railway business is absolutely unattainable."

---

THE AMERICAN JOURNAL OF MICROSCOPY, AND POPULAR SCIENCE.

We are in receipt of the July number (Number 7, Volume 2,) of this valuable monthly, published by the Industrial Publication Company, 176 Broadway, New York, and give it a hearty welcome to our book table. Since this publication was first issued in the fall of 1875 it has rapidly risen in public favor and each succeeding number has been replete with interesting and scientific information respecting the Microscope and its wonderful revelations.

Under the able editorship of Prof. John Phin, himself an eminent microscopist, it has been the means of not only instructing amateurs but also of illustrating in the clearest manner subjects in microscopy not generally understood by experts. Such a journal can hardly be called a luxury in an age like the present and amongst an intelligent and reading people. It is rather a necessity—intellectual bread and butter—for individuals and families, for youth who are awakening to the infinite wonders in creation, for the clergyman, physician, teacher and student, all of whom can learn from its pages the results of scientific research in microscopy. The principal contents of the number before us are:—The brush and comb of the Hymenoptera; The Siliceous Shelled Bacillarie, or Dratomaceæ; A new form of Megascope; Erysiphe, or Wheat Mildew; Mechanical Finger; Microscopy in Nashville; The World of Matter; Cannabalism of the Amœba; Transactions of Microscopical Societies, &c. The subscription, fifty cents per annum, is altogether disproportionate when its neat engravings, good typography and attractiveness are considered.

---

### Railways of New South Wales.

The development of this colony of Great Britain has been marvelous. A few years ago it was simply a penal settlement or receptacle of the criminals of England whom the law had condemned to separation from their kindred. The gold fields attracted the world of men to the shores of the new land, and anon a new life was introduced into the country, and so rapid was the development thereof that the two great colonies of Victoria and Queensland are but off-shoots of this parent colony which was formerly known as "Botany Bay." The remainder of what was so called after separating the two colonies named is New South Wales, with a length of 900 miles and a mean width of 500 miles, within which the area is calculated at 328,437 square miles. The population in 1871 was shown by the census of that year to have been 503,981; at the close of 1875 it was estimated officially at 606,652. With regard to the means of intercommunication provided for the inhabitants we quote from the Free Trade Essay of S. H. Reid on New South Wales, the mother colony of all the Australias. Referring to the condition and prospects of the colony in the railroad aspect he makes the following much condensed statement for the year closed December 31, 1875:

We have to provide roads and bridges over a surface as spacious as that of two great European Countries, to meet the wants of a scattered population which, if massed together, could find standing room in a field of 120 acres. There are about 800 towns and villages on our 207,000,000 acres of territory; and each looks for a road and a postal service at least. The strangest thing is that so many have managed to get them. In this part of the world labor is scarce, and must be paid well. It is, therefore, creditable that the Department of Roads and Bridges has been able to perform so well the task of making roads for our erratic population. The main roads of the Colony are—

I. The Main Southern Road, extending from Sydney to Albury, a distance of 380 miles, with its various branches through all the southern districts of the Colony.

II. The Main Western Road, extending from Sydney to Bourke, a distance of 600 miles, with its various branches connecting the centres of the western districts.

III. The Main Northern Road, commencing at Morpeth, on the Hunter River, 100 miles from Sydney, and extending a distance of 400 miles to the Queensland boundary, with branches connecting the towns and villages in the northern districts.

Besides these, there are other principal roads with many branches, in various parts of the Colony. Since 1857, sixteen hundred miles of metalled road have been formed, and 250 miles of mountain passes; and there are now 3,500 miles of roads in various stages of improvement. On these roads there are bridges which, if placed in a line, would cover a length of thirty-five miles. There is a multitude of ferries of various designs. Amongst the bridges there are iron structures with several spans of 100, 110, 120, and 150 feet, constructed in the Colony. The massive piers of the Gundagai Bridge were made of iron smelted from ores of New South Wales. Another valuable undertaking of this department has been the formation of lines of wells and tanks in the remote interior, where the supply of surface water is sometimes uncertain.

But our colonists begin to see that country roads are most valuable when subsidiary to lines of railway. Even where the roads are good, carriage is a heavy tax, but if the roads are bad it will cost more and take longer to convey produce from one of our country settlements 200 or 300 miles from a market than to forward it from one end of the world to the other by steam. The fact is, until the interior is traversed by railways, our progress, decided as it has been, will be ridiculously less than it ought to be. Both Government and Opposition admit the urgency of this vital question, and proposals for lines penetrating far to South, West, and North, are now before the Legislative Assembly.

The lines open for traffic on 31 December, 1875, were.

| | Miles. |
|---|---|
| Sydney to Parramatta Junction | 13 |

| Branch Line—Blacktown to Richmond | 16 |
| Great Northern Railway: | |
| Newcastle to Murrurundi | 120 |
| East Maitland to Morbeth Branch | 4 |
| | 487* |

* Recently an extension on the southern line to Bowning, 194 miles from Sydney, has been opened. The extension of the western line into the city of Bathurst has also been completed.

The construction of these lines has created a debt of £7,245,379, or a little over £16,579 a mile. Some of the extensions have been very costly, owing to lengthy viaducts and tunnels. A part of the western line is noted both for magnificent scenery and a feat of railway construction said to be unsurpassed; the trains crossing a mountain range nearly 4,000 feet high, by means of zig zags, viaducts, and tunnels. The work accomplished before our railways could be advanced to the present termini is shown by the fact that on 400 miles of line there are one hundred and five bridges, eight viaducts, and ten tunnels. Upwards of 9,000,000 cubic yards of excavation were necessary, removing a quantity of rock and earth three times the size of the largest pyramid in Egypt. The rock in this total measured 2,518,897 cubic yards.

The traffic on the lines is growing rapidly. The following is a comparison of the business of 1866 with 1875:

| | 1866. | 1875. |
|---|---|---|
| Passenger traffic | £69,899 | £174,858 |
| Goods Traffic— | | |
| Wool | 4,940 | 38,160 |
| Coal, coke and minerals | 19,050 | 69,982 |
| Live stock | 936 | 13,587 |
| General merchandise | 57,970 | 287,028 |
| Carriages, horses, dogs, &c. | 16,239 | 31,082 |
| Gross earnings | £168,584 | £614,647 |

If we compare the receipts of 1869 with 1875 we discover a still more encouraging result—

| | 1869. | 1875. |
|---|---|---|
| Miles of line open | 318 | 487 |
| Receipts | £264,975 | £614,647 |

Dividing receipts by length, we get a traffic of £1,406 a mile in 1875, against a traffic of £833 a mile in 1869, an increase of 69 per cent. in six years! Comparing expenditure with receipts, we find they stood as follows:—

(Continued on page 298.)

| | 1866. | 1875. |
|---|---|---|
| Receipts | £168,584 | £614,647 |
| Working expenses | 108,926 | 296,174 |
| Net earnings | £59,608 | £318,473 |
| Proportion of working exp... | 65. | 48.18 |
| Proportion of net earnings.. | 35. | 51.82 |
| | 100. | 100. |

A difference of 17 per cent. in favor of last year. But if we consult the returns of the Commissioner for Railways again, we find that in 1869 the working expenses were 65.66 of the receipts, so that this growth of 17 per cent. in the net earnings is the result of the last six years. If we inquire the bearing of this improvement on the interest payable for construction, a most satisfactory state of affairs is disclosed. In 1869 the interest recouped was £1 17s. 9d. per cent. on the capital invested; in 1870 it was £1 18s. 1d. per cent.; in 1871 it was £2 11s. 7d. per cent.; in 1872 it rose to £3 7s. 11d. per cent.; in 1873 to £3 12s. 8d. per cent.; and in 1874 to about 4 per cent. The results of the traffic for 1875 show a net profit of £318,478, or 4.896 per cent. The profits of 1875 exceed by £50,000 the gross receipts of 1869! The increase during the past six years from under two to four and a half per cent. is a fact most encouraging to railway enterprise in this Colony.

The following extensions are now approaching completion:

| | Miles. |
|---|---|
| Great Southern Railway: | |
| Goulburn to Wagga Wagga* | 177 |
| Great Western Railway: | |
| Kelso to Bathurst† | 2 |
| Bathurst to Orange | 47¼ |
| Great Northern Railway: | |
| Murrurundi to Tamworth | 62¼ |
| | 289¼ |

When these extensions are completed the lines will be—

| | Miles. |
|---|---|
| South: | |
| Sydney to Wagga Wagga | 311 |
| Western: | |
| Sydney to Orange | 179¼ |
| Blacktown to Richmond (branch) | 16 |
| Northern: | |
| Newcastle to Tamworth | 186 |
| | 692¼ |

* Line now open as far as Bowning, 60 miles from Goulburn.

† Now open.

This may seem a small total, yet it is greater than that of the railways of any country in Europe, not excepting Great Britain. But we are only on the threshold of railway progress.

The following will give some idea of the activity which prevails in the department of our able Engineer-in-Chief for Railways, Mr. John Whitton, C. E.

RAILWAY TRIAL SURVEYS COMPLETED.

NORTHERN LINES.

1. Tamworth to Tenterfield, 220 miles, via Manilla, Barraba, Bundarra, Inverell, and Wellinggrove (the nearest point to Glenn Innes, distant 12 miles.) Total distance, Newcastle to Tenterfield, 402 miles.

Clarence and Richmond Rivers to New England District:

1. Moleville (the head of the navigable waters of the Clarence River) to Glenn Innes, via the Mitchell River, 107 miles.

2. South Grafton to a junction with the Moleville and Glenn Innes line at the crossing of the Clarence River, 15½ miles.

3. South Grafton to Glenn Innes, 113 miles.

4. Lawrence to Tenterfield, via Wyon and Tabulam, 118 miles.

A second route is now being surveyed between Tabulam and Tenterfield,

SOUTHERN LINES.

1. Wagga Wagga to Albury, via the Hanging Rock, 77½ miles. Total distance, Sydney to Albury, 386 miles. This line is permanently staked for contract.

2. Wagga Wagga to Deniliquin, via the Hanging Rock, Urana, and Jerilderie, 142 miles. Total distance, Sydney to Deniliquin, 450 miles.

3. Cootamundra (a point on the Great Southern Railway, 253 miles from Sydney), via Muttama and Colac to Gundagai, 33½ miles; and

4. Cootamundra via Jones' Creek to Gundagai, 30½ miles. Total, Sydney to Gundagai, 283½ miles.

WESTERN LINES.

1. Orange to Dubbo, via Wellington, 86 miles. Total distance, Sydney to Dubbo, 278 miles.

COAST LINES.

1. Sydney, via Botany and Port Hacking Creek, to Wollongong 40 miles.

2. Liverpool to Wollongong, 34¼ miles. Total, Sydney to Wollongong, via Liverpool, 63½ miles.

3. Campbelltown, via Appin, to Wollongong, 40 miles. Total, Sydney via Campbelltown, to Wollongong, 68¼ miles.

TRIAL SURVEYS NOT YET COMPLETED.

Clarence and Richmond Rivers to New England District:

1. Tabulam to Tenterfield; second trial survey.

2. Wyon (a point on the Lawrence and Tabulam trial line) to Casino, Richmond River.

Iluka (Clarence River Heads) to Woodburn, Richmond River.

NORTHERN LINES.

1. Tamworth to Armidale: thence probably to Glen Innes.

2. Werrie's Creek (a point on the Great Northern Railway, 26 miles south of Tamworth, and 156 miles from Newcastle) through Breeza, Gunnedah, Narrabri, Wee Waa to Walgett; with probable extension to Bourke.

WESTERN LINES.

1. Dubbo to Bourke, about 350 miles.

2. Wallerawang (a point on the Great Western Railway, 104 miles from Sydney) to Mudgee, about 72 miles.

ROUTES EXPLORED WITH A VIEW TO SURVEY.

1. Murrumburrah (a point on the Great Southern Railway, 282 miles from Sydney), via Booligal, on the Lachlan River, to Pooncaira, on the Darling, and thence in a westerly direction to the boundary of South Australia.

2. From a point near Blayney on the Great Western Railway, and 167 miles from Sydney, via Cowra and Young, to join the Great Southern Railway near Murrumburrah, 282 miles from Sydney.

All the serious obstacles to the rapid extension of the railway system of the Colony have been overcome. Hence the average cost per mile for the future will be about £7,000, far less than half of that for the lines completed. The rails are laid on a uniform gauge of 4 feet 8½ inches. In a speech made at the opening of the Gunning extension, the Engineer-in-Chief stated that 10,000 or 15,000 men would have to be imported to meet the demands of his department; and the Secretary for Public Works assured a deputation from the iron trades that rolling stock of the value of £500,000 will be needed during the next five years. There is good reason to hope, therefore, that we are on the eve of a grand extension of our railways. In the absence of rivers of magnitude running to the seaboard, railways are a supreme necessity in New South Wales. Without them vast resources are as much beyond our reach as if they did not exist; whilst each new line would prove an ever widening channel of benefit to all classes of the population.

Since the foregoing paragraph was written the following important extensions have been submitted to the Legislative Assembly. Those marked with an asterisk have already been agreed to, and the rest will probably also be approved:

| WEST. | Miles. |
|---|---|
| * Orange to Wellington | 56 |
| * Wellington to Dubbo | 80 |
| Wallerawang to Mudgee | 86 |
| SOUTH. | |
| * From a point on the Great Southern Line near Junee, to Narrandera, on the Murrumbidgee River | 64 |
| Wagga Wagga to Albury | 77½ |
| From near the junction of the Lachlan and Murrumbidgee Rivers to Pooncaira on the Darling River | 110 |
| NORTH. | |
| * Tamworth to Armidale | 75 |
| * Were's Creek, on Great Northern Line, to Gunnedah | 40 |
| From Iluka to Woodburn, connecting the Richmond and Clarence Rivers | 24 |
| Total | 561½ |

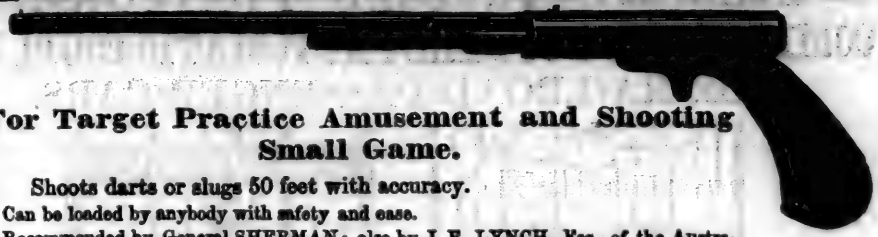
The Western extensions will traverse fine agricultural areas, and reach the capital of the North Western pastoral territory. Of the Southern extensions, that to Albury will connect with the line from Melbourne; and those to Narrandera and Pooncaira will penetrate extensive pastoral districts. Of the Northern extensions, those to Armidale and Gunnedah will reach agricultural and pastoral districts; whilst that which will enable the trade of the Richmond River settlers to escape from a shallow bar entrance to the deeper waters of the Clarence, will give an impetus to the development of two of the most flourishing agricultural districts of the Colony.

☞ At Meadville, Penn., on the 28th ult., in the case of the Pittsburg, Titusville and Buffalo Railroad Company against the Pennsylvania Transportation Company, Judge Pettis granted an injunction restraining the Pennsylvania Transportation Company, which obtained a judgment for $220 000 against the Oil Creek and Allegheny River Company, from proceeding to levy on and sell the railroad and property of the Pittsburgh, Titusville and Buffalo Railroad Company.

☞ The Czar has sanctioned the construction of the Orenburg and Taskhend line through the deserts and steppes by a circuitous route. Eighteen hundred versts of rail will be required, not including the branch line to Tavinsk, 300 versts.

☞ The Waverly Republican says that the Scioto Valley railroad is mostly graded between Portsmouth and Gregg's Hill, and the survey and final location completed between Waverly and Chillicothe.

☞ The work of laying the track for the Wheeling and Lake Erie railroad, between Milan and Huron, is being pushed rapidly forward. Half a mile of track is put down each day.



☞ The officers of the Camden, Gloucester and Mt. Ephraim Railway Company elected on the 28th ult., are: President, James B. Michellon; Secretary and Treasurer, F. P. Pheiffer.

☞ The first through train from Portland to Swanton via the Portland and Ogdensburg Railroad will run through on the 16th inst., with a party of invited guests.

☞ Steel Rails for the Central Vermont Railroad are arriving in large quantities, and a large number of men are laying them.

☞ The aggregate extent of Railway line worked in Russia in 1876 was 18,099 versts, as compared with 17,658 versts, in 1875.

# THE CHAMPION AIR PISTOL.

**For Target Practice Amusement and Shooting Small Game.**

Shoots darts or slugs 50 feet with accuracy.

Can be loaded by anybody with safety and ease.

Recommended by General SHERMAN; also by J. F. LYNCH, Esq., of the Australian Rifle Team.

PRICES.

Black.....$5 00. Nickel Plated.....$6 00.
Nickel Plated Rosewood Handle..... ... ... 7 00.

Each pistol is put up in a neat box with a skeleton gun stock, 6 Darts, 100 Slugs, 6 Targets, a Ramrod, Claw and Wrench.

Sent by Express C. O. D., or by mail at the risk of parties ordering, on receipt of price, and 40 cents additional for postage.

## FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Brokers, No. 12 Wall st., make for customers desirable investments of large or small amounts in stocks of a legitimate character, which frequently pay from five to twenty times the amount invested every thirty days.

Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent 1y23*

### The Coal Trade.

For the week ending on the 30th ult., the total tonnage, as reported by the several carrying companies, amounted to 491,897 tons, against 391,818 tons in corresponding week last year, an increase of 100,174 tons. The total amount of anthracite mined for the coal year is 9,810,351 tons, against 7,644,567 for same period last year, an increase of 2,165,784 tons. The quantity of bituminous coal sent to market for the week was 68,907 tons, against 80,564 tons for corresponding week last year, a decrease of 11,657 tons. The whole bituminous tonnage from the beginning of the coal year is 1,571,257 tons, against 1,617,680 tons in corresponding time last year, a decrease of 46,423 tons. The total tonnage of all kinds of coal for the week is 560,894 tons, against 472,377 to corresponding date last year, an increase of 88,517 tons, and the total tonnage for the coal year is 11,881,608 tons, against 9,262,247 tons, to same date last year, an increase of 2,119,361 tons. The receipts at Perth Amboy for the week ending on the 30th ultimo were 29,535 tons, the shipments 27,083 tons, leaving a stock on hand of 128,516 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week in June was 80 330 tons of which 65,923 tons were coal, and 14,407 tons coke. The total carried for the year is 3,282,599 tons, of which 1,812,021 tons were coal and 430,896 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, July 9.*

### American Manufactures Abroad.

The Collector at this port has received the following from the Assistant Secretary of State:

UNITED STATES CONSULATE-GENERAL,
BERLIN, June 12, 1877.

*Hon. Assistant Secretary of State, Washington, D. C.:*

SIR: I have the honor to acknowledge the receipt of instructions Nos. 108 and 109, the latter having reference to the disposition made of my No. 249, in relation to the International Exhibition in this city. In this connection, I will not omit to make mention of the decided interest caused here by collections of locks and tools of American manufacture now on exhibition in this city, through the agency and in the buildings of the Berlin Association of Architects. As regards the former, it is conceded on all sides that no locks are made anywhere in this country that can compare with those exhibited, either in quality and workmanship or in cheapness; and, with proper effort to introduce them, they cannot fail to find an extensive and profitable market in Germany.

Of the sets of tools exhibited, all of which are found most handy and perfectly finished, it is especially the axes and hatchets, so smoothly polished and varnished, with their suitable and practical handles; and also the planes and augurs, with their ingenious improvements, that meet with favor and admiration. To find for the creditable specimens of American industry a market abroad is a subject well deserving the attention of our enterprising business men. A collection of articles of American furniture, from their excellent material as well as their substantial workmanship is likewise exhibited, and receives much commendation.

As there would seem to be no good reason why a market should not be found in this country, by reason of their superior merits, for these and other articles of our manufacture, I trust that it will not be deemed out of place if I have ventured briefly to bring the object to your attention. I am, Sir, your obedient servant,

H. KREISMANN, Consul-General.

☞ L. Saltonstall has been elected President, and Francis Cabot, Clerk and Treasurer, of the Boston Exchange Company.

## American Railroad Journal.

New York, Saturday, July 21, 1877.

### American Machine Tools.

It required but slight observation to see a marked distinction between the machine tools as they were placed in juxta-position in the Machinery Department of the recent Centennial Exhibition. The workmanship and finish generally were excellent, but design and proportion differed in many particulars.

The Worcester tools could be distinguished from the Fitchburgh ones, and these again from those contributed in Philadelphia. At one time all the Eastern tools were distinguishable for an almost profusion of ornament consisting of architectural moldings, bright colored painting, etc. These have been modified but not altogether abandoned, as was observable in some of the tools from Worcester and New Haven. On the other hand some tools from Hartford, Fitchburgh and New York resembled those made in Philadelphia where the style is plain without any architectural elaboration and corresponds to modern practice in England. There is, however, an undoubted tendency toward the plain mode of constructing frames, and the moldings on lathe heads and tail stocks were not so numerous as might have been seen a few years ago. As far back as twenty-five years Joseph Whitworth & Co., of Manchester, Eng., discarded, if they ever had it, all architectural ornamentation on their tools. The frames were of the plainest description with perhaps a single border head, but the forms were singularly graceful, being elliptical or parabolic in outline. Their shaping machines and old "Jim Crow" planers will be remembered by some as examples of what we have stated. This same style for many years distinguished the tools constructed by William Sellers & Co., of Philadelphia, from others. The good example has been followed by many others and we opine that the ornate architectural style will be abandoned entirely in course of time as makers find their old patterns give out. By adopting plain surfaces castings can be more easily molded, and there are fewer receptacles for dirt when the tools are in use; they are better and more economical in all respects. Great originality in design and appliances was observable in the exhibits by William Sellers & Co., Bement & Son, of Philadelphia, George Corliss of Providence, the Pratt & Whitney Co., of Hartford, and the Fitchburgh Machine Co.; the latter company must have expended a large amount of capital in the introduction of new patterns.

*Engineering*, in speaking of American lathes, compares them with European ones, remarking the difference in general workmanship. "The latter (European lathes) are carefully fitted in all working joints, everything else is left plain and rough; but in America the whole machine is fitted up in one manner. The appearance of machine tools is a matter more thought of in America, and criticisms on the design, which generally means the framing, are often heard in cases where nothing but working qualities would be thought of in England. The minute or detail fitting on Eastern-made lathes is exceptionally well done, and if the alignment and cross motion receive attention in proportion—which we question—it is a wonder how the tools are produced at the prices for which they are sold." An enquiry from any of the engineers and machinists named above will, we think, fully confirm the statement we now make, viz: that within the few past years they have exported a very great number of tools and are continually receiving orders from abroad, which is sufficient evidence that American machine tools will compare favorably with those of European manufacture.

The attention now given, far more than previously, to standard internal and external measurements, standard gauges, and surface plates for obtaining true plane surfaces will react favorably in the production of all mechanical work and especially in steam machinery and machine tools.

### A Remarkable Material—Vulcanized Fibre.

It is now three years since the material known as Vulcanized Fibre was first successfully applied to practical uses. Its wonderful properties have been gradually developed, so that it has become an important article of commerce and as valuable in the industrial arts as

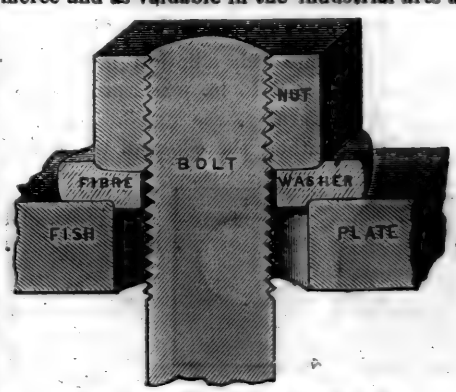

Fig. 1.—FISH-BOLT, WASHER, &c.

India rubber or gutta-purcha. It has been ex-

tensively applied to railroad purposes. For instance, fish-bolt washers as illustrated at Fig. 1, where the cut represents a section of fish-plate, with bolt and nut, and vulcanized fibre elastic washer, showing the manner in which it works in use, indicating how it also "locks the nut." An examination of the cut will make it clear how this washer of vulcanized fibre serves not only as a permanent elastic cushion but also makes a perfect nut-lock, the object being to prevent the immense loss hitherto sustained by the dropping off of nuts from

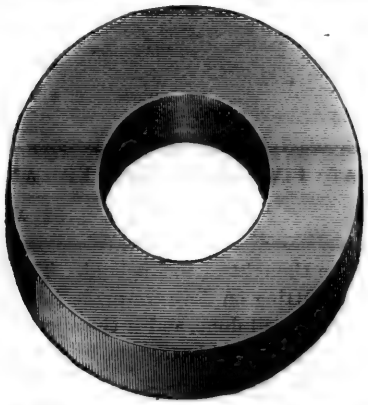

Fig. 2.—Exterior form of washer.

railroad bolts which on a line of great extent has been a source of great trouble and expense—one of far greater magnitude than would at first sight appear. The exterior form of the washer is shown on a larger scale at Fig. 2.

The washer is placed on the bolt next to the fish-plate, and the nut screwed down hard upon it. As a rule, the holes in a fish-plate are elliptical, to allow of the contraction and expansion of the rail longitudinally, and when the nut is screwed down a portion of the wash-

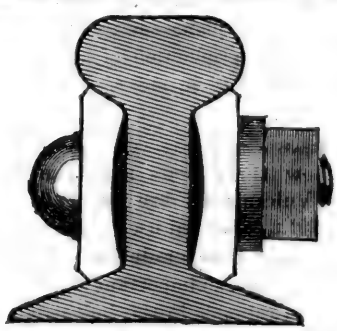

Fig. 3.—Transverse section.

er is forced into this elliptical hole to the depth of 1-32 to 1-16 in. which prevents the washer from turning—see Fig. 3. By exposure to the weather, the edges of the washer

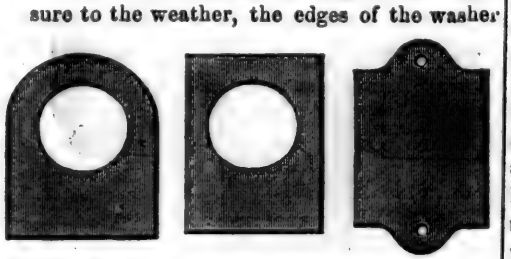

Fig. 4.—Car-box washers, etc.

outside of the nut become swollen and rough, and rising around the edges of the nut hold it firmly in place. This rough appearance of the edges is not a sign of decay, as will be demonstrated by cutting with a knife.

These elastic Fish-Bolt Washers are made to suit $\frac{7}{8}$, $\frac{3}{4}$, $\frac{5}{8}$ and $\frac{1}{2}$ inch fish-bolts, varying in price from $22 to $12 50 per thousand. They are in use on the Chicago and Northwestern, Atlantic and Pacific, Chicago, Burlington and Quincy, and many other railroads.

Another application of this material on railroads is found in the flexible car-box washers, "dust-guards," oil-box covers, etc.

These Washers, or "Back-straps," as they are sometimes called, are used on all railroad cars, as a packing around the axles where they enter the rear of the oil-boxes, to prevent the entry of dust and grit, and the leakage of oil. Heretefore leather has been used for this purpose, but soon becomes rotten and limp with the oil, rendering them useless. Vulcanized Fibre Washers are not affected by oil, grease, or petroleum; do not cut the axles, as grit does not adhere to them, and will outwear several leather ones. They are cut to order, of any desired pattern and thickness, as each railroad has its own pattern. They are now in use on many leading railroads, giving perfect satisfaction, and are also adopted by a majority of the largest Car Manufacturers in the United States and Canada.

Enough has been said to prove that this material has been thoroughly tested and its value appreciated by railroad companies, but there are a great many other purposes to which it has been applied, but which we can now only mention as journal bearings, bushings, electrical uses, roving-cans, condenser tube ferrules etc.

We now allude to the prominent characteristics.

Vulcanized Fibre has as its base vegetable fibre, in the shape of paper, or paper pulp, which is subjected to "vulcanization" (not by means of sulphur and heat, as in the case of rubber, but by powerful chemical treatment), whereby the original properties of the raw material are totally changed, and a new and very valuable material is produced.

It is absolutely insoluble in hot or cold water, oil of any kind, petroleum, naphtha, alcohol, turpentine, ether or ammonia. It is exceedingly tough, strong and elastic, retaining these properties under all conditions of climate and ordinary exposure, and, as far as ascertained, for an indefinite period of time. Indeed, it is believed that, like the "papyrus" of the Egyptian mummies, it will last for thousands of years without deterioration. While it will absorb water, and thereby become expanded and more flexible, it will not absorb oil, petroleum or any other fluids, except so far as they may be diluted with water. In most instances, with the evaporation of the water, all foreign substances which may have been introduced in solution, will be expelled. It is an excellent non-conductor of heat and electricity. It has remarkable anti-friction properties, being entirely free from grit, more durable than brass or Babbitt metal, and requiring very little lubrication. It can be manufactured in a great variety of qualities and shapes, adapted to different uses, some of the goods being almost as hard as ivory and as tough as horn, while others so closely resemble leather and sheet rubber as to deceive almost any ordinary person. Probably a better idea of the character and practical value of this material can be obtained, however, by an enumeration of the different kinds of goods now being made, and the uses to which they are applied. The various patents under which these goods are manufactured, are owned by the "Vulcanized Fibre Company," a close corporation, organized under a special charter from the State of Delaware, and having extensive works in the city of Wilmington, in that State. Here they have for the past two years been quietly at work, experimenting, testing and developing the manufacture of these goods, expending large amounts of money for special machinery, etc., until finally, within the past two years, they have put upon the market thoroughly tested goods of various kinds, which for excellence in quality and cheapness, are beyond competition; and notwithstanding the fearful depression of business, which has affected all branches of trade, the sales of the company have increased from month to month at a rate that has compelled a steady increase of manufacturing facilities, to keep pace with the demand.

The New York office of the company is at No. 17 Dey Street, where the president, Mr. William Courtenay, makes his head-quarters and where several beautiful specimens of Vulcanized Fibre can be seen.

---

**Columbus and Hocking Valley Railroad.**

The stockholders of the Columbus and Hocking Valley Railroad Company, at their last annual meeting, had under consideration the reported discoveries of large and valuable veins of iron ore which were being made so generally throughout the territory tributary to their road. That the company might avail itself of all benefits which would accrue from prompt action in possessing the land, and yet that no mistake should be made through undue excitement, the stockholders instructed the directory to have a thorough and reliable examination personally made by a committee of the directors, and if the committee became satisfied that the facts would warrant the building of one or more branches, that such branches should be forthwith built to reach points where the land owners were about to build or were actually in progress of constructing substantial furnaces.

A committee of directors most largely interested as stockholders, and quite conservative in their notions, made the examination, and became satisfied that existing facts and assured prospects would warrant the building of at least two branches at this time. Thereupon the construction of the Monday Creek and Snow Fork branches was ordered. They are now being constructed, and the track will be laid on a part thereof within the coming month.

It has been the policy of the company from the beginning to reserve unissued a part of its capital

stock, under the belief that future coal developments would require the building of branches. When that time should come they would be built by funds coming from the issue of the reserved stock, thus making "*pari passu*" an increase in length of road, with increase of capital stock. The late discoveries of iron ore—the existence of which, it is most singular to say, should not have been known long before this—have brought about a condition of affairs most agreeable to stockholders, inasmuch as the stock reserved to be issued for coal purposes is now required for a new and more valuable commodity, found in the territory where it was originally supposed the coal branches would have to be built.

At the last meeting of the directors they determined that rather than place the reserved stock on market for sale, it was better to allot it pro rata to the stockholders as a stock dividend, and to use the funds, which otherwise would have been paid to the stockholders as a cash dividend, in the construction of the branches.

Accordingly they ordered that the regular August dividend of four per cent. be paid in stock of the company at par. The stockholders thus, within themselves, without going outside for funds, will lengthen their road and greatly improve their property. The branches to be built will no doubt add to the earnings of the company far more than the sum required to pay dividends on the newly issued stock.—*Ohio State Journal.*

**Cincinnati and Muskingum Valley Railway.**

The earnings of this road for the years ending December 31, 1875 and 1876, were:

| | 1875. | 1876. |
|---|---|---|
| From passengers | $121,844 33 | $101,794 28 |
| " freight | 257,780 73 | 206,033 34 |
| " express | 4,343 55 | 3,424 06 |
| " mails | 11,205 00 | 9,837 97 |
| " rents | 727 80 | 768 50 |
| " miscellaneous | 325 82 | 500 95 |
| | $396,227 23 | $322,359 10 |
| Expenses, viz: | | |
| Conducting transp. | $77,934 62 | $72,297 37 |
| Motive power | 105,084 22 | 89,460 63 |
| Maintenance of road | 135,659 59 | 124,192 12 |
| Maintenance of cars | 21,768 05 | 26,244 42 |
| General expenses, including taxes | 20,036 12 | 17,548 89 |
| | $360,482 60 | $329,743 43 |
| Net earnings | $35,744 63 | |
| Deficit | | $7,374 33 |
| To which add interest for one year on the bonds of the company, paid by the lessee | | 105,000 00 |
| Making a total loss to the lessee of | | $112,384 33 |
| The amount advanced by the lessee for account of deficiency in earnings sufficient to meet expenses, and for interest on the bonds of the company to December 31, 1876, was | | $382,348 76 |
| Add amount expended by the lessee for betterments | | 5,458 35 |
| Total | | $387,797 11 |
| The company is also indebted to the lessee for earnings received in the interim between the date of the lease, Jan. 1, 1873, and the time the road was actually delivered, May 1, 1873 | | 3,812 70 |
| Making the total indebtedness to the Pittsburg, Cincinnati and St. Louis Railway Co., Dec. 31, 1876 | | $391,609 81 |

The road is 148.4 miles in length, extending from Dresden Junction, on the Pittsburg, Cincinnati and St. Louis Railway to Morrow, on the Little Miami Railroad.

The equipment of the road January, 1877, consisted of 14 locomotives, 10 passenger coaches, 2 passenger and baggage, 4 baggage, mail and express, 55 box, 33 stock, 14 flat, 225 gondola, 2 side-hopper, 26 bottom-hopper and 4 caboose cars.

Tons of local freight carried in 1876, 163,907; foreign freight, 28,881—total, 192,788, against 206,873 in 1875, a decrease of 13,585. Total mileage of freight, 9,775,811. Av. rate per ton per mile, 2.11 cents.

Number of local passengers carried in 1876, 180,620; foreign, 6,012—total, 186,632, against 215,798 in 1875, a decrease of 29,166. Total mileage of passengers, 3,625,689. Av. rate per passenger per mile, 2.81 cents.

Secretary and Treasurer.—C. C. WAITE.

**Ogdensburg and Lake Champlain Railroad.**

The Twelfth Annual Report of the Ogdensburg and Lake Champlain Railroad Company commences with an extended summary of the negotiations and litigation with the Central Vermont Railroad, terminating with the settlement by which the Ogdensburg and Lake Champlain Railroad Co. agreed to pay the Central Vermont $50,000 and stop all suits, thereby vacating the receivership and coming into full possession of the road and property. This settlement the directors consider a wise one, under all the circumstances. The cars and engines, except a few freight cars, have been delivered into their hands, and although the freight cars have depreciated in value they will be efficient for use for several years by the expenditure of $12,000 to $15,000. The track will require 1200 to 1500 tons of iron or steel. The locomotives are in good condition; the equipment consists of 1003 freight cars, 17 baggage and passenger cars, and 32 locomotives. The report continues:

Notwithstanding the low rates received for freight as compared with rates ruling five years ago, it is believed that the road will soon earn something for the holders of its common stock, in addition to paying the interest upon its bonds, and dividends upon its preferred stock. The expenses of operating the road are diminished almost in the same ratio as its earnings; iron, steel, and other important articles, are reduced to one-half their former cost; and our pay rolls are nearly fifty per cent. less than in 1870.

In addition to this, we have three outlets for our business at Rouse's Point, instead of one as formerly.

The Delaware and Hudson Company have completed their road from Whitehall to Rouse's Point, thereby giving us a valuable connection to New York, as well as to Eastern points.

The Portland and Ogdensburg road will in a few weeks be completed, giving us not only a valuable connection to Portland, but a new avenue to Boston; and, what is of equal value, both roads open a large extent of country to be supplied with grain and flour, giving us better rates than the through business.

Notwithstanding these new and important connections, we look upon the Central Vermont road as our natural avenue to Boston and to the principal New England points; and our relations with that road are of the most pleasant and harmonious character.

The deepening and widening of the Welland Canal, now in progress, and which will be completed in the course of another year, will add largely to the business of our road, admitting, as it will, steamers of the capacity of twelve hundred tons to Ogdensburg, whereas now we are restricted to vessels of three hundred and fifty tons. This improvement will open to us the whole navigation of the lakes.

The company is free from litigation; it has no law suits; its floating debt has been reduced since April 1, $32,000, leaving to day a floating debt of only $78,000; and its financial condition will compare favorably with that of any road in the country.

The financial statement shows that up to March 31, 1877, the receipts and balances had been $307,729 46, and the payments $276,034 10, leaving a balance of $31,695 36. The road stands for $6,134,300 97.

☞ The Fond du Lac (Wis.) Commonwealth notices the arrival at that place of two coaches for the Fond du Lac, Amboy and Peoria (narrow gauge) Railway: one of which is 35 feet long, and will seat about forty passengers; the other is of the combination order with both passenger and baggage accommodations, is 40 feet long with 10 feet of baggage room, and will seat about 36. The company is about to receive a new freight engine, and are contracting for a number of box cars. The track is now completed 10 miles out of the city, and the work of construction is going on rapidly each day.

☞ At a recent meeting of the directors of the Louisville and Nashville Railroad Company it was stated that the earnings for the fiscal year ending June 30, 1877, were over $350,000 above the interest of the bonded debt. $185,000 was appropriated for a dividend of 1½ per cent, and the remainder devoted to the reduction of the liabilities of the road. These facts speak eloquently in favor of the able management and mark the financial wisdom and success of Louisville's great enterprise—one of the most thoroughly equipped and best conducted railroad lines in America.

☞ The route and terminus of the Massillon and Cosbocton Railroad has been changed. That part of the line of the proposed road lying between Barr's Mills, Stark county, and Massillon, is changed to run from Barr's Mills to Canton, thence through Stark, Summit and Cuyahoga counties to Cleveland. This changes the northern terminus from Massillon to Cleveland. The southern terminus, Cosbocton, remains unchanged. Ex-State Senator R. B. Dennis is President of the company.

**Validity of Bonds in which the Wrong Act is Cited—Presumption in Favor of Transferees of Negotiable Securities.**

The following decision has been rendered by the Supreme Court of the United States:

No. 581—The Board of Commissioners of the County of Johnson, Plaintiff in Error, vs. Derrick A. January.—In error to the Circuit Court of the United States for the District of Kansas.

This is an action brought to recover the amount of certain coupons taken from bonds issued by the plaintiffs in error to the St. Louis, Lawrence and Denver Railroad Company, of which bonds the defendant in error was the holder. By consent of the parties the case was tried by the court without a jury. The court found the facts, and gave judgment for the defendant in error. The plaintiffs in error thereupon brought the case to this court for review.

There is no dispute between the parties as to the leading facts of the controversy. The proper authorities submitted the question to the electors of the county whether the county should subscribe for $100,000 of the stock of the company to be paid for by issuing its bonds to that amount. The election was ordered on the 25th of January, 1869, and took place on the 6th of April, 1869. The proposition was sanctioned by a majority of more than two to one. The bonds were thereafter executed and deposited as escrows. On the 22d of May, 1871, the Commissioners made an order that they should be delivered, and they were delivered accordingly. A certificate of stock was issued and delivered by the company and is still held by the county. It has never been surrendered nor offered to be surrendered. The bonds were signed by the Chairman and Clerk of the Board of Commissioners and attested by the County Treasurer. There was in each one a recital "that this bond is executed and issued by virtue of and in accordance with an act of the Legislature of Kansas entitled 'An act to authorize counties and cities to issue bonds to railroad companies,' and in pursuance of and in accordance with the vote of a majority of the qualified electors of the County of Johnson at a regular election held on the 6th day of April, 1869." Each one bore also the following indorsement:

"I, A. Thoman, Auditor of the State of Kansas, do hereby certify that this bond has been regularly and legally issued; that the signatures thereto are genuine, and that the bond has been duly registered in my office, in accordance with an act of the Legislature entitled an act to authorize counties, incorporated cities, and municipal townships to issue bonds for the purpose of building bridges, aiding in the construction of railroads or other works of internal improvements, and providing for the registration of such bonds and the repealing of all laws in conflict therewith," approved March 2, 1872. "Witness my hand and official seal, this 21st day of March, 1872."

The certificate is authenticated by the official signature and seal of the Auditor. The road was finished and has since been in operation. The county and its inhabitants are in the enjoyment of the benefits arising from it. There is no imputation of any taint of fraud upon either side. The county authorities paid the interest upon the bonds for a time. The county has received what it contracted to receive, and has paid what it contracted to pay. The plaintiff in the suit is the bona fide holder of the bonds. A case of stronger equity can hardly exist.

Several objections have been taken to the validity of the bonds. They have been elaborately and ably argued upon both sides. The view which we take of the controversy renders it necessary to advert to but one of the objections, and to that one briefly. Our judgment will be placed upon a different ground. The act mentioned in the recital in the bond was erroneously referred to. The act does not affect the case, and may be laid out of view. The act of Feb. 29, 1868, was in force when the order for the election was made. It gave ample authority for making the order, and for all that was subsequently done.

It is insisted that this act was repealed by the act of Feb. 27, 1869; that the order for the election fell with the act repealed, and that, consequently, the election was held without any legal authority. Such repeal, so far as regards the authority to make the order, and the continuing efficacy of the order, is strenuously controverted upon the other side. Whatever may be the fact, it is not and cannot be denied that, after the passage of the act of 1869, all the proceedings were in strict conformity to its requirements. It was in force before the election was held and until after the bonds were issued and delivered.

This act, like the act of 1868, authorized the Commissioners to issue the bonds when the requirements of the law had been complied with They were thus constituted a tribunal for the adjustment of all questions touching the subject. They were clothed with the power and charged with the duty to decide them. No appeal or review was provided for. Their issuing the bond was the reflex and embodiment of their judgment that it was proper to do so. It implies a prior determination to that effect. The fact carries with it this presumption.

In their recital the bonds say that they were issued in conformity to law, and in pursuance of the election held on the 6th of April, 1869. It is true they refer to the wrong statute, but *falsa demonstratio non nocet*. The bad here does not hurt the good. The act of the Commissioners was the act of the county, and the county is conclusively bound by what they have done. As between the county and a bona fide holder, no question involving the infirmity of the securities can be raised. The principle of estoppel applies and precludes the obliger from interposing such a defense. Whether the certificate of the Auditor of State, indorsed on the bonds, has or has not the same effect is a point not necessary in this case to be considered. Taking and holding the certificate of stock, issuing and delivering the bonds, and paying the interest for a time, cured the defect as to the order for an election, if any such existed. Under the circumstances a bona fide taker had a right to presume that everything had been properly done which was necessary to the validity of the bonds. When this suit was instituted the objections which have been made were too late. Affirmed.

Mr. Justice Swayne delivered the opinion.

**Atlantic and Great Western Railroad.**

In the Supreme Court on the 18th inst., Judge Daniels rendered the decision on the motion of Charles M. Da Costa, representing the Franco-Egyptain Bank, to set aside an ex parte order obtained in the suit of William M. Taylor and another, as Trustees, against the Atlantic and Great Western Railroad Company and others. The bank applied as the owner of $1,800,000 of the mortgage bonds of the company. The facts of the case, as well as the decision of the court, are stated in the following opinion of Judge Daniels:

An action was brought in the State of Ohio to foreclose a mortgage given upon the property of the Atlantic and Great Western Railroad Company; and to make the foreclosure entirely complete other actions were also prosecuted for the same purpose in Pennsylvania and this State. As the greater portion of the property was situated in the State of Ohio, the suit pending there was considered, as it was, the principal action. An argument was made having the sanction of the greater part of the bond owners secured by the first mortgage, for a three years' extension of the time fixed for the payment of their bonds, for the consideration that their interest should be paid in gold coin. It was subject, however, to the sanction of the proper court in the state of Ohio. An application was thereupon made to obtain the sanction of the court, which was required to render the agreement effectual, and upon a hearing of the parties that was secured. After that an application without notice was made in the action pending in this court for a similar order, and the learned Justice then presiding, upon being assured that the application had the assent of all the parties, directed the order to be made, and it was accordingly entered. It now turns out the assurance given to the court resulted from a misapprehension of the facts. The parties appearing and answering in the case had not assented to the entry of the order in this court, but were determined to contest its validity and to that end had taken an appeal from the order made in Ohio. If these facts had been made known to the learned Justice presiding in this court when a similar order was applied for here the application would not have been allowed to succeed. So much has been secured by way of information from the learned Justice himself, and in that respect his views are entirely in accordance with the settled practice of this court, which requires notice of every proceeding in an action to the adverse or contesting parties who have appeared. It is no answer to the absence of notice that they may have no rights or interests to be injuriously affected by the application. Upon that subject they are not to be concluded by the views of the applicants, but are entitled to an opportunity to be heard for themselves. That was the well established rule of the practice existing before the code, and it has been preserved and continued by the succeeding system, which contemplates the service of notice of all proceedings in the action upon the parties appearing for the protection of their rights, and the right to such notice has not been made dependent upon the fact that actual interests may be owned by them which in some event could be adversely affected by the proceeding designed to be taken. After providing for the manner of serving notices, it has been declared that where the defendant shall not have demurred or answered, service of notice or papers in the ordinary proceedings in an action need not be made upon him, unless he be imprisoned for want of bail, but shall be made upon him or his attorney if notice of his appearance in the action has been given. [Code, section 414.] By a very clear implication this section required notice of the application made for the order which was obtained. It defined the only case in which notice of ordinary proceedings was not intended to be required, and as this was not a case of that description, the right to notice clearly existed on the part of the defendants now applying for a vacation of the order. They have appeared and answered in the action, and were entitled to notice of the application before the order could be properly made. The motion to set the order aside must therefore be allowed to prevail with costs.

Charles M. Da Costa appeared for the motion, and W. W. MacFarland, in opposition.

**Lake Shore and Michigan Southern Railway.**

In the Special Term of the Supreme Court, on the 14th inst., Judge Barrett rendered a decision in the suits brought by George S. Boardman and ten others against the Lake Shore and Michigan Southern Railway Company, tried by him several months ago. Mr. Boardman holds twenty-three shares of the guaranteed ten per cent stock of the Michigan Southern Railroad Company, and all the other plaintiffs hold certificates for more or less stock—some by original purchase and some by transfer. These suits have been in litigation for the last ten years, and the question in dispute was whether, after the consolidation of the Michigan Southern and Northern Indiana Railroad with the present defendant's company, which assumed all the former company's liabilities, the defendants were bound to fulfill the contract on the certificates of stock issued in 1857 to pay dividends on such preferred stock. The main defence set up by the company was the statute of limitations, acquiescence in the non payments of arrears, waiver, estoppel and equitable laches.

In deciding the case Judge Barrett says that in the case of Prouty, one of the present plaintiffs, the General Term has decided the validity of the guaranteed stock, the liability of the consolidated corporation and the general right of the stockholders to arrears of dividends and interest thereon from the time when they should have been paid, which leaves only for discussion the sufficiency of the proofs of the rights of each plaintiff. Taking up the various points in their order, he holds that the defendants are a corporation de facto and de jure. The plaintiffs, he further holds, must show that they hold guaranteed stock issued by the old company in 1857; that the certificates of transfer of later date do not indicate a new issue, but a transfer of the original one, and merely a substitution of shareholders; that the plaintiffs are all holders of guaranteed ten per cent stock of 1857, and that the holding of transfer certificates does not give a right to previous dividends, but to subsequent dividends, even from profits previously made. In this case he says the word "dividend" does not mean a technical dividend issuable at the judgment of the managers, but a specific payment which the company is bound to pay out of its net earnings, for which they become liable on making net earnings, even though they do not make profits. He holds, moreover, that these are not actions to compel a declaration of dividends, but to compel the company to fulfill its contract to pay them. He also decides that there is no bar by the statute of limitations, the original contracting company being a foreign corporation and the suit having been commenced within six years since the consolidation. He overrules the objection as to estoppel, but says, however, that with regard to certificate transfers after the obligations to pay matured, the acceptance of future dividends by the holders of certificates without putting in a claim for arrears tends to stamp the understanding with which the transfer was made and indicates very decidedly their own conception of what had passed to them. In conclusion, he gives judgment for arrears, with interest, in favor of ten of the plaintiffs, but dismisses the suit in the case of the executor of Mr. Volsin, whose certificate is dated July, 1870.

### Lever and Cam Valves.

Wherever steam, water or gas are used, a greater or less number of valves are necessary for regulating the supply, and in order to prevent leakage and to ensure safety, the construction of suitable and efficient valves has received much attention from engineers and mechanics in general. That there are an immense number of valves of various descriptions

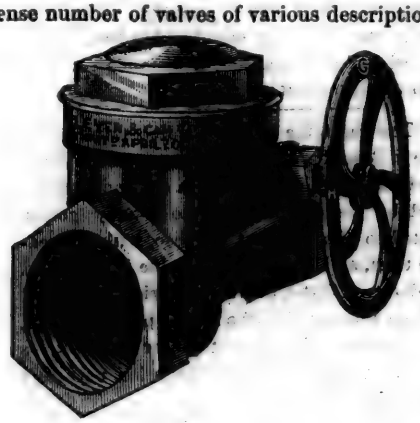

Fig. 1.

in use will readily be admitted, but the fact that engineers, manufacturers, and, indeed, we may say the public in general, have frequent trouble with leaky and imperfect valves, and that much annoyance and damage result from the same cause, proves the demand for contrivances of this description that shall have the inherent properties of simplicity, tightness and non-liability to get out of order.

An examination of the valves represented here will show that these qualities have been attained, and that a peculiar method of construction secures all that is desirable.

These lever and cam valves were patented April 20th, 1875, by Henry S. Lansdell and John S. Leng, and are highly spoken of by

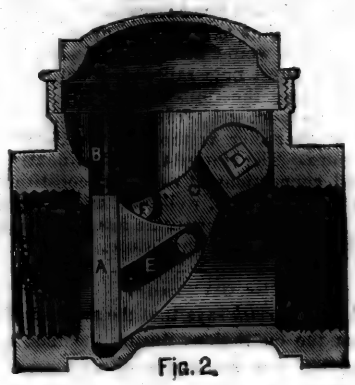

Fig. 2.

those who have them in use. Fig. 1 represents the exterior and Fig. 2 the interior of one of the valves. Reference being made to these, the operation may be understood by the following description: The gate, A, moves on guides, B B, which are arranged to prevent friction by keeping the gate, when moving, from contact with the seat and wall of the valve chamber. The gate is opened and closed by means of the lever arm, C, attached to the rock shaft, D, and working in the slot, E. When the gate is nearly down, the cam, F, forces it forward and down to its seat. One quarter turn of the wheel, G, (which may be replaced by a straight arm or lever), opens or closes the valve. The projection, H, indicates the position of the gate. Valves larger than 2½ inches are provided with compound power for opening and closing.

The combination valve, Fig. 3, constructed for use on pipes erected on the outside or inside of buildings as a precaution against fire, is made of iron, with brass gate, cap and stuffing gland, and combines, in one piece, valve, Y, nipple, cap, flange union and New York Fire Department standard male thread. The advantage of this combination in saving labor will be readily appreciated. The facility with which it is opened and closed is especially valuable in case of fire.

The good features that are apparent in these valves are, first, the rapid manner in which they can be closed, one-quarter turn being sufficient, while in ordinary globe valves several turns are necessary to open and close fully, and there is no indication of speed, motion or quantity given by any opening of the valve; but in one-quarter of a turn of this valve, subdivisions and indications can easily be marked and noted, and in cases of emergency with steam machinery, the steam can be shut off instantaneously.

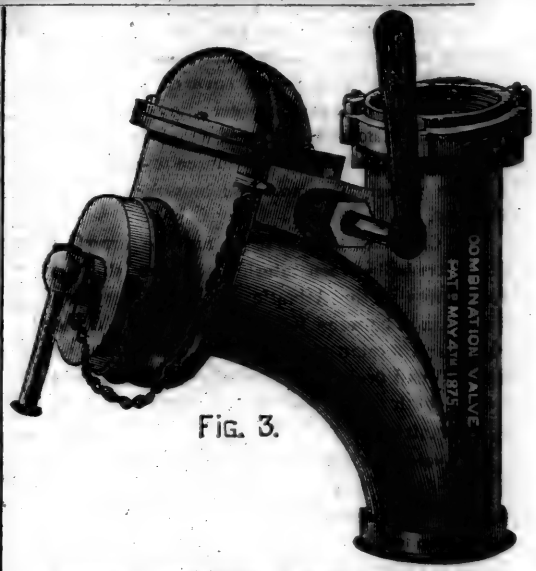

Fig. 3.

A second advantageous feature is the arrangement of the cap seen screwed in Fig. 2. The removal of this cap enables a ready and full examination of the valve, and the displacement of any obstruction. Other advantages are, that there is a straight open passage the full size of the pipe; the valve is very compact, as it only occupies about one-half the space of ordinary valves; the parts are so arranged that all the pressure bears on the back of the gate, and it therefore serves to maintain the valve tight; its freedom from friction; as soon as the gate leaves the seat, it is entirely free; the parts are interchangeable, and the valves are made from the best steam metal.

Various styles and sizes of these lever and cam valves are furnished by Messrs. Leng & Ogden, iron and steel merchants, 4 Fletcher street, and 212 Pearl street, New York city, who were awarded a special medal and diploma for them at the recent Centennial Exhibition held at Philadelphia last year.

☞ Holders of Sunbury and Erie Railroad bonds dated September 10, 1857, and maturing October 1, 1877, secured by a mortgage to Charles S. Boker, trustee, who desire to extend the time for payment until October 1, 1897, can now do so. The bondholders are requested, on or before August 15, to sign an agreement of extension and deposit their bonds at the Pennsylvania Railroad Company's office, in Philadelphia. Holders not availing themselves of the privilege will be repaid the principal of their bonds on and after October 1st, after which date interest ceases.

☞ The circular just issued from the mercantile agency of R. G. Dun & Co., states that the most encouraging aspect of the present time is the excellent prospect of the crops throughout the country. It is evident that a year of great production is vouchsafed to the country. Local trade in each section dependent upon that condition of things seems to promise fairly.

☞ The branch from the New Jersey Southern railroad at Tom's river, connecting with the steamer for Seaside Park, was opened yesterday by a party of four hundred excursionists.

### Internal Commerce of the United States.

The public printer has just delivered the first annual report on the internal commerce of the United States. This report covers a wide range of subjects, embracing the economy of transport by rail, the competitive forces which exert an influence over the internal commerce of the country and the principal commercial movements of the country.

The Canadian transit trade and the growth of direct trade between interior points at the West and points in the Atlantic and Gulf States, and direct trade between interior points in the United States and foreign countries, are fully discussed. The railroad problem is treated of at considerable length, both as to the United States and foreign countries.

It is said that the value of the railroads of the United States is about twenty-three times the value of the shipping engaged in our foreign commerce, and that the value of our internal commerce is twenty-five times the value of our foreign commerce; that eighty-seven per cent. of the grain shipped from the West to the seaboard during the last year was transported on rail lines, and that over ninety per cent. of the entire internal commerce of the country is on railroads. Although the total amount of the contributions of the government up to the close of the year 1876 in aid of railroad construction amounted to $144,000,000, embracing land grants and subsidies to Pacific railroads, yet this sum is only three per cent. of the entire cost of the railroad system of the United States.

It is stated that the government has from its organization collected elaborate statistics in regard to our foreign commerce at great expense, but that prior to the appropriation for the preparation of the present work it had never instituted any means of collecting information in regard to our much more important internal commerce. The services of sixteen persons as experts have been secured, embracing secretaries of the boards of trade and chambers of commerce at the principal commercial cities of the country. The report is accompanied by thirteen maps, showing the principal commercial highways, embracing rail and water lines.

### Marietta and Cincinnati Railroad.

The Baltimore Sun, in reply to a letter of a correspondent, complaining of the non-payment of the interest on the bonds of the Marietta and Cincinnati Railroad Company, etc., etc., makes the following comments which fully explain the purport of the letter, besides throwing much light on the subject:

The fact of the connection between the Baltimore and Ohio and the Marietta Companies doubtless did aid in strengthening the credit of the latter company, and probably did influence others besides our correspondent in purchasing the bonds, especially those under the third mortgage. It is equally true, however, as our correspondent remarks, that the bonds were not guaranteed by the Baltimore and Ohio, as an examination of the face of the bonds would disclose; and hence it was merely a matter of hope and trust that the Baltimore and Ohio, which had frequently aided the M. and C. by advances for the payment of interest, &c., would continue to do so, though it was under no legal obligation in the premises. The day, however, seems to have come, in the stress of the times, when the B. and O. finds itself unable or deems it prudent no longer to make such advances.

The Cincinnati and Baltimore railroad is leased by the Marietta and Cincinnati, the terms of the lease being that the dividend on the stock and interest on the bonds of the former shall be paid by the latter. The track of the Cincinnati and Baltimore, a line of about seven miles, running into the city of Cincinnati, are necessary to the Marietta and Cincinnati's business, and hence the court, at the time of the appointment of a receiver, ordered, among the first payments to be made, that of "the rent due or to become due to the Cincinnati and Baltimore Railway Company for the use of its tracks, and such other rents as are necessary to preserve the rights of the company in its leased property." This would include the lease also of the Baltimore Short Line railroad, about 80 miles long, constituting the Ohio end of the Marietta and Cincinnati road, the terms of the lease being the same in character as those of the Cincinnati and Baltimore. The Marietta and Cincinnati with their leased connections at each end constitute a first class through road, well built and equipped, and with proper rates for traffic has the prospect of much better results in the future.

### The Oil Trade.

The Oil City *Derrick* says that the amount of oil taken from the oil regions during the month of June exceeded the shipments of any previous month in the history of the trade, and then adds:

The total amount shipped by the different routes was 1,295,657 barrels of forty-two gallons each, including the shipment of refined, reduced to crude equivalent. This is about 73,000 barrels in excess of May shipments.

The following table exhibits the amounts shipped by the different routes for June, 1877:

| | Barrels. |
|---|---|
| By A. V. R. R. to Pittsburgh | 58,817 |
| Deliveries by the Columbia Conduit Company and Keystone Pipe Company to Pittsburgh | 135,918 |
| By Green Line to New York, Philadelphia, Baltimore and other points | 175,480 |
| By P., T. & B. R. R. to all points | 297,289 |
| By A. & G. W. R. R. east | 190,898 |
| By A. & G. W. R. R. west | 2,870 |
| By L. S. & M. S. R. R. to all points | 200,318 |
| By Shenango & A. R. R. from New Hope and Hilliards to Cleveland | 134,822 |
| From Bradford and Olean | 99,793 |
| Total shipments | 1,295,657 |

The following is a comparative statement of the shipments of the first six months of this and the two preceding years:

| | 1875. | 1876. | 1877. |
|---|---|---|---|
| January | 441,778 | 659,267 | 746,580 |
| February | 361,000 | 504,996 | 445,925 |
| March | 714,205 | 598,521 | 912,603 |
| April | 736,423 | 570,198 | 845,845 |
| May | 633,474 | 596,997 | 1,222,015 |
| June | 692,948 | 830,236 | 1,295,657 |
| Total | 3,597,778 | 3,775,215 | 5,468,105 |

From this it will be seen the shipments for the first half of this year exceeded those for the first half of 1876 by 1,692,890, barrels.

### Railroads as Educators.

A correspondent of the Atlanta Constitution says that Chancellor Tucker, of the University of Georgia, has taken three maps of that State, divided into counties, and has driven a peg into each county to represent every student from that county. It is noticeable from a cursory glance at these pegs, that the bulk of patronage of the college comes from along the railroads. In fact, the course of a railroad can be easily traced by the line of clustering pegs, showing the homes of the students that have gone to the University. In northeast Georgia, and in the portion of Southern Georgia not penetrated by railroads, 10 or 12 counties may be seen without a single peg in them, presenting a broad and dreary waste. No better argument than this could be given of the enlightening influence of the steam engine and the iron rail.

### Brooklyn and Coney Island Railroad.

During the past year the Coney Island, Park and Concourse Railroad Company and the Coney Island and East River Railway were incorporated under the General Railroad law of the State. The two roads were to run beside each other from Brooklyn to Coney Island. It has finally been agreed by the directors of the two companies to consolidate the roads, and an agreement to that effect, signed by the officers, now awaits the approval of the stockholders of each company. The stockholders of the respective roads will meet on the 10th and 15th of August to determine the matter. It is proposed that the route of the consolidated road be as follows: commencing on Atlantic avenue, between Classon and Franklin avenues, it will run between these to Washington avenue, near the entrance to Prospect Park, and then between Ocean Parkway and the Old Coney Island plank road, to a point on the island near Engeman's Hotel. The cost of the road is estimated at $300,000. Work on it is to be commenced within sixty days, the capital having already been subscribed. The locomotives are to be of full power and the road is to be of broad gauge, with steel rails and double tracks. In the populated portion of the city the road will run through an open cut, and sanction of the local authorities for the building of the road has been obtained, providing the company build suitable bridges at the street crossings. It has been decided to elect Hon. John A. Lott president of the company.

☞ Five new cars for the steam motor line, which is to be run next month from the Brooklyn City Railroad Company's depot, corner of Twenty-fourth street and Third avenue, along the latter thoroughfare to Fort Hamilton, are now being built at an average cost of $3,100. The cars, which make no noise and no smoke, can be stopped and started with greater ease than horse cars. They will run on fifteen minutes' headway, connecting with Fort Hamilton, a distance of four miles, in twenty minutes.

☞ The Supreme Court of North Carolina, in the case of Branch vs. the Wilmington and Weldon Railroad Company, decides that a common carrier is bound by the common law to convey goods, committed to him for that purpose, within a reasonable time, and on failure is liable in damages. It also declares that a common carrier, especially one having a monopoly, who invites public custom, is bound to provide sufficient power and vehicles to carry all goods which his invitation naturally brings to him.

☞ The traffic receipts of the Midland Railway of Canada for the week ending June 30, 1877, were: from passengers, $1975 30; freight, $5945 32; mails and express, $290 76—total $8211 38; Same week last year, $6661 55; increase $1549 83. Total traffic to date, $111,741 35; do. year previous, $125,153 67; decrease, $13,412 32.

# RAILROAD EARNINGS—MONTHLY.

# RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

# American Railroad Journal.

**Saturday, July 21, 1877.**

### Financial and Commercial Affairs.

The important financial event of the week was the success of the popular subscription to the new four per cent funding loan of the Government, the aggregate subscription to which loan was reported on Wednesday as about 68 millions at par in Gold. The negotiation did not make much of an impression on the money market, which was very well supplied with funds, giving the advantage as to rates to responsible borrowers, whose wants continued on a comparatively moderate scale. Call loans have been quoted here at 1@3, with most of the important negotiations reported on the basis of two per cent; and very choice to prime mercantile credits are rated at 3@5, mainly 3@4 per cent per annum. Some important amounts were reported as placed in the Street at 4 per cent, for specified periods, for Stock Exchange purposes. The City banks, last week, reported a decrease in their specie reserves, with an increase in their legal tender hoard, and a moderate enlargement of their circulation, thus reversing the movement of the preceding week. The loan and discount item was cut down moderately, and the deposit average also diminished. The loan and discount average shows a reduction of $871,100. The item of circulation was augmented $110,800, and of deposits reduced $2,140,800. The legal tender reserve was increased $362,200; and the specie average fell off $2,371,500.

The City banks reported their average of gold last week at $18,887,806, as against $22,440,100 same date last year; and their greenback average at $58,809,200, as against $54,677,500 on July 15, 1876. Their deposits stood at $229,088,800,

against $224,167,500 same time in 1876. The loan item was $252,452,700 against $252,961,100 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $20,424,925, as against $21,899,150 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $394,344,937, or a daily average of $65,724,156.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $49,702 787, against $48,308,694 the preceding week; and a coin board of $84,306,673, against $82,926,868 on the return of a week earlier. The Customs revenue of the port during the past week was $2,045,000.

The aggregate of the outstanding U. S. currency of all denominations, July 1st, was $381,684,573. The outstanding amount of legal tender notes is $359,764,332. The National bank circulation is now $315,285,277 of currency notes and $1,480,120 of national gold bank notes.

National Bank notes received at the Treasury Department last week for redemption were to the amount of $5,514,000.

The income of the Government from internal revenues last week was about three millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,732 in the preceding fiscal year; and from Customs last week about 2¼ millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $7,963,213; special deposit of legal tenders for the redemption of certificates of deposit, $57,780,000; Coin, $107,757,241, including of Coin certificates, $40,757,241.

Gold has been ruling stronger as to price, partly under the influence of the Treasury loan negotiations, and the probable bearing of the coin payments for the new loan on the course of Gold, in the open market, through the next few weeks. The speculative demand has been brisker. The Customs call has been rather more liberal. The export movement, however, has been light. The extremes of the price during the week have been 105¼@105⅞, closing at 105⅝, as against on Wednesday of the preceding week. The lowest point yet touched was 104¼, on Friday, March 2d. The specie outflow last week was only $213,630, making the total exports of specie hence since January 1, $20,576,886, against $34,279,930 the same time in the preceding year. The imports of specie at this port last week were confined to $3,919, and since January 1st have been $7,400,780, as against $2,441,630 same time last year. The Customs demand for gold last week averaged $340,834 per day. Foreign Exchange has been less sought after, at much lower rates, leaving off quite irregularly. Bankers' sixty day bills on London closed on Wednesday at $4 84¾@$4 85⅛; sight bills on London at $4 87@$4 88 to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,764,395 as against $5,871,584 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,296,134 of Dry Goods and $5,468,261 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $5,154,447, against $5,832,961 same week in 1876.

Government securities have been quite active and generally stronger though variable as to price. At the close the market was quoted as a rule firm, leaving off on Wednesday as follows:

United States currency sixes, 125½@125⅝; do. 6s, 1881, registered, 111@111⅛; do. coupon, 112@112¼; do. 1865, new, registered, 106¾@106⅞; do. conpon, 106¾@106⅞; do. 1867, registered, 108¾@108⅞; do. coupon, 108¾@108⅞; do. 1868, registered, 111@112; do. conpon, 111@112; do. ten-forties registered, 112¼@113¾; do. coupon, 113@113¼; do. five per cents 1881, registered, 110@110¼; do. coupon, 111¼@111½; do. 4½ per cents, 1891, registered, 108¾@109; do. coupon, 108¾@109.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $336,827,400, and $18,857,000 as security for public deposits.

State and Railway bonds have been in moderate demand and quoted generally firm, in the instance of the more substantial loans which have been generally offering less freely. And in the line of Railway and Miscellaneous share property business has been fairly active but at reduced prices, in many instances leaving off irregularly.

More activity has been noted in general business, especially in Breadstuffs, but prices have fluctuated considerably closing as a rule more steadily. Further free dealings have been reported in No. 2 Red Western (Winter Wheat), new crop, and N. Y. No. 2 Spring for forward delivery, chiefly on export account. Petroleum has advanced on a light offering for early delivery. Foreign merchandise has been in moderate demand, with values showing no radical changes.

Hardware and Boots and Shoes have been attracting rather more attention, while Dry Goods have been in better demand with prices quoted as essentially unaltered.

A moderate movement has been noted in the line of Metals, with prices quoted barely steady. Eglinton Pig Iron quoted at $25 50; Glengarnock $27 50; Coltness $28 50 @$29; No. 1 American Pig at $18@$19; No. 2 do. at $17@$18; Forge $16@$17; American Rails at works $32@$35; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$48 at the mills. Ingot Copper quoted 19@19¼ for early delivery.

Ocean freights have been much stronger, as a rule, and quite active. Grain room on berth and charter more urgently sought after. The Continental steam lines, including Antwerp, Bremen, Hamburg, and Rotterdam, have most of their room for Grain for August and September shipment already under contract, for the new crop, at materially advanced figures, closing for Antwerp, and Rotterdam, for August and September shipment, at 10@10½d. per bushel. Liverpool steamer rates at the close for Grain, 5½@6d. per standard bushel. Provisions, 20s.@45s.; Tallow, 20s.; Leather, 25s. Measurement Goods at 12s. 6d.@17s. 6d. per ton; Cotton, 3/16d.@7/32d. per lb., Liverpool, by sail. Cotton, 1/8d. Grain, 5½d. Oil Cake and Slate, 10s.@12s. 6d.; Measurement Goods 10s.@15s.; Tobacco 25s. Grain rates on charter hence for Cork and orders left off at 5s.@5s. 6d. for the Continent, at 5s. 6d. @6s. and from Baltimore for Cork and orders, 4s. 6d.@5s. 3d. as to time of loading and from Philadelphia at 3s. 9d.@4s. per quarter. Refined Petroleum hence for Cork and orders, 3s. 9d.@4s. for the Continent, 3s. 6d. @4s. per bbl. And for Liverpool by steam, from Chicago, of through freight, Provisions, at 45@50c. via Boston, per 100 lbs.

# FISK & HATCH,

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Illinois Central Railroad Company, New York, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

### Lightning Rods—Theory versus Practice.

Whatever differences of opinion may exist in regard to the theoretical principles which underlie the construction of lightning rods, there can be no doubt about the fact that a good rod of any kind, well arranged and faithfully put up, as regards ground connections, etc., is infinitely superior to a rod of the best theoretical design, carelessly erected; consequently those who wish to feel safe, ought by all means to employ trustworthy and intelligent parties to do their work. A long acquaintance with Mr. West, of Cortlandt street, New York, has convinced us that although we do not entirely agree with him upon certain points connected with the construction of rods, yet that Mr. West puts up a good and reliable protector, from the fact that whatever he does is done honestly and well.—*Amer. Journal of Microscopy.*

### Redemption of Five-twenty Bonds.

The Secretary of the Treasury on the 16th inst. issued the fifty-first call for the redemption of five-twenty bonds of 1865—known as five-twenty bonds of the act of March 3, 1865, (consols of 1865.) The call is for $10,000,000, of which $7,000,000 are coupons and $3,000,000 registered bonds. The principal and accrued interest will be paid at the Treasury of the United States in the city of Washington on and after the 16th of October, 1877, and interest will cease on that day. The bonds designated are as follows:

Coupon bonds—Dated July 1, 1865, namely: $50, No. 17,001 to No. 24,000, both inclusive; $100, No. 29,001 to No. 40,000, both inclusive; $500, No. 27,001 to No. 34,000, both inclusive; $1,000, No. 52,001 to No. 64,000, both inclusive. Total coupon, $7,000,000.

Registered bonds—Redeemable at the pleasure of the United States, after the 1st day of July, 1870: $50, No. 701 to No. 900, both inclusive; $100, No. 6,401 to No. 8,550, both inclusive; $500, No. 5,201 to No. 6,150, both inclusive; $1,000, No. 16,501 to No. 19,850, both inclusive; $5,000, No. 5,051 to No. 5,900, both inclusive; $10,000, No. 4,478 to No. 5,354, both inclusive. Total registered, $3,000,000.

The amount outstanding included in the numbers above is $10,000,000. All United States bonds forwarded for redemption should be addressed to the "Loan Division, Secretary's Office," and all registered bonds should be assigned to "The Secretary of the Treasury for redemption." Where parties desire checks in payment for registered bonds drawn to order of any one but the payee, they should assign them to the Secretary of the Treasury for redemption on account of the owner or owners.

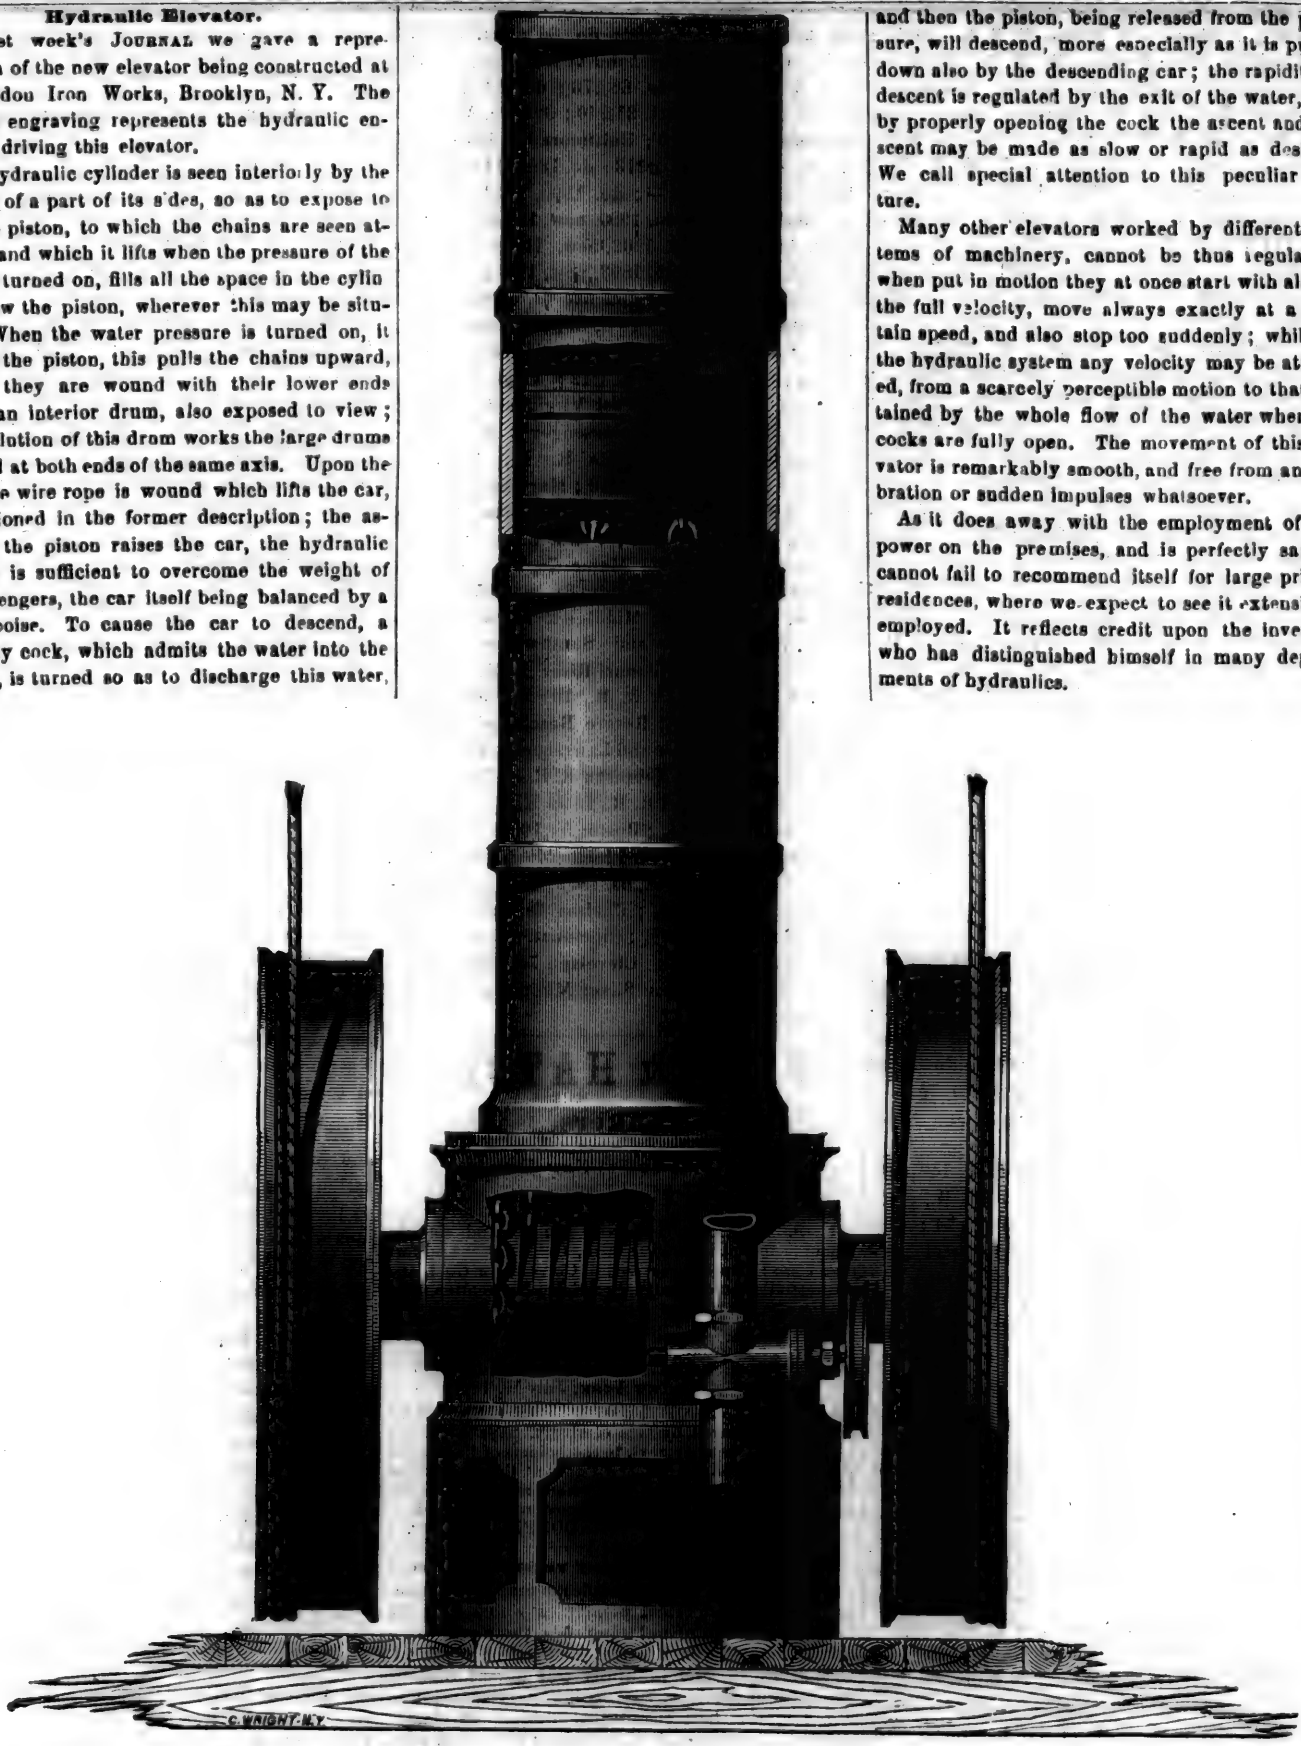
☞ At a meeting of the directors of the Erie and North Shore Dispatch Company, being the various fast freight lines consolidated, at Detroit on the 13th inst., the report showed that 528 more tons were carried in the past six months at $27,000 less expense. Several other railways are desirous of becoming members.

☞ The Paducah and Elizabethtown (Ky.) Railroad is said to be prospering well under Gen. Minty's management. Recently 7,000 new ties have been put down and seven miles of steel rails laid, and it is proposed to work in steel gradually all along the route.

☞ The town of Sherbrooke, Canada, has voted, at a public meeting, by 51 to 19, to grant $25,000 as a free gift to the Waterloo and Magog R. R. Co., on condition of their building that road to Sherbrooke.

☞ The directors of the Portsmouth, Gt. Falls and Conway Railroad, elected on the 10th inst., are: Alfred P. Rockwell, Samuel C. Lawrence, Robert W. Hooper, Jas. W. Johnson and George W. Burleigh.

☞ Samuel Sloan has been re-elected President, and H. B. Ledyard General Manager of the Michigan Central Railroad Company.



### Hydraulic Elevator.

In last week's JOURNAL we gave a representation of the new elevator being constructed at the Burdon Iron Works, Brooklyn, N. Y. The annexed engraving represents the hydraulic engine for driving this elevator.

The hydraulic cylinder is seen interiorly by the removal of a part of its sides, so as to expose to view the piston, to which the chains are seen attached, and which it lifts when the pressure of the water is turned on, fills all the space in the cylinder below the piston, wherever this may be situated. When the water pressure is turned on, it elevates the piston, this pulls the chains upward, and as they are wound with their lower ends around an interior drum, also exposed to view; the revolution of this drum works the large drums attached at both ends of the same axis. Upon the latter the wire rope is wound which lifts the car, as mentioned in the former description; the ascent of the piston raises the car, the hydraulic pressure is sufficient to overcome the weight of the passengers, the car itself being balanced by a counterpoise. To cause the car to descend, a three-way cock, which admits the water into the cylinder, is turned so as to discharge this water, and then the piston, being released from the pressure, will descend, more especially as it is pulled down also by the descending car; the rapidity of descent is regulated by the exit of the water, and by properly opening the cock the ascent and descent may be made as slow or rapid as desired. We call special attention to this peculiar feature.

Many other elevators worked by different systems of machinery, cannot be thus regulated; when put in motion they at once start with almost the full velocity, move always exactly at a certain speed, and also stop too suddenly; while by the hydraulic system any velocity may be attained, from a scarcely perceptible motion to that obtained by the whole flow of the water when the cocks are fully open. The movement of this elevator is remarkably smooth, and free from any vibration or sudden impulses whatsoever.

As it does away with the employment of any power on the premises, and is perfectly safe, it cannot fail to recommend itself for large private residences, where we expect to see it extensively employed. It reflects credit upon the inventor, who has distinguished himself in many departments of hydraulics.

## HYDRAULIC ELEVATOR.

### AS CONSTRUCTED AT THE BURDON IRON WORKS, BROOKLYN, N. Y.

## BOOKS AND MAGAZINES.

A Practical Treatise on Lightning Protection, by HENRY W. SPANG. With Illustrations. Philadelphia: Claxton, Remsen & Haffelfinger. 1877.

One of the truest statements in this book is that persons heretofore engaged in the business of manufacturing and erecting lightning conductors have not made any effort to obtain a proper knowledge of the electrical science, and hence have not constructed and applied lightning rods in a proper scientific manner. Their object has, apparently, been to make money, rather than afford protection from lightning. Of this fact the public have been and are well informed by manufacturers who construct and erect reliable lightning rods. Hence the want of faith in any device which is put forward as a patented article, and requires a whole book to show the fallacy of many plans for lightning protection and the efficiency of a new one.

The author claims to have had a long practical experience in the telegraph business, and has considered himself fully competent to compile a work on lightning rods, &c. The book commences with information on electricity much of which, if not all in substance, may be found in Weil's Natural Philosophy and other elementary works on electricity, and closes with a chapter on "Reform in the Lightning Protection Business," which is undoubtedly original. But other works are drawn upon for statements and illustrations which the author by not crediting the writers would have the reader consider as his own production. The little practical work, entitled "Lightning Rods and how to construct them," by John Phin, C. E., a book written in 1873, not in the interest of any patent or special manufacture has proved useful to him, and we are pleased to think he quotes such good authority. Knights Mechanical Dictionary, page 1318, has proved equally valuable to him. It is customary, and indeed frequently necessary, for authors to make excerpts from other writings; a recognition of the book or the author by naming the one or the other is a courtesy which the author of this work on Lightning Rods does not seem willing to grant.

## Eastern (N. H.) Railroad.

The following is an extract from the report of the directors of the Eastern Railroad in New Hampshire, presented at the annual meeting of the stockholders held in Portsmouth on the 10th inst.:

It is nearly a year since you, at the annual meeting of the Eastern Railroad in New Hampshire, July 11, 1876, saw fit to elect, by a unanimous vote, the undersigned as officers of your corporation. You deemed it wise to select for your officers persons who were free from all interest in the Eastern Railroad Company of Massachusetts. Your directors continue uninterested financially in the affairs of the Massachusetts Company, but watchful regarding the same wherever your interests are concerned.

Various previous attempts to change the management of your company had proved unsuccessful; and your corporation, a twelvemonth since, was, as for many years it had been, under the practical control of the Eastern Railroad Company of Massachusetts. So completely was this the case, that when, many years since, some of your shareholders, believing that the Massachusetts Company was not fulfilling its agreements under the lease of 1840, sought to obtain an authoritative decision on those points, not only were obstructions thrown in the way of their endeavors, but after these same stockholders, at the end of a long and doubtless costly suit at law, succeeded in fully establishing, under decisions of the Supreme Court of the State of New Hampshire, all that they had claimed as rightfully yours, the then directors of your road, who themselves were allied officially or otherwise with the Massachusetts Company, surrendered at once (if their action was lawful) by what is known as the contract or lease of 1862, all that had been gained by these years of labor on the part of individual stockholders of your road.

Under this lease or contract it is claimed that you are entitled to no income whatever for the use of your property, except and when the Massachusetts Company shall make a dividend to its own stockholders, and then only to the extent of the dividend which may be made by that company to its own shareholders; and it is claimed that these condition exist until the termination of the contract of 1840, that is, until A. D. 1939.

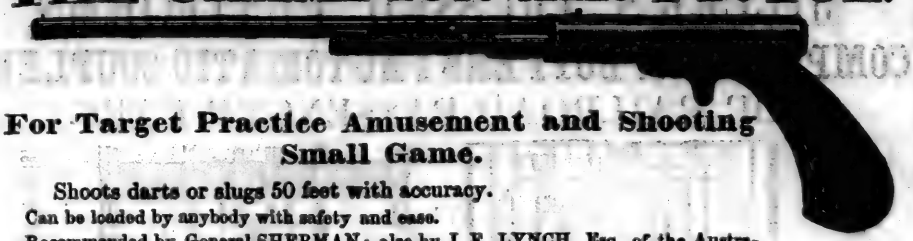
Your directors could not for an instant concede the correctness of the position taken by the Eastern Railroad Company. At the same time, both as directors of your road, and as watchful of the public welfare, they recognized that the control of the transportation over your road was desirable for the better management of what the Massachusetts Company call, and seek to make of their own and connecting roads—a great through route to the eastward. If this desire on the part of the Massachusetts Company could be accomplished and at the same time there could be secured to you an equitable income from your property and the enjoyment of your corporate rights, free from the domination of another, and in some respects antagonistic corporation, mutual good would be accomplished.

Your directors, immediately after their election, addressed themselves to this end, and stated to the officers of the Eastern Railroad Company their desire to adjust any matters of difference between the two corporations by negotiation, rather than by the more dilatory and less agreeable means of processes of law. Your directors report, with sincere regret, that their efforts, which were continued, notwithstanding various delays interposed by the Massachusetts Company, for nearly six months, failed of success, and that they were compelled to seek relief by measures at law.

* * * * * * * * *

Your directors believe that both law and equity, as well as common sense, will sustain them in their efforts to break the hold which the Eastern Railroad Company claims to have upon your property for a term longer than two generations to come; and their efforts will be faithfully and persistently continued to this end.

Regarding the Eastern Railroad Company, which derives its charter from the State of Massachusetts, it may be said that it owns less than forty-two miles of main track and less than seventy-seven miles of branches in that State; of which branches, according to the reports of its officers, only thirty-five miles are considered to have been judicious investments, or to yield directly or indirectly a profit; while thirty-seven miles are year by year run at a loss, causing a continuous drain upon the other resources of the company. As regards the results of the business over the other five miles of branches, no data is given in the reports. It may be added, that, outside of its investments in Massachusetts, that company virtually owns the Wolfborough Road in New Hampshire, twelve miles in length; which road, according to the Eastern Railroad Company's reports, "is a failure, and its operation an expense." The road also owns the equity of the Portsmouth, Great Falls and Conway Railroad, another road whose net earnings are not nearly enough to pay the interest on its bonded debt, according to the same reports. Besides these, it has invested more than twelve hundred thousand dollars in the purchase of more than a third of the stock of the Maine Central Railroad Company; a corporation which, to say the least, has not yet had occasion to consider the subject of a dividend. The same company has also expended substantially two and a half millions of dollars in providing ground upon which it may establish "suitable terminal facilities" at Boston; a sufficient commentary upon which is the fact stated in their own words, that "the single freight house now standing on the Austin street property has abundant capacity for all the freight we are now receiving there, and for all that can be reasonably expected to arrive there for a term of years."



The Eastern Railroad Company has changed its position since 1868, from one of financial ease and comfort—paying easily the interest, and retiring year by year a portion of the principal of its debt, at the same time paying dividends to its shareholders—to one where it has increased its capital until it aggregates nearly five millions of dollars, where it has increased its debt until it nearly or quite reaches fifteen millions of dollars; these liabilities together, if averaged over its forty-two miles of main track in Massachusetts, exceeding $475,000 a mile; or, if averaged over that portion of its parent road and branches which it claims as yielding a profit, exceeding $250,000 a mile; or, if averaged over all the miles of road in Massachusetts or elsewhere of which it owns the fee or equity, equaling substantially $100,000 a mile. The officers of the road acknowledge by a late report that the road has suffered, by actual and estimated losses, to the extent of nearly eight and a quarter millions of dollars. They state its net earnings for the last financial year at less than $684,000, while its requirements to pay the interest on its mortgage debt, at the low rate of 3½ per cent, gold, and the interest on rentals of leased roads, very much exceed this amount. This current yearly deficit will be largely augmented when the terms for paying 4½ per cent and 6 per cent interest on its mortgage debt shall arrive.

Of the Eastern Railroad in New Hampshire we may say that it is a road important in itself, though of far less pretensions or magnitude than the Massachusetts road, being not quite seventeen miles in length, having a share capital of less than five hundred thousand dollars, with no funded debt, and with a floating debt of less than five hundred dollars. Nearly half of its capital is held in New Hampshire, and a very large part of it by those who have an interest in the Massachusetts road. Its liabilities for capital and debt average less than thirty thousand dollars a mile. Regarding its earnings all information is denied us by the Eastern Railroad Company; but your directors are sufficiently well-informed to say that they will yield an entirely satisfactory return if they can be secured. Your directors readily admit that there are many and serious difficulties which stand in the way of our enjoyment of our own; but, were the Eastern Railroad Company to show a disposition for an amicable settlement, these difficulties would vanish. We can demonstrate the value of our road, and that year by year it is yielding to the Massachusetts Company a net return of tens of thousands of dollars.

That a road in the condition which the Massachusetts Company is shown to be; a road which has almost practically destroyed itself, and is not likely in the life-time of any person now in its management to pay a dividend upon its capital stock—that such a road should seek to retain the control of your road for more than sixty years to come, without yielding any rental therefor, save the possibility of a dividend when it shall pay one to its own shareholders, a contingency few if any dream as ever likely to occur again—is more than your directors think they or you are required by reason, law or common sense to expect.

☞ A new survey of the projected Narrow Gauge Railroad to Cape May is about to be made. This will be with a view to make the road a straight line from Camden to Goshen, and from there a straight line to Cape May. This will leave Millville and Port Elizabeth about four miles to the west of the road, and run through the old Cumberland Furnace tract.

# THE CHAMPION AIR PISTOL.

**For Target Practice Amusement and Shooting Small Game.**

Shoots darts or slugs 50 feet with accuracy.

Can be loaded by anybody with safety and ease.

Recommended by General SHERMAN; also by J. F. LYNCH, Esq., of the Australian Rifle Team.

PRICES.

Black.....$5 00. Nickel Plated.....$6 00.
Nickel Plated Rosewood Handle..... ... 7 00.

Each pistol is put up in a neat box with a skeleton gun stock, 6 Darts, 100 Slugs, 6 Targets, a Ramrod, Claw and Wrench.

Sent by Express C. O. D., or by mail at the risk of parties ordering, on receipt of price, and 40 cents additional for postage.

POPE MANUFACTURING CO.,
45 High St., Boston, Mass.

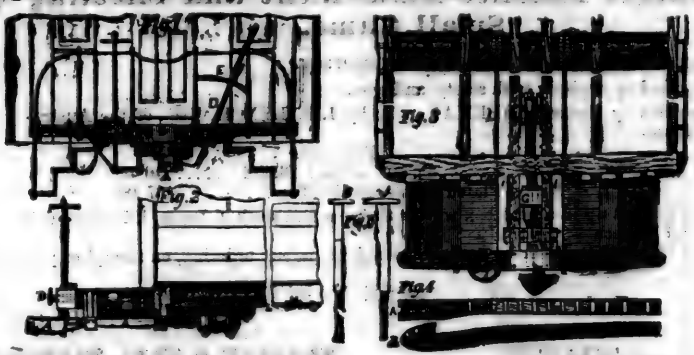
Reliable stock privileges negotiated at favorable rates. Stocks bought and carried as long as desired on deposit of three to five per cent. Circulars and weekly reports sent ly23

### A Mechanical Horse.

An ingenious gentlemen of Berlin, Herr Frederich Netzsch, has invented a horse. The animal is made of iron, and the motive power, instead of being its own legs, is derived from the legs of the rider. The iron horse, as the Berlin papers calls him, showed off his paces the other day in the garden of Hagan's Summer Theater, in the presence of the leading mechanics and journalists of the German capital. The concern is described as consisting of two wheels, two meters high; between these "finds itself" the horse, upon which mounts the rider. The latter moves his legs "after the English fashion of riding," (this means, we presume, that he rises and falls in his saddle) and the thing goes along as fast as a quick trotting horse. The road makes no difference—it is all the same whether the machine goes gently over the stones or moves swiftly on the hard highroad—and the facility with which the strange steed turned around corners excited the admiration of all beholders. Herr Netzsch believes that his invention will be of great use to porters and others for the carrying of light loads, and he has confident hopes that it will be highly appreciated by the numerous classes who are fond of saddle exercises but are destitute of the wherewithal to buy and maintain horses of flesh and blood; he contemplates, too, its application to the drawing of cabs and other carriages. It is even conceivable that in this invention we have the charger of the future. An animal that does not eat and cannot die would be of inestimable value in warfare. There are one or two other significant omissions in the description from which we quote. We are not told how a man of flesh and blood is expected to support the fatigue of moving, by riding in his stirrups, a creature of iron, or if it be possible, to keep it going in any place less flat than Berlin, a city which, as everybody knows, is as level as a billiard board.—*Geneva Continent.*

### The Coal Trade.



For the week ending on the 7th instant, the total tonnage, as reported by the several carrying companies, amounted to 359,285 tons, against 182,383 tons in corresponding week last year, an increase of 176,972 tons. The total amount of anthracite mined for the coal year is 10,172,016 tons, against 7,881,679 for same period last year, an increase of 2,290,337 tons. The quantity of bituminous coal sent to market for the week was 53,780 tons, against 61,868 tons for corresponding week last year, a decrease of 8088 tons. The whole bituminous tonnage from the beginning of the coal year is 1,625,036 tons, against 1,679,549 tons in corresponding time last year, a decrease of 54,513 tons. The total tonnage of all kinds of coal for the week is 413,065 tons, against 244,181 to corresponding date last year, an increase of 168,884 tons, and the total tonnage for the coal year is 11,797,052 tons, against 9,561,228 tons to same date last year, an increase of 2,235,824 tons. The receipts at Perth Amboy for the week ending on the 7th instant were 24,404 tons, the shipments 21,881 tons, leaving a stock on hand of 131,349 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week in June was 85 269 tons of which 69,278 tons were coal, and 15,991 tons coke. The total carried for the year is 3,317,868 tons, of which 1,181,300 tons were coal and 446,798 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, July* 16.

☞ The Western Counties Railway Company, of Nova Scotia, have lately purchased rolling stock for the Windsor Branch and will begin working that line on the 1st of August, at which time it is to be delivered to the company by the Dominion Government.

☞ Experiments are being made in Paterson, N. J., with oil as fuel for locomotives. It is claimed that it will answer the purpose, and that locomotives can be run at one-fourth the expense by this means.

## American Railroad Journal.

New York, Saturday, July 28, 1877.

### The Coming Fair of the American Institute.

The forty-sixth exhibition by the American Institute will be held next fall, it being proposed to open the same on September 12th. The present indications are that it will surpass all previous ones given by this Institute. We have frequently heard statements, by both exhibitors and non-exhibitors, that these New York expositions of arts and manufactures were capable of improvement and additional attractions which would render them still more popular, instructive and interesting.

We are well aware of the wish and efforts on the part of the trustees and managers to have their expositions creditable and successful, but after giving ample space and facilities to exhibitors and arranging the various departments in systematic order their duties are limited, and much depends on the interest shown by manufacturers and those who can make exhibits. We but express the opinions of many others when we state that hitherto there has been too much sameness in these expositions. Every year we find the same articles, the same show cases, in the same place. They might never have been removed. The thing needed seems to be general expansion. It is pleasant to see a beautiful display of dry goods, and house furniture, but far more instructive to observe the mechanism of a loom in operation, and the processes employed in the manipulation of materials. We should like to see more works of art there; paintings, and artists at their easel; porcelain and pottery, and the potter's wheel in motion; statuary and sculpture, and the sculptor at work; in short to relieve the monotony of a perpetual exhibit of goods, many of which can always be seen on Broadway, processes of importance in science and the arts should not only be exhibited but explained. Glass blowing and scroll-sawing and sewing machines and the making of candies and sweetmeats are all very well in their way, but is it not quite practical and possible to get higher and above these? From the workshops and manufactories of this great city there should come forth to public view numerous inventions and improvements of a practical character, as yet but little known and understood, specimens of skill and workmanship by apprentices, products of manual dexterity as well as of automatic machinery.

While there has been no lack of steam engines, pumps and jig saws at these exhibitions, there have been but few exhibits pertaining strictly to railways and railway plant. Models of improved steam and horse cars, and specimens of iron and steel plates, rails, and tires, improved link motions, automatic signals, and switches, etc., these and such as these might very properly be placed in a railway department. The master mechanics of our railways as a class are men of practical knowledge and superior intelligence—who are continually introducing improvements quite original with themselves. If so disposed they could add much to show the progress made in railway construction and machinery. Again every year these industrial expositions should be made more attractive and valuable by exhibits from those possessing rare works of art whether of home or foreign production. At any rate we hope this year to see manufacturers respond more generally to the invitation of the managers in sending choice articles as well as valuable products, that the exposition may be one of science and art as well as of commercial and industrial enterprise.

### Ventilation—A Simple and Useful Appliance.

We are aware that the subject of ventilation has become hackneyed and thread-bare by incessant repetition in newspapers, books, lectures and scientific publications. Still it is none the less important, and that it is habitually ignored by thousands of otherwise sensible people is our excuse for calling attention to a simple appliance applicable to buildings and residences of every description and class.

After all that has been said and written, the many plans and devices tried and experimented with, one fact cannot be stated too frequently; it is this. Every breath we draw, every lamp that burns, every fire that warms us, consumes the life-giving oxygen, the vital air of the atmosphere. If it is not replenished by constant ingress from the stores of nature, we must grow dull, pale, weak, inert, and finally succumb to disease and death. This want of proper ventilation exists to a fearful extent at the present day, and with all the intelligence we can boast of still this subject is imperfectly understood and sadly neglected. Men complain of foul air in insurance offices and banks, in railway stations and cars, in theatres, churches, and places of indoor amusement; judges are so loud in their denunciations of court room ventilation, that elaborate and expensive arrangements sometimes tried, prove failures, and the state of the rooms is worse

than at first. We maintain that any appliance repeatedly tried and successfully used for ventilation purposes should have the attention of all who are interested in good ventilation, and consequently in the healthfulness and comfort of their homes. At the present season when the summer heat is so oppressive, and all classes seek to obtain pure air, what is the common practice? Sweltering in the heat, they open doors and windows. This not only lets in the dust, but with the current disturbs the upper strata of air, which, because of its super-heat, has ascended above doors and windows, and brings it down upon the perspiring victims below like the hot blast from a furnace. Now, if they would provide a sufficient open-

HYNES' PATENT VENTILATOR.

ing at the highest part of the room or building, connected by a pipe or flue leading upward to a storm-proof ventilator on the roof, so made that every breeze would set it acting like a pump to suck up the heated and vitiated air from below, it would add immensely to both comfort and health. Ventilation in cold weather requires a more elaborate arrangement.

The Hynes' Patent Ventilator, represented here, we happen to know as a good one, and is manufactured by West & Cannon, 40 Cortlandt street, New York.

### Connecting Railroads in California.

The completion of the railroad between Oakland and Bantas, by way of Martinez, in October, will have many effects besides saving time to passengers and expense to the Railroad Company in the trip between San Francisco and Sacramento. The Strait of Carquinez will be a central crossing-point for the most important iron tracks in the State. The Silver Gate, as it has been called, can see every boat and car that passes between the ocean and the interior. The roads from Arizona, Oregon, Utah, the Salina Valley and Russian Valley will there converge and diverge. Benicia and Vallejo on the north bank of the Strait, and Martinez on the south, will feel the beneficial effects of the concentration of channels of communication in their neighborhood. The greater part of the grading for the extension of the Petaluma Valley Railroad to San Rafael has been done, and the rails could be put down within two months if great inducement were offered for haste. Twenty miles more of track, between Petaluma and Vallejo, would connect all the railroads more than ten miles long in California in one system. Such a connection would be of much benefit to the region north of San Pablo Bay, and must be completed at no distant day.

The dismissal of the suit commenced four or five years ago, by certain German bondholders, to throw the California Pacific Railroad Company into bankruptcy, is the result of the final adjustment of the matters in controversy, in accordance with the compromise, and the result will be harmony between the Central Pacific and the California Pacific. The railroad between Vallejo and Sacramento will, we presume, be improved, so that swift time can be made between this city and the Capital; the road between Knight's Landing and Marysville, if newspaper report be true, will be rebuilt; and the road on the west side of the Sacramento river will be extended from Williams northward to Red Bluff. These improvements are not to be expected this year, but they are indispensable to the completeness of the railroad system of the State.—*Alta California, July* 16.

### Philadelphia and Atlantic City Railway.

We have been favored with a copy of the time-tables of this road. The first train was run on the 7th of July, leaving Camden, N. J., at 2 p. m. A delay of two hours was experienced at Tansboro while the last quarter of a mile of track was being laid. One and three-quarters mile of track was laid on that day by one gang. The road was commenced about the first of April of this year, was opened for business July 14th, and on the 21st eight additional trains were put on. The work is very incomplete as yet, but a short time will suffice to give the whole line a solid build—second to no road in this country for safety, speed and comfort.

### Cleveland, Mount Vernon and Delaware Railroad.

The earnings of the Main Line and Massillon Branch for the years ending December 31, 1875 and 1876, were as follows:

| | 1875. | 1876. |
|---|---|---|
| From passengers | $138,540 57 | $133,849 67 |
| " freight | 254,868 99 | 209,952 42 |
| " express | 12,520 00 | 12,520 00 |
| " mails | 17,561 43 | 14,630 78 |
| " miscellaneous | 3,036 08 | 2,629 73 |
| | $426,027 07 | $373,582 67 |
| Expenses, viz: | | |
| Conducting transp. | $66,818 48 | $69,670 35 |
| Motive power | 89,870 23 | 80,009 20 |
| Maintenance of way | 94,430 39 | 92,738 53 |
| Maintenance of cars | 38,843 30 | 25,756 45 |
| General expenses, including taxes | 49,403 15 | 41,875 69 |
| | $338,360 55 | $310,050 22 |
| Net earnings | $87,666 52 | $63,532 38 |

Against which are the following charges:

| | | |
|---|---|---|
| One year's rent of Massillon Branch | $20,000 00 | |
| One year's interest on so-called Cass and Marvin bonds | 398 99 | |
| One-half year's interest on first mortgage bonds, including premium on gold, according to contract with bondholders | 87,073 24 | |
| One year's interest on coupons funded, including premium on gold | 16,313 45 | |
| Commission to agent of bondholders | 516 98 | |
| | | 124,302 66 |
| Deficiency | | $60,770 28 |

The deficiency has been, in part, supplied from the cash resources of the company other than those derived from earnings, leaving due on the 1st of January, 1877, on account of the payments then matured under the contract with the bondholders, the sum of $28,850 49.

The results of operating the Massillon and Cleveland Railroad were:

| | 1875. | 1876. |
|---|---|---|
| Earnings | $22,439 84 | $15,493 54 |
| Expenses | 16,496 54 | 16,687 72 |
| Net earnings | $5,943 30 | |
| Deficit | | $194 18 |
| To which should be added the minimum rental | | 20,000 00 |
| Total loss | | $20,194 18 |
| The loss in 1875 was | | 14,056 70 |
| Increase | | $6,137 48 |

The main line of road is 144.04 miles in length, extending from Hudson to Columbus. To which add track of Pittsburg, Cincinnati and St. Louis Railway, and Baltimore and Ohio Railroad, necessary to reach Union Depot, Columbus, not owned by this company, 0.38 mile; also, length of Massillon and Cleveland Railroad, from Clinton to Massillon Junction, on the Pittsburg, Fort Wayne and Chicago Railway, leased, at a rental of 40 per cent of gross earnings, 12.50 miles—making total miles operated, 156.92. Also, Dresden branch, incomplete, from Kilbuck Station, 6 miles south of Millersburg, to Dresden, Ohio, on the Pittsburg, Cincinnati and St. Louis Railway, where it will connect with the Cincinnati and Muskingum Valley Railway, 34 miles.

The equipment of the road in use, Jan. 1, 1877, consisted of 20 locomotives, 13 passenger, 8 baggage and express, 68 box, 5 stock, 525 coal and 10 caboose cars.

Tons of local freight carried in 1876, 144,981; foreign freight, 61,985—total, 206,966, against 238,899 in 1875, a decrease of 31,933. Total mileage of freight, 9,868,004. Av. rate per ton per mile, 2.13 cents. Cost, 1.98 cents.

Number of local passengers carried in 1876, 247,117; foreign, 5,360—total, 252,477, against 253,343 in 1875, a decrease of 866. Total mileage of passengers 4,536,317. Av. rate per passenger per mile, 2.95 cents. Expenses, 2.53 cents.

Mileage of trains: freight, 191,556; passenger, 179,698, other, 15,500—total, 386,754, against 406,942 in 1875, a decrease of 20,188. Earnings per mile run by trains, $1 00.63; expenses 83.51—net earnings, 17.12, against 22.53 in 1875.

The proportion of earnings absorbed by expenses was 82.99 per cent, against 79.42 in 1875.

During the past year the work of ballasting, and renewal of cross ties has been prosecuted, which will be continued during the present year. A larger amount of new iron rails will also be required this year. Nearly the whole of the rails in the track between Marshallville and the Holmes County Coal Co. track, a few miles south of Millersburg, have been in use over 20 years, and need renewal. The company have new and commodious shops at Mt. Vernon for the repair of equipment, but they are not supplied with the requisite machinery. About 10 miles of fencing were constructed during the year, leaving upwards of 51 miles yet to be built. An addition of 431 feet was made to the side tracks on the main line, and 80 feet on the Massillon branch.

An addition of 10 stock cars and 20 box cars should be made to the equipment, and the con-

tract with the bondholders contemplated such an increase. It is hoped some arrangement may be made by which these cars may be had this year.

The total amount of stock subscriptions collected during the year was $2,888 60. The total amount uncollected, but considered good, is $7,200. The report says:

The expectations indulged in by your directors at the time the contract was made with the bondholders, in 1874, under which one half the amount of certain coupons from the bonds of the company was funded, and the remaining one-half, together with annual interest on the portion funded, was to be paid in cash, have not been realized as to the ability of the company to carry out the provisions of that agreement. Instead of the revival of business so generally looked for during the past two years by all industrial classes, universal depression has continued to exist, particularly in the mining and manufacturing interests, on the prosperity of which the business of your road is so largely dependent. The result has been a loss in the earnings so great as to preclude the probability of the company retrieving itself under the present arrangement with the bondholders. The payment due them July 1, 1876, was made by availing ourselves of the company's credit to limited extent; but that due January 1, 1877, has only been partially met. The amount due at the latter date was:

| | | |
|---|---|---|
| One half the amount of coupons due January 1, 1877, surrendered to the Trustees at Amsterdam, in gold | $39,693 50 | |
| One years' interest at 7 per cent., in gold, on the portion of coupons funded | | 15,281 94 |
| Commission, ½ per cent., on $54,975 44 | | 274 87 |
| Total, in gold | | $55,250 31 |
| Add, say 7 per cent. premium | | 3,867 53 |
| Total, in currency | | $59,117 84 |

Of this amount there was paid $30,767 35, leaving $28,350 49 still due on this account.

An informal proposition has been made to the bondholders for a complete reorganization of the company, on such a basis as would insure hereafter a prompt payment, from time to time, of the fixed liabilities of the company for interest on its bonds. The bondholders, however, while not waiving any of their legal rights in the premises, have preferred that the status of the company and its property should remain as at present, till such time as the future results in operating the road may lead to the formation of a more reliable judgment in regard to its productive capacity. Your directors are also of the opinion that this course will be most beneficial to all parties. The bondholders will continue to receive all the net earnings of the road, unless otherwise agreed with their representatives, and they and the company saved the expenses that would be attendant upon litigation.

No particular change has occurred in the condition of affairs connected with the Dresden Branch, since the last annual report. Several meetings of persons interested in the completion of this work have been held in the neighborhood during the past year, but no practical results have been reached. The different interests to be benefited by the building of this road have not yet become awakened to the absolute necessity of greatly increased contributions to the stock capital of the company for this purpose, beyond the amount heretofore subscribed. In this connection, your directors would express the opinion that the present proprietors of the company, both bondholders and stockholders, have a large interest in the completion of the Dresden Branch, for such completion would assuredly add much to the value of the Main Line. Till a unity, however, of conviction and purpose on this subject, among all parties interested, shall have been reached, no definite steps can be taken by your directors for the consummation of the enterprise.

INCOME ACCOUNT, Dec. 31, 1876.

| | | |
|---|---|---|
| Balance to debit Dec. 31, 1875 | | $128,170 66 |
| Interest on first mortgage bonds, and premium on gold for same | | 168,561 80 |

President.—THOMAS D. MESSLER.

Directors.—Thomas D. Messler, William Thaw, Geo. B. Roberts, D. W. Caldwell, Samuel Israel, Charles Cooper, Wm. M. Orr, Isaac Harpster, Mardenbro White.

Superintendent.—G. A. JONES.

Treasurer.—J. D. THOMPSON.

Auditor.—E. MIZE.

Secretary.—JOSEPH S. DAVIS.

☞ The Geneva (N. Y.) Gazette says that never in the history of agriculture in this State did crops give promise of a better yield than that of this present season. The hay crop is mostly secured in good condition, and it is abundant. Wheat is ready for the harvest—many fields already cut. The heads are well filled, straw stout. Few fields will yield less than twenty bushels to the acre—many, we believe, will produce thirty-five to forty bushels. The growing barley and oats look fine and stand very thick in the fields. Corn is coming on splendidly. The potato vines look healthy and vigorous. Farmers planted largely, and with even less than an average yield per acre the aggegate must prove far in excess of former years.

**Cincinnati, Hamilton and Dayton Railroad.**

The following is a corrected list of bonds of the Cincinnati, Hamilton and Dayton Railroad, outstanding at this date:

| | | |
|---|---|---|
| Cincinnati, Hamilton and Dayton— | | |
| 1st Mortgage | | $1,243,000 |
| 2d Mortgage | | 496,000 |
| Consolidated S. F. (issue $2,000,000) | | 996,000 |
| | | $2,735,000 |
| Cincinnati, Hamilton and Indianapolis Railroad Bonds | | 1,846,000 |
| Cincinnati, Richmond and Chicago— | | |
| 1st Mortgage | $560,000 | |
| 2d Mortgage | 65,000 | |
| | | 625,000 |
| Dayton and Michigan— | | |
| 1st Mortgage | $1,846,000 | |
| 2d Mortgage | 426,000 | |
| 3d Mortgage | 351,000 | |
| Toledo Depot Bonds | 105,500 | |
| | | 2,728,500 |

☞ The earnings of the Erie Railway for April, 1877, were $1,280,880 51, the expenses $879,016 07, and the net earnings $401,864 44. For the month of April, 1876, the earnings were $1,252,964 66, the expenses $961,309 84, and the net earnings $291,654 82—showing an increase in earnings of $27,915 85, a decrease in expenses of $82,293 77, and an increase in net earnings of $110,209 62. The net earnings for the seven months passed of the financial year exceed those of the same period in the former year by $530,061 68.

☞ The Contra Costa News says that the construction train is now running east of Pinole, and the Central Pacific Company are working fifty-three gangs of men, doing active grading at various points along the line. The Superintendent, J. B. Harris, is determined to push the work with all dispatch, and is in hopes of having trains running into Martinez by the 15th of August. The road coming from Bantas is now within a few miles of Antioch, and it is calculated that the entire line will be in complete running order by the first of September.

☞ The last rail on the Montreal, Portland and Boston Railway between West Farnham, P. Q., and St. Lambert was laid on the 12th inst., and a special train ran over the road between those places, returning to Chambly in the evening. Arrangements are now being made to continue the road to the Province to connect with the Portland and Ogdensburg Railway.

☞ The Pittsburg Chronicle says that the contract for grading and putting the road bed of the Castle Shannon Narrow Gauge Railroad in readiness for the rails has been awarded to Peter McElhenny, of Tamaqua, Pa., for $42,000. The work which has already been commenced, will be pushed to completion as rapidly as possible.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the Delphos and Kokomo Railroad Company, capital stock $50,000, in shares of $50 each, by D. W. Evans, and others. The road is to run from Delphos, Allen county, to the Indiana State line, on the west line of an Wert county.

### Street Railways in England.

A committee of the House of Commons has recently been examining into the street railway system of England. The aggregate length of the street railway lines in England is 300 miles, on which twelve million dollars have been expended. In London, the street railways have conveyed 48,000,000 passengers the past year, against 51,000,000 transported by the general omnibus company. Horse power is still mainly used, steam having been prohibited except during the hours from 10 o'clock at night to six in the morning. With a view to determining the propriety of repealing this law a committee has been appointed by Parliament. The committee has examined and tested the working of steam engines and cars for street railways, of various construction.

The application of steam power to tramways was urged not only on economical but on humanitarian grounds, and it was proved to the satisfaction of the committee that a five-year-old horse lasts but four years on these lines, against four and a half years in the omnibus business. On the other hand the main argument against the employment of steam engines on street railroads is, of course, the fright which their passage might give to horses, and the casualties which might ensue. Against this objection the advocates of the innovation brought up the case of the Parisian line from Montparnasse to the Bastille, where steam engines have now been running for months without a single accident. Numerous depositions of close observers, including some well known naturalists, seemed to demonstrate that the fear which horses testify to street cars propelled by an invisible machine is, so to speak, a rational fear, capable of removal by education, and arising from their present inability to explain to themselves the cause of the motion.

After a most exhaustive investigation, the conclusion was reached by the committee that the introduction of mechanical traction ought to be authorized in the streets of large cities at all hours of the day. The report terminates with the draft of a bill to that effect, which the Government has accepted and engaged to bring in at the beginning of the next session. Meanwhile the Board of Trade permits the provisional application of steam power to tramroads by way of experiment. The employment of this agency, however, is subject to certain precautionary conditions, which will be embodied in the new law. Among these may be named the following: Passengers may be able to enter and leave the cars without coming in contact with the machinery, which, moreover, must emit no offensive odor. The engine must be constructed in such a way as to discharge neither smoke nor steam. Each car, moreover, must be manned by two employees, and furnished with brakes powerful enough to stop it short, within a space measured by its own length, while it is moving at a rate of eight miles an hour. In the streets of cities that degree of speed cannot be exceeded, but in the country roads, may be increased by one-half. Finally, all engines used on tramways in the United Kingdom must submit to inspection twice a year, and even oftener, at the option of the Board of Trade.

---

☞ Henry Meigs will have the line of the Cuzco Railroad finished as far as the ancient capital of the Incas by the end of the year. He is still continuing his three mile tunnel into the Cerro Pasco mines, situated on the side of one of the highest peaks of the Andes, and is pushing his railroad to the head of navigation on the Amazon, so that it is probable that in a short time Lima will be within three weeks of Liverpool, instead of being from six weeks to two months.

---

### Apparatus for Heating Water Tanks.

There are various purposes to which the apparatus represented here can be advantageously applied. The simplicity of its arrangement, in having few parts and connections, makes it desirable for both indoor and outdoor use. It will be seen from the engraving, of which Fig. 1 is an elevation, and Fig. 2 a vertical section, that it consists of a strong cylindrical vertical boiler, with fire-place, to which pipes conducting water from tanks can be attached. The tank and boiler being full of water when a fire is made, the hot water passes from the boiler through pipe F, and an equal quantity of water descends from the tank, through pipe R, to the bottom of the boiler. The circulation continues as long as the fire is kept up. Hot water is drawn through the pipe D. The boilers can be made of different sizes, varying from 12 inches in diameter at bottom, with a height of 2 feet 4 inches, and sockets 2¾ inches, up to much larger sizes, but in all of them the connection pipes are easily fitted, and the tank may be placed as represented in the annexed drawings, or at the side. It will be readily seen that this simple device is adapted for

APPARATUS FOR HEATING WATER TANKS.

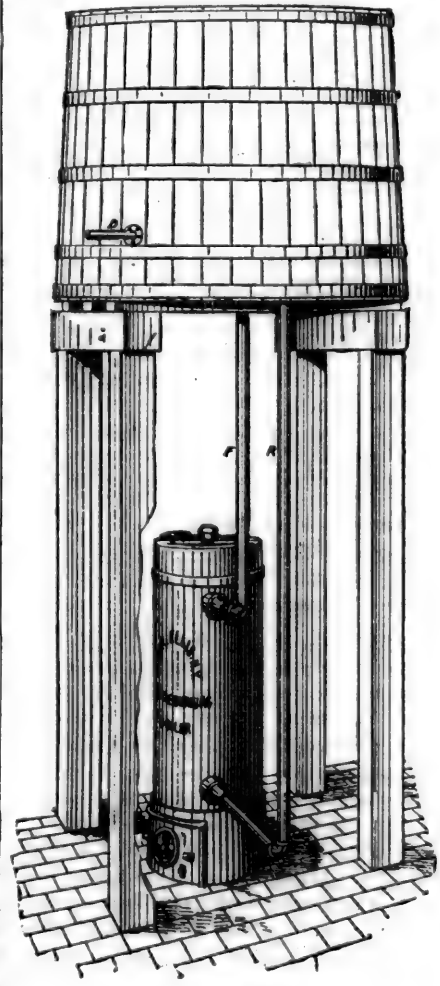

Fig. 1.

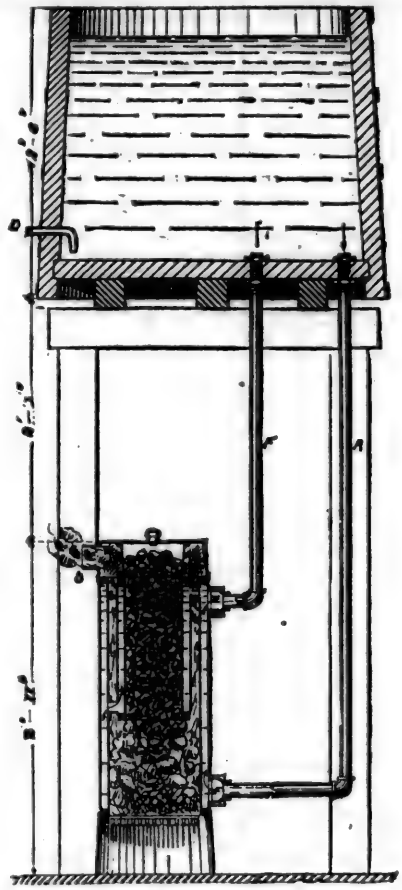

Fig. 2.

bathing establishments, bottling houses, stables, laundries, drying rooms, baptisteries, and residences—in the last it serves as an aid to the water back of the range, when an unusual quantity of water is required for bathing, washing, etc. It is also applicable for carving tables, heating glue pots, jacket kettles, and is highly serviceable for heating conservatories. Of course the room is warmed where it is placed, and by means of coils of pipes, other rooms can be warmed. Still further, it may be used under pressure, and all the benefit of steam heat obtained for confectioners (as exemplified in some of the confectioneries in this city), and similar uses, without the inconvenience attending the use of steam, since steam boilers are troublesome, unsteady and unreliable. These self-feeding boilers, the internal construction of which may be understood on reference to the engraving, Fig. 2, showing a vertical section, are easily managed, and only require firing three times in twenty-four hours. At a given pressure, the temperature of hot water is the same as that of steam.

This device is in operation at a great many places throughout the country. We may name the Newport House, West Point Academy, Government Home for the Insane at Washington, at which institution the tanks are 80 feet above the boiler.

But especial attention is called to the value of this apparatus in its application to heating water tanks at railway stations, so as to pre-

vent them freezing, and allowing the water to enter warm into the locomotive tenders. On this subject W. W. Evans, an honorary member of the Master Mechanics' Association, in a letter on railway matters to the secretary of that organization, says: "Heating water at stations by fires built expressly for that purpose, is a matter worthy of consideration in studying the economy of motive power, particularly in cold climates, during the winter season; at all stations, rooms for various purposes are required, which are heated by stoves in winter; these rooms might be under water reservoirs, with coils of pipe running through the water and around the fire in the stove, as Perkins builds his water heating apparatus in London; this water pipe is a continuous coil, with no ends or openings; it is filled with water, the same water circulating in it from one end of the year to another, taking up increments of heat in passing through the coil in the water. I have seen these pipes in Perkins' works, in London, under pressure of 2,000 pounds to the square inch; I have seen Perkins' men, in making portable ovens for the English army, take gas pipes 13 feet long, weld up one end, put three pints of water in it, and then weld up the other end, a series of these pipes forming an oven, the section being like that of a gas retort. It appears to me that heating water at stations might result in more economy than at first sight is evident. It must be recollected that the furnace of a locomotive is an expensive structure—that its life might be measured by the units of heat passed through it, and that every unit of heat that we can give to the water before it goes in the boiler is so much saved, and the distress to the furnace so much reduced. In examining the matter of hot water engines (engines to be run without fires) for the Central Underground Railway of this city, so as to get rid of carbonic acid gas in the tunnels, and provide good ventilation, I was astonished to find how heat could be stored in water and held subject to draft."

This subject has received much investigation and study from Charles R. Ellis, of 182 Centre street, in this city, who has spared no pains in endeavoring to furnish a safe, simple and useful device for the purposes alluded to, and we think he has succeeded in an admirable manner.

☞ The Detroit Free Press says it is suggested that as the same parties who bought in the Detroit, Eel River and Illinois Railroad recently at the sheriff's sale at Logansport own the Detroit, Hillsdale and Southwestern Railroad, the two roads might be united under one management and again make a through line from Detroit to the West and South.

☞ The Railway Equipment Trust Co. has declared a dividend of two per cent, and the Car Trust Co. of Pennsylvania a dividend of one and one-half per cent, payable by the Pennsylvania Company for Insurance on Lives August 1st.

**Port Huron and Lake Michigan Railroad.**

The United States Circuit Court for this District was engaged all day yesterday in hearing a motion to set aside the decree of foreclosure of the mortgage on the Port Huron and Lake Michigan Railroad, granted July 10, and for leave to file a supplemental bill of complaint, making the Chicago and Northeastern Railroad a party defendant, and for the removal of the Receiver, Wm. L. Bancroft. The party complainant in the foreclosure suit is the Union Trust Company of New York, which holds the bonded mortgage in trust for the bondholders.

The complainants in the supplemental bill, and who made the motion to set aside the decree, are Abram D. Clark, of San Francisco, and others, owners of $150,000 of the bonds, who claim that there have been gross frauds perpetrated in the foreclosure of the mortgage to the detriment of the bondholders. They allege that the mortgage covers the entire road running from Port Huron to Lansing; that the road has been running from the first named place to Flint, and that the right of way had been secured from the latter place to Lansing, and some grading and other work done, making the company's property in the latter portion of the road worth a large sum of money, namely about $300,000; that shortly after Mr. Bancroft's appointment as receiver he organized a new railroad company with a charter to construct a road from Lansing to Flint, called the Chicago and Northeastern Railroad Company, himself being principal stockholder; that this new corporation have taken possession of the road-bed of the Port Huron and Lake Michigan Road from Lansing to Flint, and have laid the iron, and are now running cars on the line, and have never paid the old company anything for it. They allege that but $2,500 has been actually paid in on the capital stock of the new company, and that the road has been constructed at the expense of the old road, running from Flint to Port Huron. They also allege that a land grant of 86,000 acres has been disposed of so that the mortgage does not cover it; also that the attorney for the Union Trust Company, of New York, is also attorney for the Chicago and Northeastern Railroad Company. They asked that Mr. Bancroft be removed as Receiver; that the mortgage be decreed to be a first lien on the whole road from Port Huron to Lansing, including the property of the Chicago and Northeastern Railroad Company. Affidavits were filed in support of and in opposition to the motion, and arguments were made by Alfred Russell and A. E. Chadwick in support, and C. I. Walker S. F. Seager and G. V. N. Lothrop in opposition.

The court decided the motion at a late hour last evening. Judge Brown said that it was very clear to his mind that the allegations in the supplemental bill were refuted by the affidavits on the other side; that it was very easy to make sweeping allegations of fraud, but that they were unsupported by proof; that some of the acts as alleged in the bill were suspicious to say the least, but when they were not specifically denied by numerous affidavits on the other side they were satisfactorily explained. He therefore denied the motion. He said that he was about to leave the city to be absent for six weeks. The sale under the decree of foreclosure was to take place in three weeks. If he were going to remain in the city he would not postpone the sale. In order, however, to give the complainant in the supplemental bill an opportunity to adduce testimony to support the allegations of the bill, if possible, he ordered that the sale be postponed until the middle of September, but that the advertising might proceed, and that the complainants might examine the receiver and his books and vouchers before the master in chancery and that they might have process to compel the attendance of such other witnesses as they might wish to examine, the last order being made at the request of Mr. Bancroft, who stated through his counsel, C. I. Walker, that he was both ready and desirous to have a free, complete and searching examination made of all his acts as receiver of the road, Judge Brown said also, that after having looked up authorities he was of the opinion that the mortgage did not cover the government grant of lands; that, as at present advised, he was of the opinion the title to the lands over which the Chicago and Northeastern Roads runs never was in the Port Huron and Lake Michigan Road, but has been acquired by the Chicago and Northeastern Railroad Company from private individuals.—*Detroit Free Press, July* 18.

**Our Railroad and Shipping Trade.**

The *Journal of Commerce*, in reviewing Mr. Nimms' recent report on the internal commerce of the United States, gives these interesting and surprising facts:

The estimated value of shipping (American and foreign) employed in our foreign trade is $200,000,000, while that of the railroads of the United States is (or was) $4,600,000,000. The value of the commodities embraced in our foreign commerce (for the year included in the report) is put by the same authority at about $1,121,000,000, while the estimated value of commodities transported by rail in this country for the same period is $18,000,000,000. In other words, the value of American railroads is (or was) about twenty three times greater than that of the shipping engaged in our foreign trade, and the value of our internal commerce on railroads is about sixteen times more than that of our foreign commerce.

☞ Articles have been filed with the Secretary of State of California of association, amalgamation and consolidation of the San Francisco and North Pacific Railroad Company, the Sonoma and Marin Railroad Company, and the Fulton and Guernevilie Railroad Company. The new association is to be called the "San Francisco and North Pacific Railroad Company." Capital, $5,000,000, in shares of $100 each. Directors—Peter Donnhue, Edward Martin, Michael Reese, Thomas I. Bergin and Patrick E. Dougherty. The principal place of business will be in San Francisco.

☞ The Central Pacific Railroad Company purposes adopting the American District Telegraph Company's system of message and alarm boxes for that portion of the road between Blue Canyon and Truckee. Boxes will be placed one mile apart, and the keys will be given to the trackwalkers and watchmen, who, when they discover a fire, rock or other obstruction upon the track, etc., will hasten to the nearest box and make the fact known. The work of constructing the system will be commenced about the 1st of August.

☞ The earnings of the Wabash Railway for the six months ending June 30, 1877, were $1,985,763 23, the expenses $1,542,946 84, and the net earnings $442,816 39. For the six months ending June 30, 1876, the earnings were $2,086,118 41, the expenses $1,663,581 61, and the net earnings $422,536 80—showing a decrease in earnings of $100,855 18, with a decrease in expenses of $120,634 77, making an increase in net earnings of $20,279 59.

☞ The North Pennsylvania Railroad Company has declared a dividend of three per cent, payable in scrip, bearing no interest, and convertible into the capital stock of the company when presented in sums of fifty dollars. The scrip so issued will be deliverable on the 25th of August, and convertible any time thereafter. The transfer books of the company close August 1, and the dividends will be credited to the stockholders as they may stand registered on that day.

### Poisonous Sewer Gas in Buildings and Dwellings.

The residences of the wealthy are supposed to be fitted and furnished with all modern improvements, as they are termed, and yet it is quite a common complaint that obnoxious and poisonous gases issue from the kitchen sinks and other outlets for waste water, rendering the air unpleasant and what is worse very unhealthy for the residents. This frequently goes on in the night time when the inmates unconsciously breathe these poisonous vapors when asleep.

It is a startling but undeniable fact that the sewer trap at present used on main drains will not prevent the unhealthy and sickening poison of sewer drains from entering buildings. If therefore the dwellings of the banker and merchant are subject to this inconvenience, what must mechanics and laborers suffer in their close and densely inhabited tenement houses. Much of the sickness prevalent at this season of the year is attributable to this cause. Thousands of cases of typhoid and scarlet fever, diphtheria, spinal diseases, etc., have been traced to this undesirable source.

The engravings given here represent a sewer gas trap invented, patented, and constructed by Messrs. Stewart & Co., at the extensive Manhattan Pottery, Drain Pipe and Terra Cotta Works, foot of West Eighteenth and Nineteenth Streets, and warerooms at 269 Pearl Street, near Fulton, New York, which is well worthy the attention of all interested in sanitary science. Fig. 1 is an exterior view;

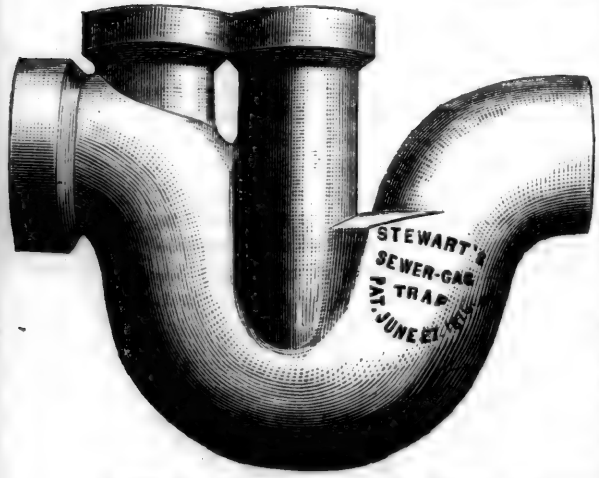

Fig. 1.—EXTERIOR VIEW OF SEWER GAS TRAP.

Fig. 2 is a longitudinal section, showing the interior. A is the main drain from the house; B, hand-hole, fitted with cover; C, outlet to the street sewer; D, vent to connect with independent pipe to the open air; E, ordinary level of water; F, level below which vent pipe commences to discharge the gas; G, lowest level necessary to the trap. The principal feature is the vent pipe, D, the mouth of which is under water, and only opens under a pressure of gas from the street sewer, the water level being restored just as soon as the pressure ceases. The most approved plan is to have an independent pipe from the vent pipe, D, carried to the top of the building, and not connected with rain water leader, or any other pipe in or outside the building. The vent pipe, D, also prevents the process known as "syphoning," (by which water is sucked out of the trap,) by admitting air when the surface of the water is depressed below the level at F, thereby leaving sufficient water above the level at G to

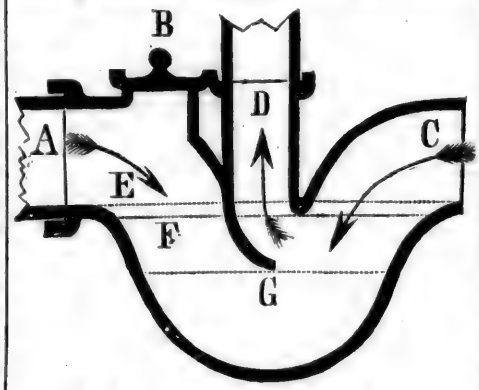

Fig. 2.—VERTICAL SECTION OF TRAP.

act as a barrier to the sewer gas. The advantages obtained by the use of this trap are: that it is automatic in action, and not liable to get out of order: that it is very effective in shutting out sewer gas under every condition; that it is durable, being made of the most imperishable material now known—glazed stoneware; that it is easily adapted, and can be readily substituted, for any trap now in use; that it is simple, being made in one piece; that it is cheap, costing a trifle in comparison to benefits conferred.

It might be supposed that this sewer trap would entail considerable expense, but the prices of the different sizes are exceedingly reasonable, the respective prices for 4, 5, 6, 8, 10 and 12 inches being two, three, four, seven, ten and twelve dollars. The Messrs. Stewart & Co. are the sole manufacturers, to whom application may be made for further information. The improvement is a valuable one, well worthy of the attention of all interested in sanitary science and reform. A working model at their works shows very clearly the construction and *modus operandi* of the trap. There are no intricacies about it, nothing whatever that can possibly break or get out of order, and its action is automatic and positive.

☞ The contract for grading the Pittsburg and Lake Erie Railroad, from Pittsburg to Youngstown, a distance of 70 miles, has been allotted to B. J. McGrann, of Lancaster. The road will be 4 feet 8½ inches gauge, and for the first 30 miles runs nearly parallel with the Pittsburg, Fort Wayne and Chicago Railroad.

☞ Four hundred tons of steel rail have been received at Petersburg, Va., to be laid on the western division of the Atlantic, Mississippi and Ohio railroad.

☞ The New York and Manhattan Beach and the New York, Bay Ridge and Jamaica Railroad was formally opened on the 18th inst.

### Sullivan County Railroad.

The directors of the Sullivan County Railroad Company, at a special meeting held in Concord, N. H., on the 6th inst., to consider the question as to the further continuance of the lease under which that road has been operated by the managers of the Vermont Central Company since 1866, voted unanimously to terminate the contract, fixing the first of August next as the date of termination. The road and appurtenances are substantially owned by the Northern Railroad Company, which purchased it under a mortgage sale in 1866, and leasing it immediately to Hon. J. Gregory Smith, President of the Vermont Central Railroad Corporation, for five years, at an annual rental of $25,000, the lessee being obligated to keep the property in as good condition as it was at the time of the lease.

It was understood to be an important consideration with the lessors in fixing the amount of the annual rental that the Northern road would receive a favor (which it has never realized) in the management of the business between the Northern and Vermont Central companies as to the through business of the two connecting lines. The operations of the Sullivan road last year produced net earnings amounting to more than $60,000, as appears in the last report of the Vermont Central company. The lease of the road, at the time of its expiration, was extended for another like term, and since the expiration of the second term in 1876 the arrangement has been continued by the tacit consent of the contracting parties.

This road was chartered in 1846. It extends from Windsor, Vt., to Bellows Falls, 26 miles. The first annual report of the directors in 1851 shows the total cost of the road and equipments to have been $1,071,801, and that the debt to the amount of some $600,000 had been funded in mortgage bonds, of which $500,000 was to fall due in 1865. The road was at that time making much more than $20 000 net earnings annually. The capital stock, $500,000, had all been paid in prior to 1853, and the whole debt had been funded about 1855, amounting to $750,000, much the largest portion of the bonds being held by the Northern Railroad Corporation.

The net earnings of the road gradually improved, being some more than $31,000 in 1865, but still falling far short of enough to meet the interest on the funded debt. The road had been transferred to the custody of a trustee for the benefit of the bondholders as early as 1851, and in 1865 the creditors proceeded, under a special act of the Legislature, to sell the whole property on mortgages, which had been long overdue, without any interest paid, the whole debt then being about $1,000,000.

The property was purchased for $500,000 by parties representing the Northern Railroad Corporation, and a new organization was formed under the name of Sullivan County Railroad Corporation, by whom it was leased as already stated. The officers of the Sullivan County Railroad are all directors also in the Northern Company as follows: Onslow Stearns (President), John A. Burnham, George W. Nesmith, Uriel Crocker and Josiah Minot (Treasurer.)

☞ The Governor of Texas has issued a proclamation warning persons not to purchase or negotiate State of Texas bonds or certificates described as "Bernard River," Nos. 17 to 446 inclusive, and "Caney River," Nos. 447 to 588 inclusive. It is discovered that fraud attaches to the issue of these bonds, and that the state will not be held responsible for them.

# American Railroad Journal.

**Saturday, July 28, 1877.**

## Financial and Commercial Affairs.

Business in the financial and commercial lines has been very seriously disturbed and embarrassed by the extraordinary railroad troubles, the exciting reports of which have crowded the columns of the daily newspapers throughout the week. The detention of freight trains, and the derangement of the domestic exchanges have been severely felt by the produce merchants. Money has been in more active demand at advanced figures, due in part to the shifting of loans. Call loans have been quoted here at 2@4, with most of the important negotiations reported on the basis of 3@3½ per cent; and very choice to prime mercantile credits are rated at 4@6, mainly 4@5 per cent per annum. Some further important amounts were reported as placed in the Street at 4 per cent, for specified periods, for Stock Exchange purposes. The City banks, last week, reported a further general decrease in their specie reserves, as well as in their legal tender board, and the item of circulation, as also in that of loans and discounts, and the deposit average. The loan and discount average shows a reduction of $1,520,500. The item of circulation of $122,000, and of deposits $6,274,700. The legal tender reserve was diminished $1,309,500; and the specie average fell off $3,908,000.

The City banks reported their average of gold last week at $14,979,800, as against $20,681,400 same date last year; and their greenback average at $57,499,700, as against $57,198,200 on July 22, 1876. Their deposits stood at $222,813,600,

against $224,705,800 same time in 1876. The loan item was $250,932,200 against $251,682,100 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $16,776,100, as against $20,424,925 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $400,708,240, or a daily average of $66,784,707.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $47,174 883, against $49,702,787 the preceding week; and a coin board of $83,758,625, against $84,306,673 on the return of a week earlier. The Customs revenue of the port during the past week was $1,750,000.

The aggregate of the outstanding U. S. currency of all denominations, July 1st, was $381,684,573. The outstanding amount of legal tender notes is $359,764,332. The National bank circulation is now $315,323,153 of currency notes and $1,430,120 of national gold bank notes.

National Bank notes received at the Treasury Department last week for redemption were to the amount of $5,092,000.

The income of the Government from internal revenues last week was about 2¼ millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,732 in the preceding fiscal year; and from Customs last week about 2¼ millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $7,998,903; special deposit of legal tenders for the redemption of certificates of deposit, $60,240,000; Coin, $110,000,847, including of Coin certificates, $38,996,200.

Gold has been more active, higher, and variable, through the influence in part of the railway disturbances, as affecting the course of trade, and of exchange. The speculative dealings have been more extensive. The Customs demand has been moderate. The export movement has been insignificant. The extremes of the price during the week have been 105⅜@106⅛, closing at 105¾, as against 105⅝ on Wednesday of the preceding week. The lowest point yet touched was 104¼, on Friday, March 2d. The specie outflow last week was only $190,433, making the total exports of specie hence since January 1, $20,766,819, against $36,900,817 the same time in the preceding year. The imports of specie at this port last week were $93,398, and since January 1st have been $7,494,178, as against $2,441,630 same time last year. The Customs demand for gold last week averaged $291,667 per day. Foreign Exchange has been in very moderate request, leaving off heavily and irregularly. Bankers' sixty day bills on London closed on Wednesday at $4 85@$4 85½; sight bills on London at $4 86⅛ @$4 87⅛ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,969,188 as against $5,200,119 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,767,982 of Dry Goods and $5,201,206 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $6,121,505, against $4,790,941 same week in 1876.

Government securities have been moderately dealt in at variable prices, influenced in part, by the course of Gold. At the close the market was quoted as a rule steady, leaving off on Wednesday as follows:

United States currency sixes, 124½@125⅛; do. 6s, 1881, registered, 110⅞@111; do. coupon, 112⅛@112⅜; do. 1865, new, registered, 107@107⅛; do. coupon, 107@107⅛; do. 1867, registered, 109⅛@109⅜; do. coupon, 109¼@109⅜; do. 1868, registered, 111@112; do. coupon, 111@112; do. ten-forties registered, 112¼@112½; do. coupon, 112⅞@113⅛; do. five per cents 1881, registered, 109⅞@110⅛; do. coupon, 111⅛@111¼; do. 4½ per cents, 1891, registered, 108½@108⅝; do. coupon, 105⅝@105⅞; do. 4 per cents, 1907, reg., 105⅝@105⅞.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,229,000, and $18,867,000 as security for public deposits.

State and Railway bonds have been in less request and quoted weak and unsettled as to price, even in the instance of the more substantial loans. And in the line of Railway and Miscellaneous share property business has been active but at materially reduced and variable prices, as affected by the railroad labor trouble and disturbances, leaving off feverishly.

A less active business has been noted in general trade lines and prices of domestic produce have fluctuated considerably closing as a rule more firmly, as influenced in good part by the railway embargo. Foreign merchandise has been in generally slack demand, with values quoted weak and irregular.

Hardware and Boots and Shoes have been lightly dealt in, while the inquiry for Dry Goods has been very moderate even for the season with prices quoted essentially as before.

The recent movements in Metals have been very light, with prices quoted depressed and more or less nominal. Eglinton Pig Iron quoted at $25 50; Glengarnock $27 50; Coltness $28 50 @$29; No. 1 American Pig at $18@$19; No. 2 do. at $17@$18; Forge $16@$17; American Rails at works $32@$35; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45 @$48 at the mills. Ingot Copper quoted 19@ 19¼ for early delivery.

Ocean freights have been unsettled and for Grain room on berth lower on a less active movement. Liverpool steamer rates at the close for Grain, 4d. per standard bushel. Provisions, 27s. 6d.@50s.; Tallow, 20s.; Leather, 35s.@40s. Measurement Goods at 15s.@20s. per ton; Cotton, $\frac{7}{32}$d.@$\frac{1}{4}$d. per lb., Liverpool, by sail. Cotton, $\frac{3}{16}$ Grain, 4d. Oil Cake and Slate, 10s.@12s. 6d.; Measurement Goods 12s.@15s.; Tobacco 25s. Grain rates on charter hence for Cork and orders left off at 5s. 3d. @5s. 6d. for the Continent, at 6s. and from Baltimore for Cork and orders, 5s. 3d. @5s. 6d. as to time of loading and from Philadelphia at 4s. 6d.@4s. 9d. per quarter. Refined Petroleum hence for Cork and orders, 3s. 9d.@ 4s. for the Continent, 3s. 6d. @4s. per bbl.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

# FISK & HATCH,

## Bankers,

No. 5 NASSAU ST., NEW YORK.

U. S. GOVERNMENT BONDS bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

ILLINOIS CENTRAL RAILROAD COMPANY,
NEW YORK, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

### The Recent Railroad Damages.

We have no disposition to repeat the details already given in the daily newspapers concerning the riotous proceedings of strikers, and the damages sustained by railroad companies. Neither do we wish to express any opinion relative to the questions involved, one of which is whether the employed receive proper remuneration for their services or not. But we do affirm most plainly and decidedly that all such riotous proceedings by a mob resulting in the damage to property and injury to person should be crushed out at once so firmly and effectually that a repetition will not be likely to take place for at least some time to come. The conduct of the companies under these recent strikes has been one of patient endurance; but such lingering sufferance is neither politic nor justifiable. Leniency and moderation are not appreciated by ignorant excited mobs; with them there is neither justice nor reason, and only one thing remains to be done before quiet and settlement can be obtained, and that is dispersion or punishment, but dispersion at any cost. The military and police can crush these outrageous proceedings in the most expeditious manner by a firm determination to disperse, at once and thoroughly, all gatherings that disturb the public peace.

The damage to railroad property has been very extensive. In the case of the Pennsylvania Railroad Company, it is stated that they lose their roundhouse at Pittsburg, together with 125 first-class locomotives, depot, storehouses, etc., and much valuable property, which it will take a great amount of time and money to replace. But the company's temporary loss will have to be made good by Allegheny County, where most of the damage was sustained. One of our cotemporaries gives the following very clear statement on this subject:

The most serious riots before the present time were the draft riots in New York in 1863. These riots cost the treasury of New York, in money paid for private property destroyed, the large amount of $1,748,456 39. That similar payments must be made in the case of the present riots is expressly provided for by the laws of Pennsylvania. On May 31, 1841, the Pennsylvania Legislature passed an act, which will be found in Brightly's Purdon's Digest, page 1088, which provides that "in all cases where any dwelling house or other building or property, real or personal, has been or shall be destroyed, within the county of Philadelphia, in consequence of any mob or riot, it shall be lawful for the person or persons interested in and owning such property to bring suit against the said county where such property was situated, being for the recovery of such damages as he or they sustained by the destruction thereof, and the amount which shall be recovered in said action shall be paid out of the county treasury on warrants drawn by the Commissioners thereof, who are hereby required to draw the same as soon as said damages are finally fixed and ascertained." By a subsequent law, passed March 20, 1849, and which will be found on page 1084, the provisions of this law are extended to Allegheny county. By decisions of courts made subsequently to the passage of this law it is provided that buildings burnt through fire communicated from other buildings fired by a mob are within the act, and that corporations can take advantage of it as well as individuals. The jury are not to give exemplary damages, but the full value of the property destroyed at the time of its destruction, with interest to the date of their verdict. There can be no doubt that the various railways that suffered losses by the destruction of their property by the Pittsburg mob can recover full damages from Allegheny county. The same could be done in Philadelphia if a mob destroyed railroad property. In New Jersey, the law upon the subject is substantially similar to that of Pennsylvania, and we quote it, as follows: "Wherever any buildings or other real or personal property shall be destroyed or injured in consequence of any mob or riot, the city in which the same shall occur, or if not in a city, then the county in which such property was situated shall be liable to any action by or in behalf of the party whose property was thus destroyed or injured for the damages sustained by reason thereof.

☞ The stockholders of the Delaware Western Railroad, of Delaware, met in Wilmington on the 17th inst. and voted to consolidate with the Delaware Western Railroad of Pennsylvania. The stockholders of the Pennsylvania branch met at Landenberg and decided to consolidate with the Delaware road. This action, of course, was merely formal, each branch having already elected the same officers.

☞ At the annual election of the Southern Pacific Railroad Company Charles Crocker was elected President and D. D. Colton Treasurer. It was decided to extend the line into Arizona 200 miles. Fourteen ship loads of material have already arrived.

☞ The Supreme Court of Louisiana has decided that certain bonds issued under acts of 1865, 1867 and 1870 "for expenses of building levees" and for work done or to be done on the levees, and known as levee bonds, are constitutional and valid.

☞ The earnings of the Philadelphia and Erie Railroad for the month of June, 1877, were $250,704 92, the expenses, $188,976 52, and the net earnings $61,728 40.

### The Coal Trade.

For the week ending the 14th instant, the total tonnage, as reported by the several carrying companies, amounted to 482,642 tons, against 453,074 tons in corresponding week last year, an increase of 29,568 tons. The total amount of anthracite mined for the coal year is 10,660,177 tons, against 8,257,177 for same period last year, an increase of 2,403,000 tons. The quantity of bituminous coal sent to market for the week was 52,981 tons, against 67,829 tons for corresponding week last year, a decrease of 14,848 tons. The whole bituminous tonnage from the beginning of the coal year is 1,678,017 tons, against 1,747,377 tons in corresponding time last year, a decrease of 69 360 tons. The total tonnage of all kinds of coal for the week is 535,623 tons, against 520,803 to corresponding date last year, an increase of 14,320 tons, and the total tonnage for the coal year is 12,338,194 tons, against 10,004,554 tons to same date last year, an increase of 2,333,640 tons. The receipts at Perth Amboy for the week ending on the 14th instant were 27,926 tons, the shipments 26,122 tons, leaving a stock on hand of 133,868 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last week in June was 27,122 tons of which 21,607 tons were coal, and 5,515 tons coke. The total carried for the year is 2,404,990 tons, of which 1,902,806 tons were coal and 452,402 tons coke. These figures embrace all the coal carried over the road, east and west.—*Phila. Ledger, July* 23.

### Michigan Iron Ore Shipments.

The Marquette Mining Journal gives the following table of the total shipments of iron ore from the district for the season, together with those of a corresponding period last year:

| | 1876. | 1877. |
|---|---|---|
| From Escanaba | 116,679 | 175 451 |
| From Marquette | 139 506 | 209,376 |
| From L'Anse | 18,597 | 30,656 |
| Total | 274,782 | 415,483 |

—showing an increase of 140,701 gross tons.

### Commerce of New York.

The foreign imports at New York for the month of June, 1877, are officially stated as follows:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n. | $8,065,972 | $10,448,147 |
| Do. for warehousing | 6,861,930 | 12 860,639 |
| Free goods | 5,682,205 | 7,438,494 |
| Specie and bullion | 498,880 | 508,777 |
| Total entered at port | $21.108,987 | $30,756,057 |
| Withdrawn fr. wareh'use | 6,518,509 | 4,821,330 |

The foreign imports at New York for six months from January 1, were:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n | $65,265,116 | $71,984,268 |
| Do. for warehousing | 47,741,080 | 48,219,404 |
| Free goods | 43,079,705 | 49,484,402 |
| Specie and bullion | 2,251,285 | 7,354,987 |
| Total entered at port | $158,337,186 | $177,043 061 |
| Withdrawn fr. wareh'se | 41,757,896 | 36,009,062 |

The foreign imports at New York for the fiscal year ending June 30, were:

| | 1876. | 1877. |
|---|---|---|
| Entered for consumpt'n. | $132,027,678 | $132,142,796 |
| Do. for warehousing | 81,902,121 | 77,541,453 |
| Free goods | 84,635,051 | 83,064,674 |
| Specie and bullion | 8,148,865 | 31,321,590 |
| Total entered at port | $306,713,715 | $324,070,513 |
| Withdrawn fr. wareh'se | 89,667,453 | 72,400,990 |

The following is a description of imports for the year ending June 30:

| | 1876. | 1877. |
|---|---|---|
| Dry goods | $88,058,966 | $77,330,636 |
| General merchandise | 210,505,884 | 215 418,287 |
| Specie and bullion | 8.148,865 | 31,321,590 |
| Total imports | $306,713,715 | $324,070,513 |

The duties received at New York for twelve months ending with June, were:

| | 1875-'6. | 1876-'7. |
|---|---|---|
| July | $9,278,546 61 | $7,497,199 39 |
| August | 11 417,505 51 | 10,125,386 42 |
| September | 10,163,829 28 | 8,634,411 36 |
| October | 8,208,316 27 | 8,031,580 14 |
| November | 7 034,576 39 | 5,720,296 82 |
| December | 5,349 574 79 | 4,822,595 04 |
| January | 8,160,728 44 | 8,058,938 72 |
| February | 9,473,003 56 | 8,224,434 61 |
| March | 10,237,275 86 | 8,695,637 63 |
| April | 7,764,457 04 | 7,569,482 75 |
| May | 7,575,997 28 | 7,054,082 33 |
| June | 6,619,735 25 | 6,102,426 72 |
| Total | $101,278,545 78 | $90,536,471 93 |

The exports from New York to foreign ports in the month of June, were:

| | 1876. | 1877. |
|---|---|---|
| Domestic produce | $22,060,231 | $23,970,315 |
| Foreign free goods | 97,494 | 136,140 |
| Do. dutiable | 1,013,637 | 340,882 |
| Specie and bullion | 4,839,205 | 5,225,337 |
| Total exports | $28 010,567 | $29,672,674 |
| Do. exclusive of specie. | 23,171,362 | 24,447,337 |

The exports from New York to foreign ports for six months from January 1, were:

| | 1876. | 1877. |
|---|---|---|
| Domestic produce | $118,810,717 | $120,381,075 |
| Foreign free goods | 1,650,759 | 1,355,117 |
| Do. dutiable | 3,596,853 | 2,249,246 |
| Specie and bullion | 28,626,333 | 21,551,498 |
| Total exports | $152,688,662 | $155,536,936 |
| Do. exclusive of specie. | 124,057,329 | 133,985,438 |

The exports from New York to foreign ports for the fiscal year ending June 30, were:

| | 1876. | 1877. |
|---|---|---|
| Domestic produce | $249,303,527 | $277,344,660 |
| Foreign free goods | 2,371,677 | 3,119,748 |
| Do. dutiable | 7,326,725 | 5,014,665 |
| Specie and bullion | 45,827,645 | 36.022,267 |
| Total exports | $304,829 574 | $321,501,340 |
| Do. exclusive of specie. | 258,001,929 | 285,479,073 |

### Queens County Railroad.

The suit of the Queens County Railroad Company against the City of Brooklyn to compel the local authorities to permit the laying of tracks on Lafayette and other avenues, was decided by Judge Barnard in the Kings County Supreme Court on the 20th inst. The Corporation Counsel had filed an affidavit stating the facts connected with the incorporation of the company, and he contended that the corporation in question was defunct, for the reason of its failure to comply with the terms of the General Railroad act, under which it was organized; and also that the act authorizing it to lay its track was unconstitutional. The road was to have been operated from the South ferry to Cypress Hills. Judge Barnard finds, in his decision, that the company has not obtained either the consent of the local authorities or of the land owners, nor has it procured the report of the commissioners called for by the constitution. He says:

"I think the Legislature could not do indirectly what it could not do directly. The Legislature, after January 1, 1875, could not waive the consent of the local authorities nor of the landowners, except in the manner provided by the constitution. The plaintiff's proposed road is a street railroad within the meaning of the constitution. One terminus, it is true, is Queens county, but that article of the constitution cannot be rendered of no effect by that fact. The article in question, as I understood its import, was designed to give to the local authorities of a city a voice as to the use of its streets by corporations carrying passengers thereon. My opinion is that the plaintiffs' corporate power and existence has ceased."

### Pennsylvania Railroad.

Mr. Edmund Smith, the second vice president of the Pennsylvania Railroad Company, has recently returned to his home in Philadelphia from a visit to London, on business connected with his company. Mr. Smith emphatically denies the report that his visit was for the purpose of negotiating a loan for the Pennsylvania Railroad, and says the company is not in want of money. He describes the feeling of the foreign bond and stockholders as very favorable to the railroad, and says it was plainly shown at their meeting in London in June. Mr. Henry Crossfield, the auditor of the London and Northwestern Railroad, who moved the resolution passed at that meeting for a full exhibit of the company's accounts, is one of the leading railway auditors of England, and is largely interested in Pennsylvania Railroad bonds and stock. He is regarded as a leading expert in railway accounts, and, therefore, his statements at the meeting in London of his confidence in the Pennsylvania Railroad, whose accounts he had been for some time investigating, were a strong reassurance to the stock and bondholders, and are considered of great weight.

☞ Solicitor Phillips of the Treasury has decided that the duty on machinery, in which steel is a component part, is 45 per cent *ad valorem*. On iron machinery 35 per cent. Importers of machinery undertook to get the portions made entirely of iron taxed at the rate for iron only by having these portions packed separately and separately invoiced. But the Treasury under Secretary Morrill held that as the iron parts could not be used without the steel parts all must pay the highest rate. This ruling is now overthrown and the Department will enforce only the rates distinctly required by law.

☞ Pittsburg is making an earnest move towards building a new railroad from that city 70 miles to Youngstown, in order to secure the advantage of a connection with the railroads that converge at that point. The Pittsburg Chronicle says that manufacturers have given the right of way near the city, estimated as worth a million dollars; subscriptions have been made along the line of the road, and active men are raising the subscription required from the Iron City, $600,000. The road can be completed and trains running upon it in one year.

☞ A readjustment of the Virginia State debt, which is said to receive favor in high quarters here as well as among a large portion of the public creditors in this country and England, is to place the consol and peeler bonds on the same footing, to pay 3 or 4 per cent on the whole debt for five years, and afterwards 5 per cent, the bonds to run thirty years.

☞ The Central Railroad of Iowa was sold at auction in Marshalltown, Iowa, on the 19th of July. There was only one bid—that of the Farmers' Loan and Trust Company, of New York, Trustee for the first mortgage bondholders—and on this the road was sold for $5,192,890.

### BOOKS AND MAGAZINES.

Wrinkles and Recipes, compiled from the Scientific American. A collection of Practical Suggestions, Processes, and Directions for the Mechanic, the Engineer, the Farmer and the Housekeeper. Illustrated. Edited by Park Benjamin. Revisors and Contributors: Professor R H. Thurston, C. E, Prof. P. H. Vander Weyde, M. D, Richard H. Buel, Mechanical Engineer. Joshua Rose, Mechanical Engineer. New York: H. N. Munn, Publisher, 37 Park Row.

Too many of the books advertised as aids and assistants to practical mechanics and engineers are worthless to them on account of the introduction of algebraical formula, and mathematical calculations that can only be understood by educated mechanicians expert in mathematical science. Practical rules and practical instruction for practical men, published in a comprehensive plain manner are the description of books that prove most valuable and useful for reference and study to working mechanics. There is a large field for such works in this country and the difficulty has been to find writers who from theory and scientific investigation and experiment, can bring themselves down to teach the "bone and sinew" by reliable and practical rules. One of the most eloquent and scholarly divines in England was noted for his talent of adaptation, and previous to a three hour public oration in which there was "a feast of reason and flow of soul," he could talk to a gathering of little children in such a way that they remembered the truths told them. Hence we hail with great satisfaction all such books as Wrinkles and Recipes, adapted for consultation by practical men, and giving valuable suggestions to those engaged in the industrial arts. The work as a manual for constant reference is one of great value, and one which every mechanic should have. It will prove an excellent addition to his library, as it contains a great amount of practical information not previously published.

☞ In the United States Court at Springfield, Ill., on the 18th inst. the final decree of foreclosure of the Indianapolis, Bloomington and Western Railroad was entered, and the sale of the road for the benefit of the Farmers' Loan and Trust Company and other claimants was ordered to take place at Bloomington on a day not yet fixed.

☞ It is stated in the commercial review of Mr. Rahden, at the City of Mexico, that railroad projects are reviving in Mexico, and American projects stand a better chance of success than ever before. Several new railways are contemplated, and, if asked for by practical and responsible men, contracts will be granted.

☞ It is reported that the Southern Pacific Railroad Company have engaged a quarter of a million eucalyptus trees. The company will plant the trees along the line of their track, and will use the timber, when sufficiently grown, to replace the ties as they wear out.

☞ The management of the New Brunswick and Canada Railroad has decided to have a narrow gauge.

☞ The capital stock of the Home Avenue Railroad Company, Dayton, Ohio, has been increased from $50,000 to $100,000.

### Redemption of Five-twenty Bonds.

The Secretary of the Treasury on the 19th inst. issued the fifty-second call for the redemption of five-twenty bonds of 1865—known as five-twenty bonds of the act of March 3, 1865, (consols of 1865.) The call is for $10,000,000, of which $7,000,000 are coupons and $3,000,000 registered bonds. The principal and accrued interest will be paid at the Treasury of the United States in the city of Washington on and after the 19th of October, 1877, and interest will cease on that day. The bonds designated are as follows:

Coupon bonds—Dated July 1, 1865, namely: $50, No. 24,001 to No. 30,000, both inclusive; $100, No. 40,001 to No. 52,000, both inclusive; $500, No. 34,001 to No. 42,000, both inclusive; $1,000, No. 64,001 to No. 75,000, both inclusive.

Registered bonds—Redeemable at the pleasure of the United States, after the 1st day of July, 1870: $50, No. 901 to No. 1,150, both inclusive; $100, No. 8,551 to No. 10,500, both inclusive; $500, No. 6,151 to No. 7,200, both inclusive; $1,000, No. 19,851 to No. 23,000, both inclusive; $5,000, No. 5,901 to No. 6,700, both inclusive; $10,000, No. 5,355 to No. 7,880, both inclusive.

The amount outstanding included in the numbers above is $10,000,000. All United States bonds forwarded for redemption should be addressed to the "Loan Division, Secretary's Office," and all registered bonds should be assigned to "The Secretary of the Treasury for redemption." Where parties desire checks in payment for registered bonds drawn to order of any one but the payee, they should assign them to the Secretary of the Treasury for redemption on account of the owner or owners.

The called bonds due are in the following order: On the 5th of August $10,114,550; 21st August $10,000,000; 28th August $10,000,000; 11th September $15,000,000; 5th October $10,000,000, 16th October $10,000,000 and 19th October $10,000,000—total, $75,114,550.

☞ An offer was recently made to the Kalamazoo, Hastings and Lowell (Mich.) Railroad, a proposed narrow gauge railway between the points named, to place $100,000 of the bonds of the company at 90 per cent, the proceeds to be used in building and equipping the road. The management, in the belief that iron has touched its lowest point, have taken the offer under consideration.

☞ The product of the gold mines of North Carolina for the fiscal year 1875-6 amounted to $10,835,000, that of Georgia to $7,379,000, and that of South Carolina to $1,381,000—a total of $19,096,000. The product for the year just closed is supposed to be much greater. Eleven stamp-mills are now running near Dahlonega, Ga.

☞ The last rail on the Vermont division of the Portland and Ogdensburg Railroad was laid on the 17th inst., completing the connections with the West and the Canadas.

☞ The Sonora Railroad concession was approved by the Mexican Government on the 8th of June.

☞ The Central Market, Cass Avenue and Third Street (Detroit, Mich.) Railway will be sold under mortgage Tuesday, August 7.

### Canadian Pacific Railway.

The complete report of the Chief Engineer of the Canadian Pacific Railway states that the total expenditures on surveys during the six years from the commencement to December, 1876, was $3,139,617. The line is located from Thunder Bay to Yellow Head Pass. The Chief Engineer reports a location on which, for 1,000 miles west of Lake Superior, easterly ascending gradients can be kept down one-half the maximum of the Grand Trunk. The length of lines surveyed and explored amounts in the aggregate to about 40,000 miles, and 11,000 have been measured through mountains, prairie and forest, with level chain and transit. Thirty-four lives have been lost in prosecuting the survey. Mr. Fleming recommends opening a territorial road from Lake Superior to Lake Nipissing.

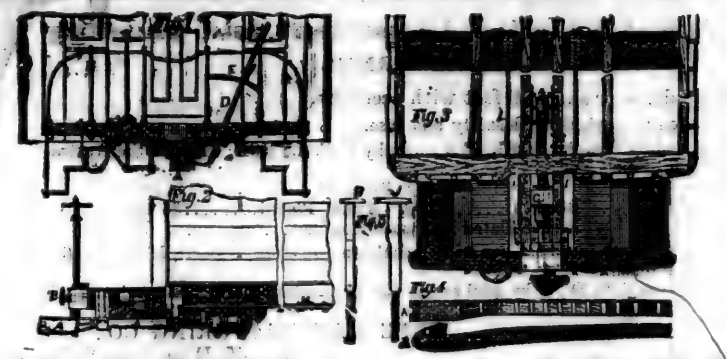
### The Public Debt of Virginia.

The debt of Virginia is a subject of much importance, not only to the people of that State, but to all who are interested in her affairs and in State credit generally. That she has labored with spirit worthy of the example of all the States who are burdened with debt none will deny. In this connection a recent letter from Gen. Mahone, late President of the Atlantic, Mississippi and Ohio railroad, and now a prominent democratic candidate for the nomination for Governor of Virginia, becomes of interest. In this letter Gen. Mahone gives his views at considerable length in regard to the public debt of Virginia. He expresses the opinion that the funding bill of 1871, to which he was opposed at the time of its passage, was a grievous mistake, and cites figures to show that under its operation the State debt is annually increasing. Gen. Mahone says that the debt intended to be assumed by the funding bill as $30,000,000, amounts in fact to $36,000,000, with arrearages of interest, etc., amounting to $5,200,000, making the State debt at present $41,000,000, an increase (by reason of the non-payment of interest on that portion which is not funded) of $860,000 per annum since the funding bill passed. He further says that, accepting the auditor's estimate of total revenues as $2,700,000, when the average revenue for the six years has been only $2,338,000, and accepting his estimates of $1,000,000 for expenses of the government, and taking the appropriation for the schools at $443,000 (the auditor's figures,) there will be left $1,270,000 to meet an interest account of $2,160,000. If the interest due on account of the sinking fund be discarded the deficit will still amount to $590,000. As to what steps should be taken to afford the people relief and preserve the credit of the State Gen. Mahone says:

It does seem to me to be the part of practical wisdom, and in the direct pursuit of an honest purpose to deal fairly and justly with the public creditors, that we should seek and insist upon, urge, and if necessary demand a compromise and readjustment of the debt of the Commonwealth and of the annual liabilities thereunder which shall be within the certain and reasonable capacity of the people to regularly meet. That this can be done when we go directly to the work I do not doubt. That it must be done I am firmly of the opinion and will. It is in the straight line of severe business that we must proceed, or we shall die of a sentimental sense of honesty and integrity, and the corpse will be buried at the expense of the creditor at last.



In referring to Gen. Mahone's letter, the Petersburg Index-Appeal, which is an earnest advocate of the general's nomination for the governorship, says:

The funding bill is a valid contract, however, and all attempts to evade or invalidate it, or in any way to avoid its enforcement, save by the consent of the creditor, should be sternly discouraged. This, we do not construe General Mahone's letter to contemplate. On the contrary, we have implicit confidence in the desire which it expresses to protect the interests of the creditor in a manner consistent with the honor of the debtor.

On the contrary, the Richmond State declares that as it reads the letter, "Gen. Mahone does contemplate the destruction or repudiation of the funding act as well as of the other obligations the State labors under."

### A Strike at Strikes.

In no country does the mechanic hold a better position than in this; and, what is more, there is no country which grants him higher or more useful privileges. When we glance at our manufactories we see, for the most part, capital judiciously invested and labor rightfully directed. We see improvement in man's condition as a social being, progress in intelligence, advancement in skill, and a higher æsthetic culture. In a word, industry meets with its just reward, and well directed enterprise with corresponding success. We see the mechanic free to speak, act, invent and construct, to move forward in his industrial career, spurred on by incentives that can only be found in the body of a free people.

The strikes that have recently occurred, we are unwilling to believe originated from the instigation, and with the connivance, of skillful, intelligent, industrious mechanics. Knowledge is power, ignorance is weakness, and if among the thousands who recently formed unruly mobs and riotous gangs there were intelligent, sober, hard working and faithful mechanics, then those men lowered their dignity and acted contrary to their natural intelligence and reason; they exhibited willful stupidity which the public may well deplore and condemn. The duties of conductors, engineers, firemen, brakemen, bridge-tenders and switchmen, all demand honesty, intelligence, watchfulness, sobriety and faithfulness. Incapable or dissatisfied men have no business to hold any responsible positions. Public safety demands their removal, and to the credit of our railroad companies be it said that incompetency in any department is seldom if ever tolerated when discovered. But strikes have not been confined to railroad employes; masons, painters, carpenters, machinists and other tradesmen have from time to time had their grievances, real or imaginary, and have undertaken, by cessation of work, to compel, if possible, compliance with their demands. The results in nearly all cases prove more or less injurious to the strikers.

That mechanics and workmen of every class have their rights no one will deny; that they are occasionally imposed upon and subjected to the caprice or avarice of unprincipled employers, are facts of which there is too often abundant evidence. But strikes are repulsive, unsettling, demoralizing, disorganizing; they generate bad temper, ill feeling, distrust and revenge; whatever the grievance, attended with or without exhibitions of violence, they are contrary to public sentiment, damaging to the participants, and paralyzing to industrial enterprise. On the other hand we have a word for employers. Let respect for labor be cultivated, let encouragement be given to all branches af education, facilities to free institutions, and opportunities for mental improvement; and, further, let skill and faithful services be recognized and rewarded by just compensation.

If the workman, by thought and attention, aims at higher degrees of excellence, the employer certainly has every reason to aid him in his advancement. We consider it as obligatory on the part of employers to compensate and encourage their workmen, as it is for workmen to strive after excellence and to be faithful in the performance of their duty.

### How to Prevent Machine Belts from Slipping.

Those who have experience with machinery know the inconvenience frequently resulting from belts slipping on their pulleys. In some cases this occurrence causes more damage and trouble than many would suppose. We remember of a case in Boston, Mass., where several expedients were tried to keep the engine driving belt, which was over 12 inches wide, from slipping, and rosin, chalk, and other ingredients were freely used to "make the belt hug the pulley;" every time, however, the belt slipped it caused flaws in the manufactured article. When a belt slips the presumption is, that the belt is either too narrow or too loose; any belt that has more work to do than there is friction between the belt and pulley, must slip; and as that friction is the result of pressure of the belt upon the pulley, to increase the friction the belt is tightened. If the belt still slips, then the belt is overloaded. Visit one of our extensive factories at Cohoes, N. Y., Lowell, or Lawrence, Mass., and note the enormous amount of belting in motion, driving hackling, carding, roving and spinning machinery. Should this belting slip by being too loose, it has to be immediately "taken up" and tightened; if all of the belting or any portion of it is over tight, then friction on the bearings is increased, the shafts are unduly and unequally strained and will soon "get out of line." Again, when there is too much looseness the belts will slip and are liable to run off the surfaces altogether. There is a certain

medium to be attained between tightness and slackness; and those in charge of machinery should be able to distinguish it. The common practice of putting upon a slipping belt sticky substances—as rosin, tar, molasses, etc., often makes the remedy in the end worse than the evil; for this, while it makes the belt hold upon the pulley by the adhesiveness of the material, must result in a loss of just so much power as is required to separate the belt and pulley, which is often as much as is gained by the sticking of the belt.

A test made with a dynamometer by John W. Sutton, an experienced engineer, at 95 Liberty Street in this city showed the following result: A five-inch belt, running about 1,000 feet per minute, driving circular saws, etc., would transmit just 5-horse power without slipping. When more work was put on, even ¼ of 1-horse power, the belt would slip, and the dynamometer showed that the belt, while slipping, would transmit only 3½-horse power. As soon as enough work was thrown off so that the belt could take again, work could be put on up to 5-horse power without slipping. This was tried over and over again, with the same results each time.

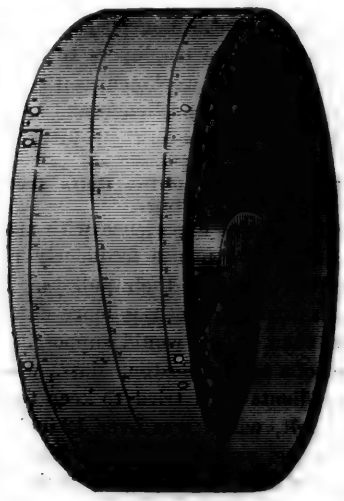

Fig. 1.—Showing the manner of covering a pulley. Patented July 13th, 1877.

Every belt in good order drives, and is driven, by the friction between the surface of the pulley and itself, and by nothing else. This friction is due, first, to the pressure (tightness

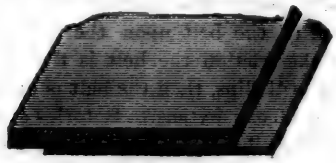

Fig. 2.

of the belt), and, second, the quality of the surfaces of the belt and pulley. A soft, pliable, elastic surfaced belt will do more work than a hard, dry one; and a soft, elastic sur-

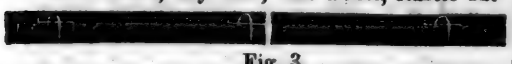

Fig. 3.

faced pulley will do more work than a hard one. The best material for the surface of a pulley is pure rubber; but as pure rubber does not wear well, and has not body enough by itself, canvas is introduced to give it strength to resist the pull of the belt and the wear, and still have the surface elasticity to give the great frictional resistance to slip, that is necessary to do the work. This cover is made with alternate layers of the best elastic rubber and canvas—four layers of rubber and three of canvas. The canvas is cut straight, so as to give it the greatest strength with the least material. The cover is made from two to six inches wide; on one edge is a lip of one ply of canvas one-half inch wide; and on the other a rebate that the lip will fill when the cover is wound spirally around the pulley. This lip and rebate is to join the cover together across the face of the pulley by cementing and driving small copper nails through them both, that clinch when the points touch the face of the pulley, so that the cover is as a whole one. One end of the cover is riveted to the pulley, and wound spirally on until the whole face is covered, and the other end is riveted as can be seen in the cut Fig. 1.

The cover is not like rubber belting, as that is made as firm as possible, without any elasticity, while this is made with as much surface elasticity as possible.

This cover is warranted to transmit one hundred per cent more power than a plain pulley; that is, it will do twice as much work before the belt will slip.

One pound will cover 6×12 inches of surface, equal to 72 square inches.

We saw a test made to show the difference in the amount of friction with a covered and uncovered pulley. A six inch diameter pulley with a one inch leather belt, one end of which was fastened to the floor and the other end with a four lb. weight attached, was hung over the pulley. The belt between the floor and the pulley had a spring balance attached to show the exact amount of pull on the belt. The pulley was revolved so that the belt slipped and the pull on the belt, as shown by the spring balance, was six lbs. The belt was then put on a covered pulley of the same size and revolved, and the spring balance showed 24 lbs. as the friction, fully four times what was shown by the uncovered pulley. So the claim that a pulley covered with this cover will do 100 per cent more work is no idle boast, but an actual fact.

Further information may be had from Mr. Sutton whose address is given above.

☞ The contract has been let to build the southern end of the Hamilton and Northwestern (Ca.) Railway to Port Dover, on Lake Erie, a distance of eight miles, to be completed during the present year. The contract to build the northern portion of the branch line from Clarksville to Glencairn has been completed, and the grading has to be finished, a distance of twenty miles between those points, by the fifteenth of October. The track is now laid about seven miles north of Georgetown, and the contractors expect to have the line completed to Barrie by the first of October.

### Rutland Railroad.

At the annual meeting of the stockholders of the Rutland Railroad Company, held at Rutland, Vt., on the 26th ult., Hon. John B. Page read the annual report of the financial condition of the corporation as follows:

Balance Sheet, July 1, 1877.

| | |
|---|---|
| Capital stock | $2,480,600 00 |
| Preferred capital stock | 4,143,500 00 |
| Bonds, mortgage, equipment | 1,000,000 00 |
| Dividend scrip outstanding | 248,131 68 |
| Coupons unpaid | 3,647 00 |
| Rents | 24,000 00 |
| Bills payable, bills receivable and cash | 250,768 06 |
| Bonds, first mortgage | 1,500,000 00 |
| | $9,650,646 74 |
| Construction account | $9,078,120 87 |
| Real estate | 115,925 87 |
| Addison Railroad stock | 218,100 00 |
| Mortgage bonds on hand | 232,000 00 |
| Rent due and unpaid | 11,500 00 |
| | $9,650,646 74 |

The rent for the Rutland and leased roads for the year has been paid, except the rent of the Vermont Valley road, which rent was paid up to October, 1876, when by the decree of the United States Court we were no longer entitled to receive the same. The receipts for the year ending July, 1877, were:

| | |
|---|---|
| For rent of the road | $330,000 00 |
| For rent of real estate | 1,894 00 |
| For interest in receivables | 12,586 00 |
| Total | $344,480 00 |

The disbursements were:

| | |
|---|---|
| For coupons paid | $75,000 00 |
| For coupons paid on mortgage bonds | 101,840 00 |
| For interest account | 25,335 81 |
| For bonds paid Rutland and Burlington first mortgage | 3,100 00 |
| For rents paid on leased roads | 77,500 00 |
| For legal services paid during the year | 3,489 21 |
| For salaries of President, Treasurer and clerks | 9,600 00 |
| For advertising, postage, stationery, telegraphing and official expenses | 738 86 |
| For floating debt, paid | 45,000 00 |
| Balance cash on hand | 2,876 90 |
| Total | $344,480 78 |

The auditing committee appointed for that purpose have examined the treasurer's books and vouchers, and their certificate is appended.

Respectfully submitted by order of the directors, John B. Page, President.

July 25, 1877.

The auditors, Messrs. J. H. Williams and N. Kellogg, certified to this examination of the vouchers and the correctness of the statement.

The above report having been submitted to the directors at a meeting held in the morning, was presented with their concurrence and by their order.

On motion of Mr. George W. Gill of Worcester, the report was accepted and ordered on file. The President announced as the next business the election of directors for the ensuing year and appointed as tellers J. Mason Everett of Boston, J. M. Hoven of Rutland and J. A. Goodwin of Lowell.

Pending the vote a stockholder inquired as to the number of shares of stock held by the directors. The President replied that they held in all 17,148 shares, each holding from 1000 to 1700, one owning over 9000.

While the count was being made the President

presented and read the modification of the contract between the Rutland and Addison Railroad Companies for the lease of the latter road to the Rutland Railroad Company, the modification being a reduction of the rent for the Addison road from 7 per cent. upon its capital stock to 3 per cent per annum.

Gen. J. S. Whitney explained to the stockholders the effect of the reduction of rent from $35,000 to $15,000 per year, saying that the President was altogether too modest in the matter, and that the stockholders should understand that they owe the negotiation and the benefit of this new contract to him, Mr. Hickok and one other director. He stated that the arrangement was forced upon them by the refusal of the Courts of the State to do them justice and compel the lessees either to pay the rent promised or surrender the road.

On the motion of Mr. Gill, the action of the Board in the matter of the Addison lease was ratified and confirmed.

The President further explained the details of the transaction, showing that the claim of $102,000 received from the Central Vermont in the settlement of a year ago was virtually a cash benefit to that amount.

J. Mason Everett, for the tellers, reported the whole number of votes as 25,042. Jacob Edwards of Boston had 25,042, Peter Butler of Boston 24,458, Edward A. Birchard of Boston 25,032, James H. Williams of Bellows Falls 25,042, William Sohier of Boston 24,366, John B. Page of Rutland 24,990, James W. Hicock of Burlington 25,042, James S. Whitney of Boston 24,366, John Prout of Rutland 25,042, and they were declared elected.

The President explained to the stockholders the suit now pending at St. Albans, stating that the interests of this company were being probated there, and in case the sale desired by the Central Vermont managers should be made, it could in no case injure this company or their future prospects. No further business coming before the meeting it was duly adjourned *sine die*.

At a meeting of the directors held upon the adjournment of the stockholders' meeting, the Board organized by the election of Hon. John B. Page, President, the other officers holding over. The directors elected as a finance committee Messrs. John B. Page, J. Edwards and C. W. Hickok.

### Repairs and Renewals of Locomotives.

At the sixth ordinary meeting of the session 1876-77 of the Institution of Civil Engineers, Mr. George Robert Stephenson, the President, in the chair, a paper was read on "The Repairs and Renewals of Locomotives," by Mr. A. McDonnell, M. Inst. C. E. It was stated that the cost of the repairs and renewals of locomotives, when kept in efficient order, depended chiefly on the age of the engines. The average cost on six of the principal railways, from 1868 to the end of 1875, was nearly 3.16d. per train mile, of which about 1.56d. was for wages, and about 1.60d. for materials. A minute analysis of the cost on the Great Southern and Western Railway of Ireland was given for the ten years ending December, 1875. The word repairs was applied to all existing engines, and renewals to engines rebuilt to replace old ones. Three types of engines had been designed:—Class 1, for express trains; Class 2, a light passengor engine; and Class 3, a coupled goods engine. The leading dimensions of these engines were shown in the annexed table:

| | Class. 1. | Class 2. | Class 3. |
|---|---|---|---|
| Diameter of cylinder..... | 17 inchs. | 16 inchs. | 17 inchs. |
| Length of stroke | 22 " | 20 " | 24 " |
| Diameter of wheel | 6ft. 6in. | 5ft. 8in. | 5ft. 1in. |
| Number of tubes. | 185 | 175 | 185 |
| Tube surface.... | 835 sq. ft. | 774 sq. ft. | 855 sq. ft. |
| Fire box surface. | 86 " | 88½ " | 101½ " |
| Grate area..... | 17½ " | 16 " | 17½ " |

The general results of the working of each class of engine was given for the year 1875. Class 1 took an average load of about 8.5 carriages, and a maximum load of 21 carriages, at a speed of from 30 to 38 miles an hour, with a consumption of 25.64lbs. of coal per engine mile. The net cost of repairs (shop expenses included) was .986d. per mile, from the time the engine commenced running, and the engines had run an average distance of 48,748 miles in the intervals between general repairs. Class 2 took an average load of about 7 carriages and a maximum load of 25 carriages at speeds varying from 26 to 32 miles an hour, with a consumption of 23.36lbs. of coal per engine mile. The net cost of repairs had been .809d. per mile, and the average mileage had been 54 635 in the intervals between general repairs. Class 3 took an average load of about thirty wagons, and a maximum load of fifty-four wagons at eighteen miles an hour, with a consumption of 37. 61lbs. of coal. The net cost for repairs had been .900d. per mile, and an average distance of 44,232 miles per engine had been run in the intervals between general repairs.

The net cost of building one of each of these engines was given in detail, with the weight and cost per ton of the chief materials used. The total cost of each had been—Class 1, £1,870 18s. 6d.; Class 2, £1,668.; 1s. 8d.; and Class 3, £1,943 0s. 6d.. The weights in materials used respectively in one of each class were 727 cwt. 1 qr. 6¼ lbs., 618 cwt. 3qrs. 20lbs., and 694 cwt. 2 qrs. 6¼lbs.

Of the materials employed in the repairs, without including the renewals, the most costly had been springs and fire bars, particularly on the engines which had run at the highest speeds. The repairs proper for the ten years amounted to 1. 588d. per train mile, the renewals to 1.260d., and the shop expenses and repairs of machinery to .639d., making a total of 3.487d. per train mile. The number of engines renewed was 6.4 per cent. per annum of the engines forming the rolling stock at the commencement of the period of ten years. Details were given of the cost per train mile of the chief materials used both for repairs and for renewals.

The tables showed that the most costly materials for renewals had been boiler plate, tubes, copper plate, wheels, axles and tires; and those which had cost most for repairs were tires, springs, fire-bars, axle boxes, and brasses.

The tires had been the most expensive materials, the cost for engine tires having amounted to .163d. per train mile. During the five years ending 1864, the price paid for iron engine tires had been 38s. 4d. per cwt., and for iron tender ties 33s. 8d. per cwt. The cost for engine and tender tires had been .827d. per train mile. During the five years ending 1874, the price paid for cast steel engine tires had been 37s. 11d. per cwt., and for cast steel tender ties 38s. 7d. per cwt. The cost for engine and tender ties was .226d. per train mile showing a reduction, by the use of steel, of .061d. per train per mile, although no engines had been renewed during the first period.

The mileage run by cast steel crank axles showed that it was a most reliable material, and that a life of at least 200,000 miles might be expected from a cast steel crank axle with inside bearings, carrying a weight of from 10 to 11 tons. Bessemer steel, when made with sufficient care, could be manufactured of the quality suitable for crank axles, but many axles of Bessemer steel had given bad results.

The cost of brass tubes had been, on an average, 9.6d. per lb., and old brass was sold on an average at 6d. per lb. The weight of the old tubes was nearly one-half the weight of the new ones. The value of the wear of a brass tube was about 18s. 6d. The average cost of an iron tube was 8s. 9½d.

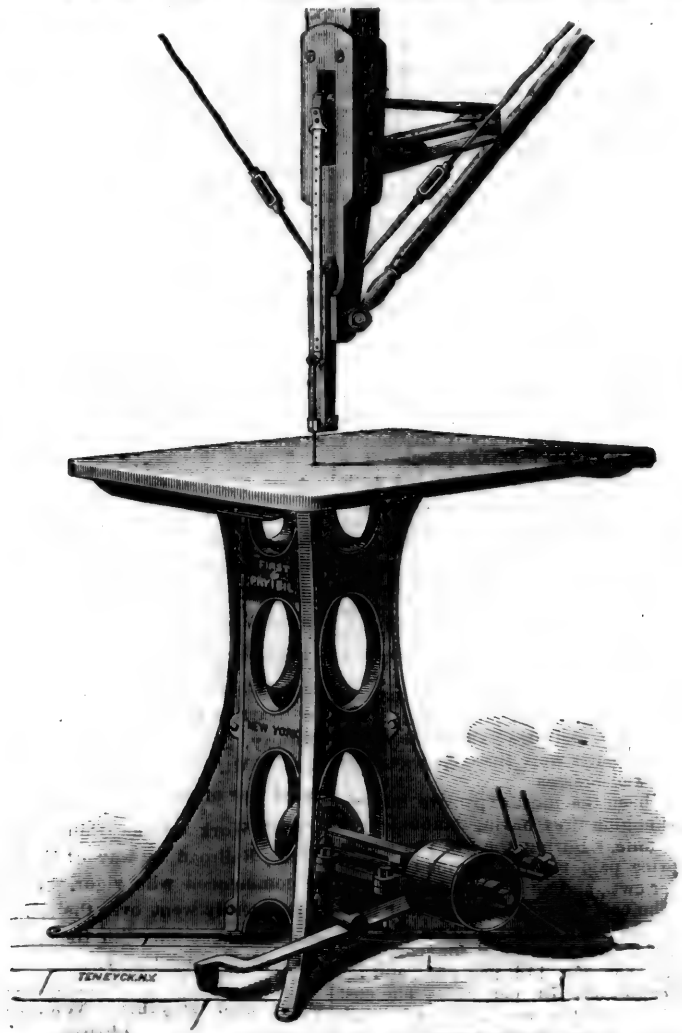
The communication was accompanied by five appendices, giving the cost per train mile of wages and materials for the repairs and renewals of the locomotives on nine English railways, from 1868, to 1876; similar particulars for ten years as to the Philadelphia and Reading Railroad (U. S. A.), as well as for other periods in regard to the Paris and Orleans Railway, the Paris, Lyons, and Mediterranean Railway, and the Northern Railway of France; also of Prussian railways for 1874, followed by a series of ten tables especially referring to the Great Southern and Western Railway of Ireland, with which the author has been connected for some time.—*Herapath.*

### Printing National Securities.

The commission of experts recently appointed by the Secretary of the Treasury to examine the operations of the Bureau of Printing and Engraving, recommended that the entire business of printing the public securities, etc., be relegated to private enterprise, and that the functions of the Bureau be confined in the future to sealing the issues and authenticating their genuineness. A thorough and exhaustive investigation of the history and workings of the Bureau preceded the report, from which it appears that the printing and engraving done by private companies was invariably cheaper, better, and attended with greater safeguards than that done by the Government. In some classes of work the Bureau prices were fifty per cent. greater than those charged by private companies. The commission does not recommend the discontinuance of the Bureau, which they think may be maintained for the accounting of the Governmental issues when once brought down to an economical basis.

☞ The first rail on the Colorado Central Railroad extension was laid at Cheyenne on the 21st ult. This road will be completed in October, and will connect the Colorado Central Railroad at Longmont, Colorado, with the Union Pacific Railroad at Cheyenne.

☞ The engineers are surveying on the route and securing the right of way for the Miami Valley Narrow Gauge railway. They have reached Midway, going west. For the first eight miles west of Mt. Sterling, the right of way has been secured free of charge.



☞ Work on the Columbus and Gallipolis (Ohio) Railroad by way of McArthur, is about to be commenced with vigor. Vice President Kilvert recently went over the route and superintended, in connection with General Manager White, the letting of contracts.

### First and Prybil's Wood-Working Machinery.

At the recent Centennial Exhibition in Philadelphia, no machinery received more attention and admiration than that class known as wood-working machinery, and perhaps next to the exhibit of hardware, there was no department of mechanical art where so much design and ingenuity of American origin were displayed. The demand for different kinds of wood in the industrial arts is enormous. Throughout this country, from the log cabin to the palatial residence, from railroad ties to magnificent bridges, in all building and engineering enterprises, this material is cut and sawed, split and planed, turned and carved for innumerable purposes. Hence it is scarcely surprising that mechanics and inventors have devoted so much attention to working it quickly and well and dispensing with as much manual labor as possible. The machinery in our planing mills, carpenters' shops, furniture and car-building establishments, ship-building yards and pattern rooms serves to prove the extensive introduction of numberless machines well de-

signed and admirably adapted for special purposes.

Among the most extensive establishments in this city for the construction of wood-working machinery, is, without doubt, the one at the corner of 40th street and 10th avenue; of which Messrs. First & Pryibil are proprietors. These manufacturers are both practically educated engineers and machinists, who have made the designing and construction of wood-working machinery their specialty. Their designs are original; the entire supervision of the construction is done by themselves; every care and attention are given to the most suitable materials; energy and promptness

JIG SAW MACHINE,
AS CONSTRUCTED BY FIRST & PRYIBLE, NEW YORK.

and enterprise are their characteristics. A visit to their works, and an examination of their machinery in use throughout all parts of the country, or of that constantly on exhibit at industrial expositions, will furnish ample proof of our statements.

The annexed engraving represents one of the many and most useful machines constructed by this firm. It is one known as a Jig Saw, without one or more of which, no wood working shop is complete. The design of this machine even to the eye of an inexpert will appear unique and symmetrical. The parts are in admirable proportion, with a display of good taste without lavish ornament. It is simple, and designed to be a highly useful and durable machine. It is suitable for any kind of in and outside sawing. Short and long saws can be used and easily adjusted. It is constructed entirely of iron, with the exception of connecting rod, springs and upper post; and vibrates very slightly, on account of having no slide underneath.

The saw is started and stopped instantaneously. It is furnished with a belt-shifter and brake: the pulleys are 7×2½ inches and the speed is 850 to 1,000 revolutions.

---

### Steam on City Railroads.

There has been, of late years, so much discussion respecting the introduction of steam dummies and locomotives on city railroads, that the subject has become one of great general interest. It is, however, surprising that after the practicability of substituting steam for horse power has been so clearly demonstrated there should be such delay in adopting the change. To engineers there never has been any difficulty in the matter. The old fashioned "dummies" have for years been employed to draw freight cars through thickly settled districts and business localities, no greater precautions being used than slow speed and the sounding of a loud toned bell on the approaching train. No fences have been erected at the sides of the track, no extraordinary means used to prevent collisions, loss of life or frightening of horses. Accidents there undoubtedly have been, and one accident resulting in the loss of life is one too many. But these heavy freight cars are suffered to pass and repass through the very centre of some of our large cities, some drawn by dummies, and others by four horses at a speed which however slow could not (on account of the great momentum) be instantaneously checked, and yet there is no hue and cry like that raised when steam for passenger cars is advocated.

We hear only occasionally of city steam passenger cars being used. We believe Philadelphia is in advance in this matter, and to-day has steam on one or more of her city railroads. In some parts of Europe the same thing has been done, and meets with general approbation. But it is high time for New York, Brooklyn, Boston, and other cities, to dispense with half their car horses and to prove that to some extent quick transit can be accomplished in this manner. We expect ere long to witness the experiment in this city; and there is no reason why it should not be successful. One thing, we advocate strongly, is the fencing in of tracks on which steam is used, for several reasons, among which are the following: it will prevent accidents to conveyances and pedestrians; it will prevent children from playing or placing obstructions on the track; it will allow the cars to be run at a quick speed; and it will also allow the track to be maintained in good condition.

To employ steam on city railroads without this precaution will only tend to render the enterprise unpopular, and annoying to all concerned. The Long Island Railroad within the city limits is to have such a fence commencing from their depot on Atlantic avenue, Brooklyn.

Relative to this subject we may mention some improvements introduced by Gen. J. D. Imboden, who has invented a system of steam for street cars that promises to influence, in a large degree, the railroad companies and the public in their decision as to whether steam or horse power shall be generally used for the locomotion of these conveyances. The engine is an independent submotor—a complete machine of itself—and can be attached to any of the present horse cars. It is simple, easily handled and cheap; and causes no discomfort to passengers—it being out of their sight, smell and hearing. It has its own framework, wheels and springs, carries its coal, water and engineer, and sustains half the weight of the car and passengers, the other half being carried by a single pair of car wheels placed in front of the rear platform. The car body is pivoted at its front end, on the engine, resting on a bed plate and springs, over the boiler. The engine has four driving wheels, with a wheel base of only four feet; and, owing to the simple, pivoted connection with the car body, is capable of curving freely. The boiler is horizontal, with simply a vertical furnace and steam dome under the driver's seat, which is outside the front of the car.

This car has been made of the same size as that of an ordinary horse car, so as to demonstrate thoroughly that in order to convert the latter into a locomotive nothing is necessary but to take off its front wheels, put the engine in their place, and close the front door. The interior and the rest of the car can be left intact. The new car occupies

four feet less street space than one of the dummies now in use on Market street, Philadelphia, and ten feet less than a horse car, the horses being dispensed with.

### Balancing Emery Wheels.

The proper balancing of emery wheels is of great importance, because the great speed at which they revolve causes the least defect in the balancing to vibrate the wheel when in motion. This vibration causes undue wear to the wheel as well as tending to throw the wheel out of true. Of late cast iron spindles are being introduced for emery wheels above ten inches in diameter, and they require very careful manufacture to properly balance them. In the first place the existence of air holes is a great disturbing element, and in the next place the position in the mould, in which the iron is cast, is found to be of practical importance, because the iron at the bottom is found to be more dense and heavier than that at the top. To remedy these defects, the castings were given very large gates or runners, the cope of the mould being made extra deep for that purpose. This, however, proved successful for the prevention of air holes, but not altogether so for equalizing the density, the difference between the top and bottom of the metal being very plainly perceptible. This led to the adoption of the plan of casting vertically as well as casting them in longer pieces, using only the lower end for the spindle. The result is, not only is the formation of air holes prevented, but the metal is at any part of its length of practically equal density diametrically. This, however, is of minor importance. The next consideration is to center the spindle to run as true as possible in the lathe, for the metal is always more dense at and towards the outside of the casting; and if more is turned off one side than the other the balance will be, to a like degree, affected. After the spindle is turned, its balance should be tested by placing it upon two knife-edged parallel pieces set horizontally true, and setting it in motion. Note the side that is downwards when the spindle comes to rest. If upon turning it upside down and end for end, and making several tests, the same side is always at the bottom when the spindle comes to rest, that side is the heaviest, and should be adjusted by boring a small hole, either in the end or upon the circumference.

The part of the spindle upon which the driving pulley fits should be made a neat driving fit to the pulley, so as to avoid the use of a key, which would destroy the balance. The centers of the spindle should be center drilled and countersunk, so that the spindle may keep true during the whole turning operation, the end faces being carefully turned true for the same purpose. The pulley should be cast with its diameter standing vertical, the hole should be bored out true and smooth, the wheel should be turned down to very nearly the finished size upon a temporary mandrel, and then placed in position upon the spindle and finished in the lathe while upon the spindle. Then the wheel and spindle together should be tied upon the knife-edged parallel strips in the same manner as the spindle was tested.

The washer should be cast flat and carefully turned true, the inside face being recessed to within about one quarter of inch of the circumference, which is done to ensure that it shall grip the wheel at and near its edge, thus holding it true as well supporting it as far out from the center as possible. The nut should be made very true, the thickness from the bore to each flat side being made quite equal. The best form of nut is a cylindrical one with two flat sides, which is the easiest form to make and ensure truth. The washer and nut should be placed upon the spindle, and the balancing of the whole again tested upon the parallel strips. The emery wheel may then be fastened upon the spindle, the bore being made a neat sliding fit, and then the strips should again be brought into requisition to test the balance while the whole are together. The wheel is very liable to require balancing, because it is very difficult to make a wheel of equal density throughout. If the wheel is out of balance it must be corrected in the wheel itself, and not by drilling holes in the spindle or pulley, because in that case the wheel, though balanced when new, will lose its balance as it wears smaller. It is necessary, therefore, to provide a center piece and to throw the wheel out of true in the lathe, taking care that the densest side is the prominent one; then by taking a cut down the radical face of the wheel, leaving it just true, the balance may be corrected. The center, however, should be thrown out but very little, and the balance tested. The process should be repeated till an exact adjustment is attained. By adjusting the balance in this manner, the spindle will, when once made, never require altering; and all that is necessary is to balance, in the manner described, each new wheel when it is put on, and the result will be sufficiently perfect for all practical use.—*Scientific American.*

### The Improved Niagara Steam Pump.

The Steam Engine and Machine Works at 97 Pearl Street, Brooklyn, of which Mr. Norman Hubbard is proprietor, are among the most extensive iron works in that city. It is at these works that the powerful steam pumps were made for the Brooklyn Water Works, and many steamboat engines and pumps have been constructed in a manner that has given the works an enviable reputation for good, strong and durable work. At this establishment are also patterns for marine, stationary and marine engines and steam pumps for every possible duty. Among these are the well known Improved Niagara Steam Pumps, which in 1875 were awarded a medal by the American Institute. These pumps are constructed on the direct acting principle, and much attention has been given to their design and efficiency. They are adapted for various purposes, as feeding boilers, and filling tanks; they are also used in sugar refineries and as fire-engines. Fig. 1 represents the exterior view of one of these pumps, from which the general design can be seen; Fig. 2 shows the interior parts and the arrangement of the operating mechanism. It will be observed that the general design and proportions are in good taste. The steam and pump cylinders have double flanges, that is, flanges cast on both sides of the cylinder; these are planed and fitted to the top of a planed bed, to which they are securely bolted. The parts admit of fine finish if so desired, but as a general thing Mr. Hubbard follows the English system in the construction of all his machinery, which consists in having smooth castings, the working parts and operating mechanism of the best materials, fitted and finished in as perfect a manner as possible, and the exterior surfaces of other parts plain, neatly painted and varnished. In many cases pumps are placed where there is so much wet and dampness and changes in temperature that highly finished machinery is not desirable. We refer the reader to the longitudinal section, Fig. 2, by which the features of this pump can be the better understood. One of the best improvements claimed consists in the sliding-valve, which moves in the cylindrical steam-chest, and is in fact a very elongated little piston, with two circular grooves around its cylindrical middle part, which grooves serve alternately to admit steam to the main cylinder or as exhaust. The motion of this valve-piston is caused by the steam pressure, which is alternately admitted at each end, while it is cushioned by steel springs. The steam effecting this motion is admitted by a rod passing through the center of the circular steam-chest, and serving the purpose of a sliding-valve. Slots, which by the to-and-fro motion of this rod-shaped sliding-valve, admit the steam alternately at each end of the elongated little piston, causes this to move, and in

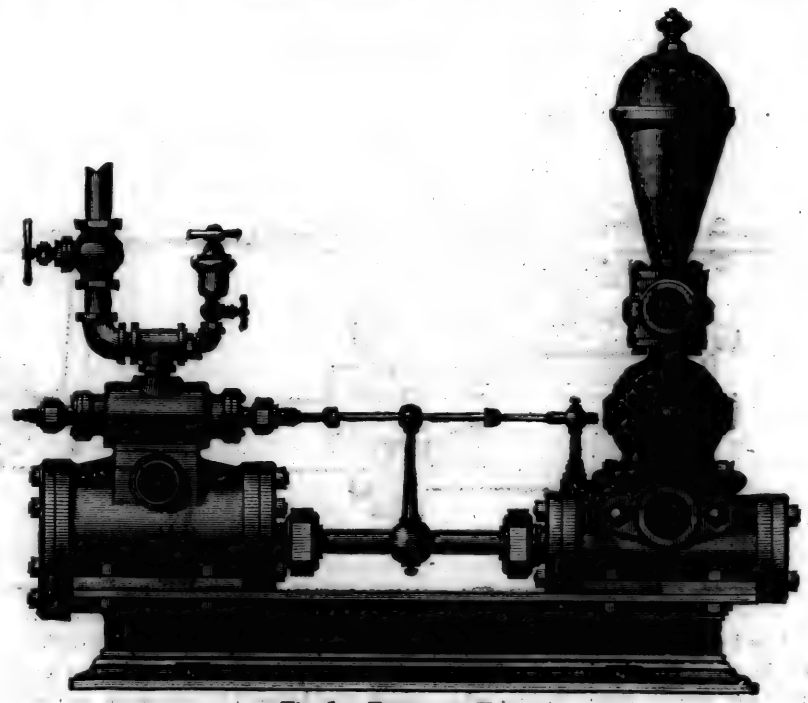


Fig. 1.—Exterior View.

fact this piston is itself the main sliding-valve. We here see the problem solved to move the sliding-valve, not by an eccentric or its equivalent, but by the steam itself—a problem which the cylindrical form adapted for the valves in this pump makes easy of solution.

The movement required to place the central rod referred to alternately in such a position as to admit steam alternately on the heads of the sliding-valve, is very slight indeed, and is accomplished by a tappet arm attached to the piston-rod between the steam and pump cylinder, as seen in our figure, and which at the end of each stroke touches one of the two tappets placed on the notched rod, which passes through the axes of cylindrical sliding valves, and which only requires the motion of a fraction of an inch to admit the steam alternately in one end of the cylindrical steam-chest, and throw the valve over, while the other end of the steam chest is connected with the exhaust. It is clear that in this way the sliding valve is every time thrown over to its whole extent, giving full admission of steam on one end of the main cylinder and a full exhaust of steam from its other side through the steam chest.

It is evident that the movement required to bring the passageway in the little piston rod mentioned in conjunction with the steam chests, needs only to be very slight, as the amount of steam required to throw the sliding valve over is very small, and thus is of special advantage if the pump is to work slowly. Experts know that in the latter case ordinary steam pumps are apt to stop as soon as the piston has commenced to reverse the position of the valve; but in this pump such an accident is impossible, as the steam pressure every time throws the valve entirely over before the piston rod has brought it over one-third part of its path. It is also evident that such a pump cannot possibly have any dead center, whatever may be the position of any part of it; when the steam is turned on, the sliding valve is bound to move to one end of the steam chest, if it does not happen to be there already, and the steam is admitted on one side of the main cylinder and exhausted on the other.

Having explained the operation of the engine portion, we now pass to the pump end. The water cylinder is lined with a good solid com-

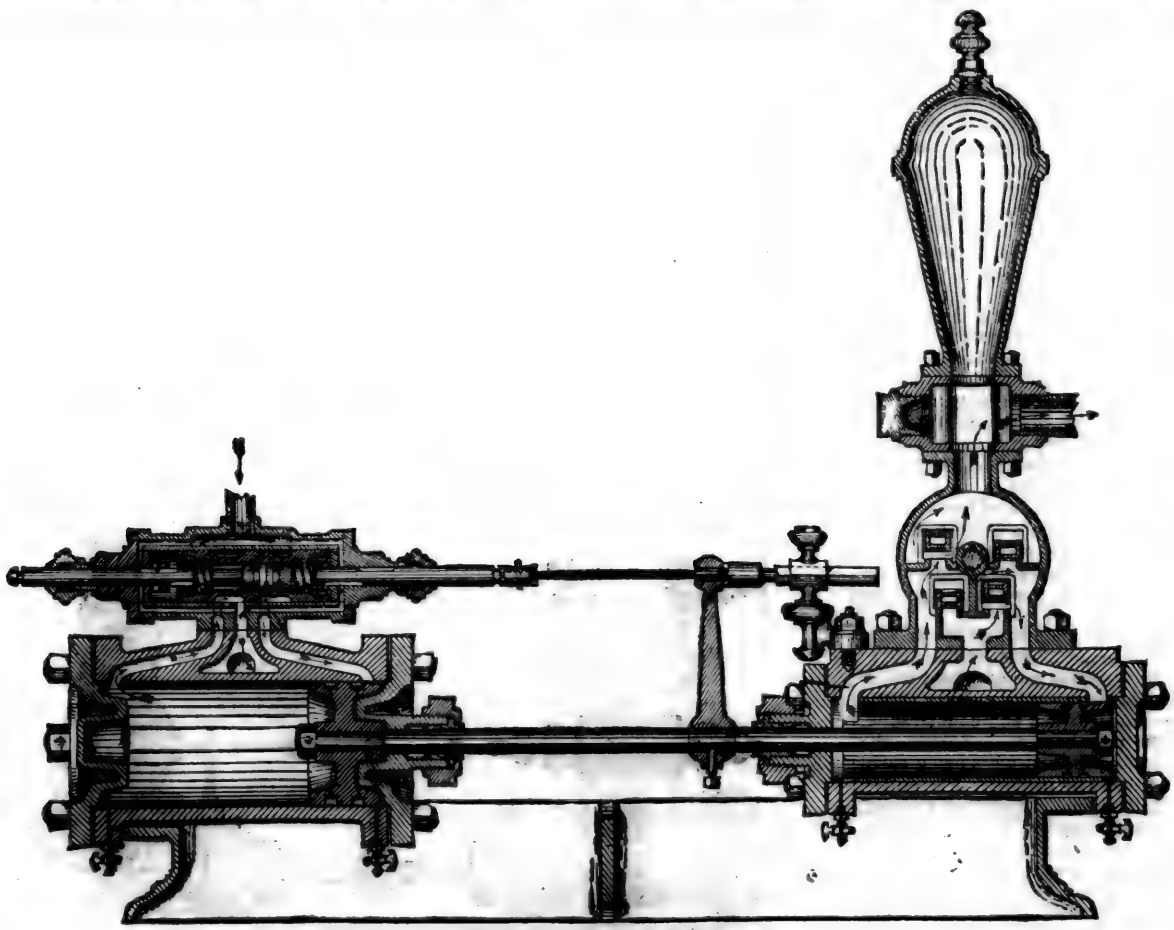

Fig. 2.—Longitudinal Section.

position bush or lining, to withstand the action of acids or liquor. This bush is of sufficient thickness to stand two or three borings when the lapse of time renders this necessary. The packing in this water cylinder is a piston, follower, and rings, ordinarily of composition metal, by which it is equally adapted for pumping hot or cold liquids; the water ports in the cylinder are directly in communication with the suction ports in the valve chest, whereby the greatest economy in duty is attained. The two discharge valves are seen immediately over the suction valves; the valve seats are of good composition metal, as are also the valves ordinarily. Any other metal, rubber, or wood valves may be used when preferred. These valves are square in form, and have four faces, which may be used in succession, and are guided by partitions in the chest, and by bonnets at the end on the valve chest, and are accessible by the simple removal of one nut, shown in the external view of the pump. The discharge piece has, like the suction in the cylinder, two openings, either or both of which may be used as required. The air chamber is also separate. It will here be noticed that while the utmost simplicity characterizes all the various parts, so that an expert is not required to take them apart or put them together, yet there is great eventual economy to the purchaser in case of accident or freezing, having only to replace the portion affected, as the other portions remain intact and as useful as ever.

The manufacturer claims that one of the greatest merits of this pump is its simplicity, as there are few parts, while the resistance to wear and tear is in proportion to its simplicity—that is, at a minimum.

☞ The large foreign trade of California in fruit and wines becomes no mystery when it is known that the State has 8,800,000 fruit trees and 35,000,000 grape vines, and harvests from 300,000,000 to 500,000,000 pounds of fruit yearly. She produces a large surplus, and foreign trade follows as a matter of course.

# RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*". State-aid Railroads are distinguished by a "†."

# American Railroad Journal.

**Saturday, August 4, 1877.**

### Financial and Commercial Affairs.

Affairs in the railway labor line have been in much more satisfactory position during the week. Most of the great carrying lines have been enabled to resume operations, the movements of produce and merchandise having been relieved from the embargo of the recent utterly mischievous strike. Financial and commercial dealings have been freed from the resulting influences. Money has again fallen to merely nominal rates, in the loan and discount market, in the absence of anything like an urgent inquiry for accommodation, whether for speculative or regular mercantile purposes. Call loans have been quoted here at 1½@2½, with most of the important negotiations reported on the basis of two per cent; and very choice to prime mercantile credits are rated at 3½@5½, mainly 4@5 per cent per annum. The City banks, last week, reported a further decrease in their specie reserve, as well as in their legal tender board, and the item of circulation, as also in that of loans and discounts, and the deposit average. The loan and discount average shows a reduction of $1,762,600. The item of circulation of $28,500, and of deposits $1,748,700. The legal tender reserve was diminished $174,500; and the specie average fell off $995,700.

The City banks reported their average of gold last week at $13,984,100, as against $19,295,200 same date last year; and their greenback average at $57,825,200, as against $59,523,400 on July 29, 1876. Their deposits stood at $221,064,900, against $228,829,100 same time in 1876. The

loan item was $249,169,600 against $250,505,000 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal requirement of reserve to liabilities of $16,043,075, as against $16,776,100 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $368,914,804, or a daily average of $61,485,801.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $51,471,181, against $47,174,383 the preceding week; and a coin board of $83,305,544, against $83,758,625 on the return of a week earlier. The Customs revenue of the port during the past week was $1,788,000.

The liquidation of the national indebtedness in July was $818,904.

The disbursements of the National Treasury in July (exclusive of interest or principal of public debt) were $10 220,507.

The U. S. Sub-Treasury receipts in July were $81,832,428 (of which $7,482,259 from custom); payments, $82,126,270, (of which $13,835,685 of coin interest.)

The aggregate of the outstanding U. S. currency of all denominations, August 1st, was $379,384,725. The outstanding amount of legal tender notes is $359,764,332. The National bank circulation is now $315,401,387 of currency notes and $1,480,120 of national gold bank notes.

National Bank notes received at the Treasury Department in July for redemption were to the amount of $21,838,200.

The income of the Government from internal revenues last week was about two millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,732 in the preceding fiscal year; and from Customs last week about 2¼ millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $9,811,956; special deposit of legal tenders for the redemption of certificates of deposit, $55,447,000; Coin, $97,803,955, including of Coin certificates, $37,807,300.

Under instructions from the Secretary of the Treasury the U. S. Assistant Treasurer at New York was to sell $1,000,000 in gold on Thursday, Aug. 2, at noon. The Secretary is represented as having remarked that he had no idea of selling $5,000,000 of gold in August, but that the sale of $1,000,000 on the date named was intended to redeem United States notes as an offset to the recent issue of national bank notes.

Gold has been less active, and generally weaker in price, the exciting war rumors from Europe on Monday not having made much impression on the market, even temporarily. The extremes of the price during the week have been 105¼@105¾, closing at 105⅝, as against 105¾ on Wednesday of the preceding week. The scarcity of gold for prompt delivery was complained of early in the week. The lowest point yet touched by gold was 104¼, on Friday, March 2d. The specie outflow last week was only $375,000, making the total exports of specie hence since January 1, $21,141,819, against $37,595,998 the same time in the preceding year. The imports of specie at this port last week were $166,789, and since January 1st have been $7,660,958, as against $2,593,492 same time last year. The Customs demand for gold last week averaged $298,000 per day. Foreign Exchange has been in quite moderate request, leaving off weak. Bankers' sixty day bills on London closed on Wednesday at $4 84¾@$4 85½; sight bills on London at $4 86½@$4 87½ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,217,603 as against $5,168,729 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $1,596,105 of Dry Goods and $4,621,498 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $5,140,795, against $5,427,839 same week in 1876.

Government securities have been in moderately active demand but variable in price, influenced mainly by the course of Gold. At the close the market was quoted as a rule firm, leaving off on Wednesday as follows:

United States currency sixes, 124¾@125; do. 6s, 1881, registered, 111@111⅛; do. coupon, 112@112¼; do. 1865, new, registered, 106¾@106⅞; do. coupon, 106¾@106⅞; do. 1867, registered, 108¾@109; do. coupon, 108⅞@109; do. 1868, registered, 111@112; do. coupon, 111@112; do. ten-forties registered, 109⅜@109⅝; do. coupon, 112¾@113¼; do. five per cents 1881, registered, 109⅜@109⅞; do. coupon, 109⅜@109⅞; do. 4½ per cents, 1891, registered, 108⅛@108¾; do. coupon, 108½@108¾; do. 4 per cents, 1907, reg., 105¼@105½; Central Pacific Gold Bonds, 106¾@107½.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,638,100, and $18,782,500 as security for public deposits.

State and Railway bonds have been in rather better demand and quoted somewhat stronger as to price, in the instance of the more substantial loans. And in the line of Railway and Miscellaneous share property business has been brisker at generally high, though irregular prices; speculation rallying sharply after the release of the prominent railway lines from mob control.

Business has been fairly active in general trade lines with domestic produce however quoted lower, closing as a rule rather more firmly. Foreign merchandise has been comparatively quiet. Sugars lower.

Hardware and Boots and Shoes have been in moderate request, while Dry Goods have been more sought after with prices quoted generally steady for seasonable goods.

Metals have been very dull throughout, with prices quoted weak. Eglinton Pig Iron quoted at $25 50; Glengarnock $27 50; Coltness $28 50@$29; No. 1 American Pig at $18@$19; No. 2 do. at $17@$18; Forge $16@$17; American Rails at works $32@$35; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$48 at the mills. Ingot Copper quoted 19@19¼ for early delivery.

Ocean freights have been more active and for Grain room on berth and charter much stronger toward the close. Liverpool steamer rates at the close for Grain, 6½@6¾d. per bushel. Provisions, 25s.@50s.; Tallow, 20s.; Leather, 50s. Measurement Goods at 15s.@20s. per ton; Cotton, ¼d. per lb., Liverpool, by sail, Cotton, 3-16; Grain, nominal. Oil Cake and Slate, 10s.@12s. 6d.; Measurement Goods 12s.@15s.; Tobacco 25s.@27s. 6d; Grain rates on charter hence for Cork and orders left off at 5s.@9s. 6d.; for the Continent, at 6s.@6s. 6d. and from Baltimore for Cork and orders, 5s. 6d.@5s. 9d. as to time of loading and from Philadelphia at 5s.@5s. 6d. per quarter. Refined Petroleum hence for Cork and orders, 4s.@4s. 6d. for the Continent, 8s. 9d. @4s. 3d. per bbl.

# FISK & HATCH,

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Illinois Central Railroad Company,
New York, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

### Erie Railway.

Mr. Hugh J. Jewett, Receiver of the Erie Railway, filed on the 1st inst. in the County Clerk's office his reports for the months of April and May. In his April report he begins with a cash balance of $565,757 67. During the month he borrowed on various certificates $536,432 85, and paid off various certificates to the amount of $426,795 07, and ended the month with a balance of $388,102 17. The receipts during the month for freights were $1,026,212 07, and for passengers, $307,699 85, which, with other minor receipts, make a total receipt balance of $2,613,261 40. The expenditures, including payment of Receiver's certificates, amounted to the last mentioned sum, less cash balance on hand. During the month of May there was received for freight $1,870,601 97, and for passengers, $349,179 88. There were sold receiver's certificates amounting to $451,861 57, and Receiver's certificates redeemed to the amount of $527,096 78. During the month the cash balance increased to $440,451 24. At the end of the month the outstanding Receiver's certificates were $1,983,740 08, as against $1,949,336 88 on the 1st of April.

### Foreign Anthracite Coal.

Anthracite coal is obtained in England, at Bidwell in Devonshire, at Walsall in Staffordshire, in the western division of the South Wales coal field, in Ireland, and near Edinburgh. Anthracite coal is also found in the coal fields of France, especially in the departments of Isere, the High Alps, Gard, Mayenne, and Sarth, and it is also raised in Belgium.

In South Wales Anthracite coal was used in 9 furnaces in blast, in 1864, out of 23 built; the quantity of anthracite iron made being 26,565 tons, out of a production of 839,502 tons.

The whole quantity of anthracite coal mined was 509,475 tons, viz: 146,000 tons in Pembrokeshire, and 363,475 tons in Carmarthen and Glamorganshire. Of this, 347,000 tons were shipped, and 162,475 tons were used for household purposes, for iron works, and sent off by railway to be used principally for malting.

The principal production of anthracite coal in the Kingdom of Great Britain, is that in Wales.

☞ A decision was rendered on the 28th ult. by Judge Donohue in the suit of Brown vs. The Pennsylvania Railroad Company, the facts of which have already been published in the Journal, sustaining the demurrer interposed by the defendant and dismissing plaintiff's complaint. The suit was brought by the plaintiff, who is a bondholder of the Columbus, Chicago and Indiana Central Railroad Company, to enforce a contract whereby the Pennsylvania Railroad Company guaranteed the payment of the bonds of the Columbus, Chicago and Indiana Central road, with interest. The Judge holds that the plaintiff individually, and in the absence of the parties to the contract and others interested therein, cannot maintain the action.

☞ The Secretary of the Treasury has, in accordance with the act of March 3, 1877, advanced to the Treasurer of the United States the sum of $250,814 81 for the payment of the interest due August 1 on the 3.65 bonds of the District of Columbia.

☞ The Pullman Palace Car Company's quarterly dividend of $2 per share, due August 15, will be paid as usual. Quarterly interest on the 8 per cent. bonds will also be paid at that date.

☞ The Old Colony Railroad 7 per cent Bonds of 1877 mature August 1. A new loan of like amount, at 6 per cent., 20 years to run, has been negotiated.

☞ The Atchison and Nebraska Railroad Company will pay, August 1, $20 on each coupon due September 1, 1873.

☞ Three hundred and fifty men are now employed in the construction of the Pembina branch of the Canadian Pacific Railroad, between Selkirk and St. Boniface, Manitoba.

☞ The Arkansas Central Railroad, narrow gauge, was sold by United States Master in Chancery Nicolls on the 26th ult., at Helena, for $40,000, to S. Honner, trustee.

☞ The officers of the Freehold and New York Railroad Company, recently elected, are: President, John S. Schultze, Manchester, N. J.; Secretary, J. E. Ralph, Freehold, N. J.

### Mt. Washington Railway.

The railway might have suggested Jules Verne's Journey to the Moon, and is such a miracle of engineering that it will be a pity if any visitor to the mountains misses a ride over it. The work of construction was begun in 1866, and was completed three years later. The route follows the Ammonoosuc Valley, and from the Fabyan House to the end of the friction rail is six and two-third miles. For two and a half miles the grade is two hundred and ninety feet to the mile, or one foot of perpendicular height to eighteen feet of horizontal distance. Besides the usual rails, there is a central rail of peculiar construction to receive the motive power, consisting of two bars of iron, with connecting cross pieces placed four inches apart. A central cog wheel on the locomotive plays into this rail, and secures a sure and steady mode of ascent and descent. The locomotive, as it first comes out of the engine house, has the appearance of being ready to fall over. The driving wheel is geared into a smaller wheel which connects directly with the crank, and four revolutions of the latter are required to make one of the driving wheel. The locomotive is not connected with the car, but simply pushes it up in the ascent, and allows it to follow gently in the descent. A wrought-iron dog constantly plays into notches on the driving wheel, so that should any part of the machinery give way, the train may be immediately stopped. The car is also supplied with friction and atmospheric brakes. The seats are placed at an angle that brings them almost on a level in the ascent, and all of them face down the mountain. The time occupied on the journey up is about an hour and a half, the engine having to stop several times on the way to take in water. The fare is three dollars up the mountain, three dollars down, or four dollars up and down on the same train.—W. H. Rideing, in "Harper's Magazine for August."

### Economy in Lubricating Oils.

In the half-yearly accounts of most of our railway companies a very heavy item appears under the head of oils, tallow, &c., for lubricating purposes. On many of our leading lines a very expensive description of oil, say £35 or £40 a ton, or higher, is used for lubricating some of the rolling stock. Upon the railways in America and Canada much more economy is exercised under this head, the material known as "natural oil" being almost universally used. The cost of this oil, which is a natural product on the other side of the Atlantic, does not exceed more than about £20 a ton, and for lubricating purposes it is said to be quite as efficient as the more expensive oils. Now, at the present time, when economy in working our railways is a matter of such vital import ance, it appears surprising that so obvious a saving as might be effected by the use of this "natural oil" has not been more generally adopted by railway companies.—*Herapath.*

### Kings County Central Railroad.

Some months ago we noticed that the filing of the map for this road had been changed, and under the Presidency of Mr. J. Condit Smith, assisted by Mr. E. B. Litchfield, very commendable progress is reported. The route of the road has been fixed upon from the Flatlands town line along the vicinity of 31st St., northward, running near the Holy Cross Cemetery and the County Buildings through Clove Road to the City line and westward to the Willink entrance of the Park, where the Case property has been secured for depot purposes. The land on the south side of Clarkson street, opposite the Clove road, and the corner of the Almshouse grounds has been purchased for a depot. The gauge of the road will be the same as that of the Bay Ridge or Manhattan Beach road and they will have facilities for bringing coal and all building materials from Bay Ridge to Flatbush at a much lower rate than they have ever been brought before. In this connection we would suggest that Malbone Street ought to be made a railroad street, as it is already so occupied; therefore we would suggest that this company try and obtain its use, and perhaps by inducing P. H. Reid to join them, his Canarsie branch could be brought along the same track. The work on this Central road is, we are told, to be commenced soon with a view of having it in running order this fall. Mr. Corbin has engaged to build and operate it as soon as the right of way is perfected, and we look for rapid progress after the work is once begun.—*King's Co. Gazette.*

### Commerce of the United States.

The value of the exports from the United States during the month of June, 1877, as compiled by the Bureau of Statistics at Washington, was $42,757,703, against $46,036,238 in June, 1876. The value of the imports in June, 1877, was $47,383,312, and in June, 1876, $33,931,751. In the year 1876 the exports exceeded the imports by $12,104,487, and in 1877 the relative quantities were reversed, the excess of imports being $4,625,009. This apparent change in the condition of the commerce of the country is attributable to two principal causes, first, the imports during the past month were larger than those of last year, owing to the fact that many merchants delayed their orders for goods until actually needed by their trade, and second, the partial failure of the wheat crop last year, principally on the Pacific slope, caused a large falling off in the exports generally sent forward at this season. The exports for twelve months ending 30th June, 1877, were $602,333,001, against $540,384,671 during the previous twelve months. The imports for the year ending 30th June, 1877, amounted to $450,419,552, against $460,741,190 during the previous twelve months. The excess of exports over imports during the year just passed was $151,913,452, and the excess in the previous year was $79,643,481, showing an increase in the balance of trade in favor of the United States of $72,269,971.

### What Railroads Cost.

In connection with the existing troubles and the great destruction of railroad property, the following statement of the cost of the roads leading out of Pittsburgh and their equipment will be of some interest. It is taken from the report of the State Secretary of Internal Affairs just issued:

| | |
|---|---|
| Allegheny Valley | $23,963,025 66 |
| Chartiers Valley | 1,131,033 11 |
| Cleveland and Pittsburgh | 16,313,252 06 |
| Erie and Pittsburgh | 5,075,496 59 |
| Pennsylvania | 56,518,478 57 |
| Pittsburg, Cincinnati and St. Louis | 19 882 005 10 |
| Pittsburgh and Connellsville | 12,489,369 48 |
| Pittsburgh, Ft. Wayne and Chicago | 29,581,900 73 |
| Pittsburgh, Virginia and Charleston | 1,331,444 13 |
| Western Pennsylvania | 3,986,211 00 |

### Pneumatic Railway.

A few years ago there was a probability that New York city would be provided with a pneumatic railway upon a very extensive scale. From some cause or other the project seems to have been abandoned. But a railway upon exactly the same principle is to be constructed in London, between the South Kensington Railway Station and the Albert Hall, under apparently severer difficulties than could be encountered along Broadway in this city. The grade in the London route is about 1 in 48. It is expected that two engines of 170 horse power will, acting upon a blower, push a train of six carriages containing 200 passengers through a brick built tunnel of 105.5 square feet in cross section at a speed of 20 miles an hour. If this enterprise proves a success, it will have a most important bearing upon the vexed problem of rapid transit in cities.

### Redemption of Five-twenty Bonds.

The Secretary of the Treasury on the 27th ult. issued the fifty-third call for the redemption of five-twenty bonds of 1865—known as five-twenty bonds of the act of March 3, 1865, (consols of 1865.) The call is for $10,000,000, of which $7,000,000 are coupons and $3,000,000 registered bonds. The principal and accrued interest will be paid at the Treasury of the United States in the city of Washington on and after the 27th of October, 1877, and interest will cease on that day. The bonds designated are as follows:

Coupon bonds—Dated July 1, 1865, namely: $50, No. 30,001 to No. 40,000, both inclusive; $100, No. 52,001 to No. 66,000, both inclusive; $500, No. 42,001 to No. 50,000, both inclusive; $1,000, No. 75,001 to No. 85,000, both inclusive.

Registered bonds—Redeemable at the pleasure of the United States, after the 1st day of July, 1870: $50, No. 1,151 to No. 1,400, both inclusive; $100, No. 10,501 to No. 11,900, both inclusive; $500, No. 7,201 to No. 7,750, both inclusive; $1,000, No. 23,001 to No. 25,100, both inclusive; $5,000, No. 6,701 to No. 7,300, both inclusive; $10,000, No. 7,881 to No. 11,750, both inclusive.

The amount outstanding included in the numbers above is $10,000,000. All United States bonds forwarded for redemption should be addressed to the "Loan Division, Secretary's Office," and all registered bonds should be assigned to "The Secretary of the Treasury for redemption." Where parties desire checks in payment for registered bonds drawn to order of any one but the payee, they should assign them to the Secretary of the Treasury for redemption on account of the owner or owners.

The called bonds are due in the following order: On the 5th of August $10,114,550; 21st August $10,000,000; 28th August $10,000,000; 11th September $15,000,000; 5th October $10,000,000, 16th October $10,000,000, 19th October $10,000,000 and 27th October $10,000,000—total, $85,114,550. The called bonds due on the 5th of August include the last of the old 1865s. The other calls are for the new 1865s.

### Mineral Discoveries in New Hampshire.

The recent discoveries of gold and other valuable minerals in large deposits at Milan, N. H., has drawn thither numbers of miners and speculators. The gold vein, which is about a hundred miles from Portland, on the line of the Grand Trunk Railroad, was discovered by a Mr. Fogg, on a farm he had owned for twenty years. A despatch from Milan says:

The vein is over eighteen feet in width, with well defined walls, running northeast and southwest, and extending for over a mile. The lode contains copper and lead, carrying gold and silver very rich, the ore being clean and solid from wall to wall. A blast put in a few days ago and throwing ten tons assayed as high as $250 and $260 per ton, fifty per cent of the mineral product being copper, twenty per cent each of gold and lead and ten per cent of silver.

**Midwout, Amersfort and Coney Island R. R.**

Some time since we advised our readers that a project was on foot by which the people of Flatlands would obtain rapid transit through our village, via Nostrand avenue cars. We learn that all necessary steps have been taken to ensure the building of the road, which is to be called The Midwout, Amersfort and Coney Island R. R. Co. Mr. Wm. R. Grace is President, Chas. Flint Secretary and Treasurer, Winchester Britton Counsel, and Charles Crooke, Engineer. Ample capital has been subscribed. We are now authorized to say, that they intend to have trains running if possible this fall as far as Flatlands, and the road to Coney Island finished by spring. They have purchased the Johnson Lake property, corner of Malbone St. and Flatbush ave., directly opposite the Park Entrance, on which they intend to erect commodious buildings. The trains will leave the rear of this property on Sullivan street, running thence to Clove Road, past the County Buildings and the Holy Cross cemetery to Flatlands village, thence southwesterly to Sheepshead Bay and Coney Island. We have been told by Mr. J. L. Bergen, who is negotiating for the right of way, that he has met very little opposition; with an exceptional case he has settled on price and location of route between Hendrickson's store in the town of Flatlands, and Vernon ave. in the town of Flatbush. When this road is opened Flatlands, from being an isolated village, will be within twenty minutes of the City Hall. The other roads have cleared Sheepshead Bay, while this road runs the whole length of the village, thence to Coney Island between Corbin's City of the Sea and the Judges road. We have had this route in our mind's eye not only, but have suggested it to others as being not only a summer route but a winter route also.—*Flatbush Gazette.*

**Railroad Competition.**

One of the causes which have compelled the through railroad lines between the seaboard and the Western grain and provision centres to cut down the wages of employes and reduce running expenses to the lowest possible figure, is that they have been doing the through transportation at a great loss. The manager of the Grand Trunk Railway reports to the stockholders that that corporation has lost $4,750,000 in two and a quarter years of railroad competition, and it is estimated that the competing railroads of the United States have lost $47,000,000 during the same period from the same policy. It has been remarked that this competition which has so materially reduced the cost of grain transportation was in the interest of the consumer. This may be partly true; but in time the loss attending such transportation will be distributed throughout the country. The stockholders will feel it first, the bondholders and the employes next, while the many industries depending upon the keeping up of the railroad lines will feel a depression resulting from the enforced neglect of companies to keep up their efficiency. We doubt if the competition has been of great advantage to anybody. The war of the railroad managers has produced an uncertainty as to rates, which has undoubtedly had an influence to disturbe the business of the shipper. In fact, margins are now so narrow that any element of uncertainty seriously affects business. Consequently it would be better for all concerned that the railroad companies should unite upon a tariff between the ports of shipment and the West which would afford them a moderate remuneration, and at the same time be so stable as to remove from transportation the element of uncertainty which in the past two years must have been a source of perplexity to shippers. Moreover, to a certain extent, local business on these lines doing a losing through business must be over-taxed to make up the deficiency, so that on the whole, the loss resulting from the competition of the through lines is pretty evenly distributed among all classes and sections.—*Boston Journal.*

**Costa Rica Railroad.**

A dispatch to the Panama Star and Herald dated Limon, June 17, 1877, says:

In railroad matters nothing new has transpired. The road is now in thoroughly good repair, and various travelers have come down from the Capital in two clear days. So far as can be judged, the present administration seems determined to persevere in the proposed new route from Pacuare to San Jose, via Santa Clara Plains. This change will entail considerable extra expenditure and no inconsiderable engineering difficulties, besides leaving Cartago "out in the cold." On the other hand it will open out a large expanse of country which is pronounced by all who have traversed it to be fertile beyond almost any district of Costa Rica, well watered, and capable of being cleared for cultivation at little cost or trouble.

The work on the railroad from San Jose de Guatemala to Escuintla will commence in three months under the direction of Don Guillio Nanne, with whom are associated Captain A. T. Douglas and two or three of the leading capitalists of Costa Rica.

☞ The hearing on the petition of the Central Vermont trustees and receivers to sell, etc., closed before the Supreme Court at St. Albans on the 28th ult. The decision of Judge Barrett will be announced hereafter.

☞ The work of track laying on the Dayton and Southeastern road has been resumed south of Washington, and is rapidly progressing toward Chillicothe.

☞ A branch road is projected to connect Wilmington, Clinton county, with the Marietta and Cincinnati railroad.

### BOOKS AND MAGAZINES.

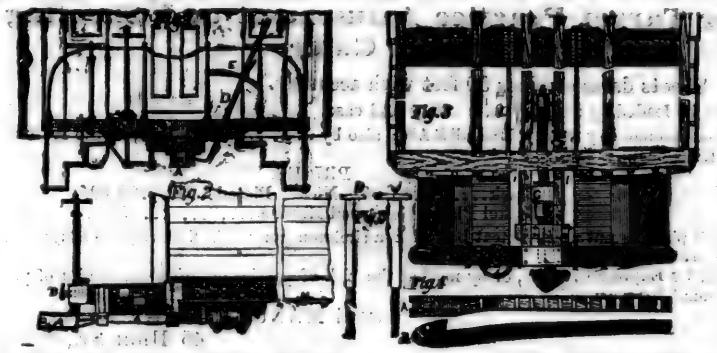
**Williams' Tourists' Guide and Map of the San Juan Mines of Colorado. And Williams' Tourists' Map of Colorado, and routes to San Juan Mines. The Health and Pleasure Resorts of the Rocky Mountains. New York: Henry T. Williams, Publisher, 46 Beekman St.**

The publishers have furnished tourists with valuable guides that will be highly appreciated by those who have in contemplation a trip to Colorado. The elevation of every mountain peak, pass and lake in the State, every road and trail, county boundaries, cities, towns, Post offices, &c., &c., are all given. Sketches of the county of "San Juan" and many other places are interspersed with anecdotes and incidents, which render the "Guide" a very pleasant travelling companion. To these are added miscellaneous information respecting the prices paid for ores; Assay value of ores; prices of transportation; miners' outfit; mining tools; the composition of ores containing minerals; tables of distances; cost of travelling and living in San Juan country; U. S. Laws concerning Mining; and Mining Laws of the State of Colorado.

### The Coal Trade.

For the week ending the 21st instant, the total tonnage, as reported by the several carrying companies, amounted to 477,055 tons, against 199,421 tons in corresponding week last year, an increase of 277,634 tons. The total amount of anthracite mined for the coal year is 11,137,282 tons, against 8,461,598 for same period last year, an increase of 2,675,684 tons. The quantity of bituminous coal sent to market for the week cannot be stated, the strike last week interfering with reports from the Cumberland region. The total tonnage of all kinds of coal for the coal year we make up by adding the anthracite tonnage for the week ending 21st inst, whilst estimating the bituminous tonnage as it was the close of the previous week. The total tonnage for the coal year is 12,815,249 tons, against 10,103,975 to same date last year, an increase of 2,711,274 tons. The receipts at Perth Amboy for the week ending on the 21st instant were 26,119 tons, the shipments 30,881 tons, leaving a stock on hand of 128,894 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week in July was 79,970 tons of which 66 235 tons were coal, and 13,735 tons coke. The total carried for the year is 2,551,988 tons, of which 2 023,347 tons were coal and 478,964 tons coke. These figures embrace all the coal carried over the road, east and west. The coal tonnage of the Reading Railroad Company during the week ending on Saturday, July 28, was about 135,000 tons, of which 50,000 tons went to Port Richmond, whilst there were 52,000 tons shipped from Port Richmond. All the collieries of the Reading Coal and Iron Company are working full time.—*Phila. Ledger, July 30.*

☞ A conference was held in Bangor, Me., on the 18th ult. between the Lake Megantic, Bangor and Piscataquis, the St. Croix and Penobscot Railroads and prominent citizens, with the view to united measures for extending the Lake Megantic route across Maine as a direct route between Montreal and the maritime provinces. The conference was quite satisfactory, and the parties believe it will result in practical measures for pushing the enterprise.



☞ The New Zealand Government has ordered surveys to be made for a railway between the Thames and the Waikato. The new line is expected to be one of the most successful railways in New Zealand.

New York, Saturday, August 11, 1877.

### Steam Versus Horses.

Before the present year has expired, we are prepared to find that steam has been introduced in place of horses on many city railroads, that the change will meet with public approval and that it will also prove advantageous to the railroad companies themselves.

We know of instances where steam dummies or steam cars have been tried, but on account of the engines constantly breaking down, the trial could not be considered a success. One of the most desirable things in this new enterprise is strength in the machinery. Our steam cars have, we think, been too light in their machinery. The street railroads are often not the smoothest in the world, and as they exist certainly try the strength of rapidly moving machinery, with the jolts and shaking to which it is subjected. We advocate simple, strong machinery, which will not need repair every few days or weeks, and in which engineers can feel the utmost confidence. The enterprise of introducing steam in place of horses, will certainly prove a failure if at the outset machinery breaks down and causes inconvenience to both passengers and company.

Timid people, who still regard the railroad as a dangerous mode of locomotion, may derive some courage from a comparison recently made between the deaths due to railroads and those connected with horse conveyances in Great Britain during the year 1874—the last year for which a report has been made. The number of deaths ascribed to all kinds of railroad accidents was 1,249, and to horse conveyances 1,528. Ordinary street traffic thus appears to have been much the more fatal. This comparison is for an unusually bad year for the railroads. Two very fatal accidents occurred. The average showing of a number of years would doubtless appear much better for the iron horse. No figures can be compiled as to the number of journeys made by horse conveyance, and hence the comparison cannot be carried out in detail. There were 477,840,411 journeys made by rail, and an average of one person killed to 381,579 journeys. These deaths include not passengers alone, but employes of every kind, trespassers, etc.—all accidents traceable in any way to railroad business. The proportion of passengers killed was 1 in 2,274,881; and of passengers killed from causes beyond their own control, for which alone the railroads are directly responsible, the proportion was only 1 in 5,556,284. In 1875 the latter proportion was only 1 in 29,823,500. From these statements it is estimated that, averaging the length of passenger journeys at ten miles, 1 passenger is killed for every 298,235,000 miles traveled—and traveling ten miles a day, at 30 miles an hour, the chance is that a passenger will meet his death in 2,749 years.

### Practical Talks on Mechanical Reform.

It is a remarkable fact that, notwithstanding the almost hourly accidents arising from steam boilers and machinery generally, there is a culpable negligence, on the part of both employers and their employees, to use cautionary means for the prevention of such disasters. Accidents have occurred on land and at sea which no human foresight could have averted; but it is very readily and generally granted that the majority of them have resulted from imperfection in materials, lack of strength, inattention, carelessness and ignorance. The explosion of the Westfield's boiler like most explosions before and since, was the direct result of a weak boiler and an ignorant attendant; switches become misplaced from want of judgment and watchfulness; bridges fall for lack of strength and constant examination; and so we might enumerate *ad infinitum*. What we have just said has in substance been uttered a thousand times before, and at every disaster will, we presume, be repeated. But for all this, the constant reference to the subject requires no apology. Public safety, commercial interests and private enterprise are dependent on honesty in manufactures, surplus of strength and careful intelligent supervision. Of this fact we are made sensible every day, as not a newspaper is published but what has its relation of disaster or items of accident.

Machinery is to be found in every nook and corner of our factories and workshops, from the massive shaft and gearing to the light and complicated movements of a sewing or knitting machine; boilers are placed in dark and obscure corners without glass water gauges, and where the engineer knows the hight of the water in the boiler only by the *sound* of the gauge-cock; safety valves are seldom looked at because it is troublesome to get at them for the pile on top of the boiler; yet these boilers are found hissing in cellars, under lofty buildings, beneath our side-walks, and are placed, so to speak, at every hight and at every depth.

Again, we hear daily of safety valves "sticking," gauge cocks getting "choked," safety plugs being melted out, and the accumulation of scale. Ignorant and perfectly incompetent men are put in charge of boilers and steam engines; there is careless supervision, little or no examination of steam and recording gauges. Do we exaggerate? A few days ago an *engineer*, or *engine tender*, or *fireman*, as you please, reader, entered the office of an expert, holding a steam gauge in his hand, and solicited a test of its accuracy, as he thought it might be "out about 5 lbs." The gauge was carefully tested and to his astonishment "it was out" *only* 25 lbs.

"Where is your engineer," we enquired from a workman as we stood beside a thumping engine and a dirty boiler in a manufactory where a hundred people were at work in different branches of industry. "Oh! you mean the boy who fires up; he minds the engine; he is playing about some where." We found him playing at ball in the street and asked him to come to the boiler with us, when the following dialogue ensued: What do you fire up with? Answer: wood, shavings and saw dust. How do you tell the height of water in the boiler? Answer: By those gauges—one don't work. What pressure do you carry on an average? Answer: I don't know. How do you know, then, when you have too much steam? Answer: I can't get too much steam; if the engine goes too quick, that rod (pointing to part of the engine) always makes a noise. Where is the safety valve? Answer: Up there. Up where? Answer: On top of the boiler, you can't see for the lumber on top. Where is your steam gauge? Answer: It is here, but the glass is broke, and it don't work. How do you know then how to fire up? Answer: I put in as much as the fire place will hold and keep it full all the time. Why don't you stop that engine from thumping and pounding and leaking at the stuffing boxes? Answer: We can't stop for repairs and I can't help it. How much do they pay you for tending this engine and boiler? Answer: Five dollars a week.

This is by no means a solitary instance of incompetency, and where personal gain is considered before safety.

### Sunbury and Erie Railroad Bonds.

Holders of the $1,600,000 of Seven Per Cent. Bonds of the Sunbury and Erie Railroad Company (now the Philadelphia and Erie Railroad Company), dated September 10, 1857, and maturing October 1, 1877, secured by mortgage to Charles S. Boker, Trustee, who desire to extend the time for the payment of the same until October 1, 1897, and either as registered or coupon bonds, can do so by signing an agreement therefor, and depositing their bonds for the purpose of having the same properly extended at the office of the Pennsylvania Railroad Company, on or before August 15, 1877. Holders not availing themselves of this privilege will receive the principal of their bonds on the 1st day of October, 1877, upon presentation of the same at said office, on and after which latter date interest will cease to be paid to such holders.

### Pumps for Car Lavatories.

The addition of lavatories in sleeping, drawing, and Pullman Palace cars, are conveniences that are appreciated by all travelers. The accompanying engravings represent two improved pumps, one single and the other double acting, for the purpose of filling these lavatories. If water tanks could be conveniently placed overhead or at the top of a car, the water would flow readily into the lavatory and would be regulated by an ordinary faucet, but as the water tank has to be placed under the floor of the car and consequently beneath the level of the lavatory it has to be pumped up by hand. Fig. 1 shows the form of a single acting pump from which the flow of water is intermittent and therefore liable to splash;

Fig. 1.

Fig. 2 represents a double acting pump from which the flow is continuous; by a few strokes of the handle the lavatory is soon filled. The handle of the single acting pump is placed in a horizontal position, but the latter stands perpendicularly and is operated by a backward and forward movement. The greater part of these pumps is concealed from view. They are of a simple and durable description and are applicable to any lavatory that receives water from a tank or cistern. Messrs. William S. Carr & Co. of 106 Centre Street in this city are the manufacturers.

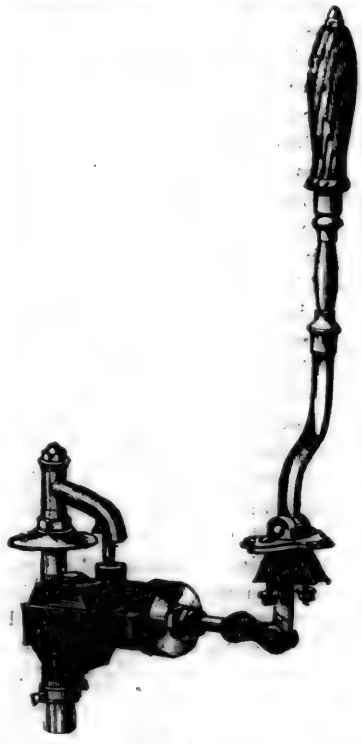

Fig. 2.

### New Cars for Brooklyn City.

The John Stephenson Co., the well known car builders in this city, have in course of completion fifty new cars for Brooklyn city. These cars will be of an improved pattern. One of them recently placed on exhibit attracted much attention. It is about the size of the ordinary vehicle; its principal interior and exterior arrangements are essentially the same, but many of the appointments are entirely different. The seats on the sides are broader and so inclined that the passengers will find them easy resting places. Being of perforated wood they are useful as a means of ventilation. The framework of the flooring is laid in sections so that it can easily be raised or removed. Any person dropping money between the slats can easily recover it by raising the woodwork. The body of the car is handsomely varnished and decorated. All the railings and brake handles are silver plated. Beside the usual lights at the extremities the car is supplied with a large silver plated lantern in the roof. The illumination is strengthened by a silver plated reflector. The bells, instead of being placed over the centre of the platform as on the cars now in use, are attached to the sides of the roof. A twisted silver wire running along the side of the car replaces the old fashioned leather strap. Passengers desiring to alight have merely to strike the wire, instead of pulling it. The slightest blow rings the bell. The most important improvement is a wheel guard, securely fastened to the bottom of the vehicle and

projecting above the wheels, almost sweeping the ground. It is composed of a strong and stiff bar of india rubber. The object of the guard is to remove all obstructions from the tracks without stopping. It is sufficiently strong to throw a child off the road, if it should be so unfortunate as to fall beneath the car. This will serve as a great safeguard to human life, and will relieve passengers of the unpleasant sensation occasioned whenever a car runs over a cobble stone or other obstruction. The fifty new cars will be distributed over the various lines where they are necessary to take the place of such as are worn out. The cars cost $1,100 each, the aggregate expenditure required being $55,000.

### Railway and Manufacturing Notes.

The Sonora railroad concession, approved by the Mexican Government, contains no land, but gives instead $8,000 per mile.

A railroad from Santa Rosa (Cal.) to Napa Junction is talked of, not only in Santa Rosa but along the proposed route.

Work on the Yaquina (Oregon) Railroad is being pushed vigorously forward. It is expected that in a short time ten miles of the road will be in readiness for the ties and rails.

The Northern Pacific Branch railroad to the Puyallup coal mines, discovered at the base of Mount Rainier, runs 31 miles up the Puyallup valley, one of the richest agricultural regions of the Northwest.

The $100,000 donated by Mr. Vanderbilt to his employes will give engineers about $14 apiece; conductors, $8; firemen, $7; brakemen, switchmen and yardmen, $3.

The town of Wiscasset, Maine, has voted a subscription of $60,000 to the capital stock of the Wiscasset and Quebec Railroad Company.

Track laying on the southern end of the Scioto Valley Railroad was commenced at Portsmouth, Ohio, on the 6th inst.

The sale of the Philadelphia and Chester County Railroad to Joseph Crawford for $100, which took place on the 6th inst., was understood to be in order to remedy some technical defects in the title.

The Long Island Railroad Co. have nearly completed the fencing in of their road, and this feature is well worthy of note.

The new Steam Tree Saw, invented by A. Ransome & Co., Eng., under ordinary circumstances will fell from four to six trees, averaging 30 inches in diameter, in an hour; it cuts close to the ground and thus saves a considerable amount of timber which is lost when felled with the axe.

Thomas & Co., of this city, have the best Automatic Hose Reel for the immediate extinguishment of fire, applicable to any room, yard or building where there is any water pressure. It is one of the simplest contrivances ever invented for the purpose, and nothing could be more efficient. It is meeting with a large sale.

There were about 9000 miles of railroad under stoppage of freight business by reason of the strike. The loss must have been millions of dollars per day.

The great coal mine of Los Christales, at Cauquenes, in Chili, which has been lost for forty years, has been found and will in future be worked by English Capital.

The Pennsylvania Steel Works, of Harrisburg, have orders enough to keep their works running day and night until November. They now employ 1,200 hands.

The geared steam locomotive with a passenger car having a capacity for 36 passengers on the Mount Washington railway makes the ascent in one hour and a half and the descent in one hour and a quarter. The distance is three miles. The summit of the mountain is 6,285 feet above the level of the sea, and 4,000 feet from the base of the mountain itself.

"Perpendicular Humpbacks" is the name given by the *Brooklyn Monthly* to the backs of the seats in the open street cars of New York and Brooklyn.

About 700,000 tons of Bessemer steel were made in England last year, and about 525,500 tons were made in the United States in the same period.

The experiment of slaughtering cattle by means of dynamite was recently tried at Dudley, England, with marked success. Small charges of dynamite were fastened on the foreheads of the animals, and exploded by an electric shock. The animals were instantly killed by the explosion, suffering a comparatively painless death.

There are about 2,000 horses employed to draw the cars on the various streets in Brooklyn.

Steam cars will be running on Third Avenue, Brooklyn, in a few days; they will be similar to those found so satisfactory on the Market Street line in Philadelphia.

A petition has been signed very numerously asking for permission for the Brooklyn City Railroad Company to lay tracks from East New York to the gate of Cypress Hills Cemetery. Passengers will then be carried from any of the ferries to the grounds for eight cents, or three cents from East New York instead of ten cents, as under the present system.

The train connected with the new Providence line to Boston, runs from Providence to Boston forty-two miles in sixty minutes.

On the different routes of the Brooklyn City Railroad Company, there are in use over six hundred cars.

The new steam cars and engines for local travel on Atlantic avenue, between Flatbush avenue and East New York, are now in operation.

The Coney Island trains come to "a dead stop" now before crossing the line of the Manhattan Beach road, and the Manhattan Beach trains do the same before crossing the Coney Island line.

### Wabash Railway.

A change has been made in the programme for interests payments as proposed in the former circular by which the coupons of the Decatur and East St. Louis first mortgage, due August 1, 1877, and the coupons of the Quincy and Toledo first mortgage, due May 1, 1877, will be paid on the 1st of September next, instead of the 1st of August. The coupons of the Toledo and Wabash, Wabash and Western, and Great Western second mortgage due May 1, 1877, will be paid on the 1st of October next. The quarter coupons of the Toledo, Wabash and Western consolidated mortgage, due August 1, 1877, will be paid on the 1st of November next. As a condition of, and prior to these payments, the coupons in default, with the others, as specified in the circular of January 24, must be deposited in trust in the Metropolitan National Bank, as heretofore announced, the holder receiving scrip therefor bearing a graduated interest at the rate of 3 per cent in 1878, 4 per cent in 1879, 5 per cent in 1880, and 6 per cent in 1881 and thereafter. The holders of the Toledo and Wabash and of the Wabash and Western bonds must also assent to an extension of the time of payment of the principal of these bonds on receiving additional coupons to 1893, the time of the maturity of the Great Western issue.

### Atchison, Topeka and Santa Fe Railroad.

The earnings of the Atchison, Topeka and Santa Fe Railroad Company for the month of June, 1877, were $185,781 04, the operating expenses $114,711 41, and the net earnings $71,019 63. For the month of June, 1876, the earnings were $186,641 10, the expenses $106,897 16, and the net earnings $79,743 94—showing a decrease in earnings of $910 06, an increase in expenses of $7,814 25, and a decrease in net earnings of $8,724 31. Per cent of expenses to earnings in June, 1877, 61.76; in June, 1876, 57.27. Number of miles operated in both years, 711. The following is a comparative statement of the earnings, expenses, etc., for the six months ending June 30, 1876 and 1877:

| | 1876. | 1877. |
|---|---|---|
| From freight | $686,196 00 | $663,596 00 |
| " passengers | 820,300 00 | 829,775 00 |
| " mail | 18,994 00 | 18,995 00 |
| " express | 15,940 00 | 19,395 00 |
| " miscellaneous | 4,372 00 | 4,909 00 |
| Total | $1,045,802 23 | $1,036,670 95 |
| Operating expenses | 529,324 70 | 593,452 80 |
| Net earnings | $516,477 53 | $443,218 15 |
| Per cent operating expenses to earnings | 50.61 | 57.25 |
| No. miles operated | Av. 683 50 | 711 |

The increase of operating is caused by putting down 1000 tons steel rails and by repairs for damages by freshets in May and June.

The coming six months look very favorable. The crops are large and the high prices will be an inducement for farmers to sell, whereas, last year they held most of the crop until the advance this year. The land sales are improving.

The telegraph report of the earnings for July is $194,000 against $198,851 (official) for the corresponding month last year. It is probable that the official report of this year will make up the earnings equal to last year.

☞ The last twenty miles of the Wisconsin Central railroad, which was completed between Butternut Creek and Chippewa station in June last, is now undergoing inspection by the Governor. If the construction proves satisfactory, which it doubtless will, as the whole road has been constructed in the best manner, the company will receive the full title to all of the lands of the grant assigned for the construction of the road.

☞ A bill in equity to compel the appointment of three receivers for the Portland and Ogdensburg Railroad was filed on the 4th inst, by the first mortgage bondholders and one of the joint consolidated mortgage trustees.

☞ The Boston and Lowell Railroad Company commenced running trains on the Stoneham Branch Railroad on the 6th inst.

### Railroad Consolidation.

EFFECT ON COUNTY BONDS—LIABILITY OF THE COUNTY TO THE SUBSCRIBERS TO THE BONDS NOT IMPAIRED.

The Supreme Court of the United States has rendered the following decision :

No. 190. The County of Scotland, plaintiff in error, vs. Joseph T. Thomas.—In error to the Circuit Court of the United States for the Eastern District of Missouri.—This action was brought by plaintiff (the defendant in error) to recover the amount of certain interest coupons attached to certain bonds issued by the order of the County Court of Scotland County, Mo., (the defendant below) on behalf of the county, to pay a subscription to the stock of the Missouri, Iowa and Nebraska Railway Company. The county contests the validity of the bonds on the ground that the question of subscribing to the stock was never submitted to a vote of the qualified voters of the county, as required by the Constitution of the State adopted in 1865, the subscription being voted and the bonds being issued in 1870. The plaintiff answers the objection by showing that the power to make the subscription was conferred in 1857, in the charter of the company called the Alexandria and Bloomfield Railroad Company, before the constitution was adopted ; and that this company by consolidation with other companies formed the Missouri, Iowa and Nebraska Railway Company, and brought to it all its own privileges and powers —and among others, that of receiving county subscriptions to its capital stock. The county replies to this argument, that however valid it may be to sustain subscriptions made to the Alexandria and Bloomfield Railroad Company itself, had that company remained distinct as originally chartered, it cannot avail to support a subscription to the stock of a new and different company, having a much greater amount of capital stock, and a much longer and different route of railroad running into another State. The question was raised in the court below by demurrer to the petition, and judgment was given for the plaintiff. The clause of the constitution on which the defendant relies is the 14th section of article 11, and is as follows : " The General Assembly shall not authorize any county, city, or town to become a stockholder in, or to loan its credit to any company, association, or corporation, unless two-thirds of the qualified voters of such county, city or town, at regular or special election to be held therein, shall assent thereto." This prohibition, it will be observed, is against the Legislature's authorizing municipal subscriptions or aid to private corporations ; it does not purport to take away any authority already granted. It only limits the power of the Legislature in granting such authority for the time to come. This has been settled by the Supreme Court of Missouri in several well-considered decisions. (See The State vs. Sullivan County, 51 Mo., 522 ; The State vs. Greene County, 54 Mo., 540.) In the former case the court say : " Power conferred on counties to take and subscribe stock without a submission to a vote of the people, before the Constitution went into operation, remained unaffected by that instrument." (51 Mo., 581.) The same view was taken by this court in the resent case of Callaway County vs. Foster, decided at the present term. (See also State vs. Maysville and Lexington R. R. Co., 13 B. Monroe, 1.) The specific question in the present case, therefore, is whether the authority given to counties and towns in 1857 to subscribe to the capital stock of the Alexandria and Bloomfield Railroad Company has become extinguished by the subsequent consolidation of that company with other companies, irrespective of the constitutional provision referred to. The constitution does not itself, as we have seen, interfere with authority given previous to its adoption. That simple consolidation with another company does not extinguish the power of the counties to subscribe, or the privilege of the company to receive subscriptions, was decided in the case of the State vs. Green County, 54 Mo., 540. After an extended view of the authorities on the above point, the judgment is affirmed, Mr. Justice Field taking no part in the decision, and Mr. Justice Miller dissenting. Mr. Justice Bradley delivered the opinion.

### Queen Anne's and Kent Railroad.

A controlling interest in the Queen Anne's and Kent Railroad was purchased on the 6th inst. by the Philadelphia, Wilmington and Baltimore Railroad Co. The stock purchased comprises 52 per cent of the whole, for which the Philadelphia, Wilmington and Baltimore Railroad Co. has given its notes for $60,000, to be paid in instalments of five and ten thousand dollars. The Queen Anne's and Kent railroad runs 26 miles, from Centreville, Queen Anne's county, to Massey's Station, on the Townsend branch of the Delaware railroad. The Philadelphia, Wilmington and Baltimore Railroad Co. were anxious to secure this feeder to their line, and prevent its purchase by other interests that would divert the trade to the seaboard.

☞ The terminus of the Canada Pacific railway at the head waters of the St. Lawrence Lake chain is on the Kaninistiquia river, a few miles from the shore of Lake Superior. The Toronto Globe says that the selection of station grounds at that place has saved the Dominion in one way or another some $400,000, which would have had to be expended partly in railway construction and partly in securing harbor facilities had preference been given to the Prince Arthur's Landing site.

☞ The Nevada Transcript says it is rumored that the Central Pacific Railroad Company are negotiating for the purchase of the Virginia and Truckee road.

### Robertson's Improved Oscillating-Piston Steam Engine.

This steam engine is new in name and form, and has several features that have attracted the attention of engineers and manufacturers. It differs from all cylinder oscillating, locomotive, stationary, and marine engines, but is applicable wherever steam power is needed. Pumps on the same principle by the inventor, and patentee, Mr. John Robertson, of the firm of Robertson & Co., proprietors of the Tubal Cain Iron Works, Brooklyn, N. Y., and who is well known as an experienced engineer and constructor of machinery, are now in operation ; one of these, a double acting pump, can be seen at the hat manufactory of Mr. James H. Prentice, on Nostrand av., Brooklyn, where it supplies the whole factory with water. It differs somewhat from the representations here given of the steam engine, inasmuch as it has round plungers 7 inches diameter, but the pistons of the engine are made oblong in shape, as shown in the engraving. This engine was patented by Mr. Robertson May 7th, 1872. Great interest was shown in the one exhibited and kept in constant operation at the Kings County Industrial Exhibition in Brooklyn, on account of its great novelty and merit. The essential features of this description of engine are that the piston reciprocates in the arc of a circle. Referring to the engraving Fig. 1, which is a sectional side view, *a a* is the cylinder; B B, the piston; *c*, a center-piece, to which B B is bolted, and which has journal-bearing in boxes provided upon the cylinder or frame, to which one end of the connecting rod F is pivoted by means of an ordinary crank pin. G is the crank, and *m* the flywheel. H is an ordinary eccentric to operate the slide valve, which is of the three-port type; *h* is a piece separating the two chambers *a a*, the exhaust port passing through it, and the steam ports being one on each side of it. E is a gland for packing the piston. Looking now at Fig. 2, it will be observed that in one casting we have the cylinder, the frame, and the flywheel bearings. The bearings upon which the piston vibrates are also cast solid upon the same casting. The pistons B are firmly bolted to the middle piece carrying the crank pin, the object being to facilitate the turning or pulling of the pistons. To secure beyond peradventure the pistons upon the middle piece, they are let or recessed into it.

The pistons, it will be observed, do not fit against the sides of the cylinder except over a small projecting piece at the top, which serves as an abutment for the packing, the space for which is shown between it and the end of the gland E. The space between the pistons and the cylinder bore is made to be as small as possible, and represents the clearance usually found in the long steam passages incidental to these ported valves. The pistons, B B, are solid castings, the strength of which insures them against spring. The packing which keeps them steamtight represents the steam packing of an ordinary piston cored out with a closed end. A feature of this plan is that any piston leak becomes apparent at once, and the nuts being on the outside the packing may be tightened and the leak stopped immediately without stopping the engine. Steam is admitted alternately through the ports on the right and left hand of the dividing piece N, giving to the piston a reciprocating semi-rotative movement, the steam acting on the ends of the pistons. The eccentric rod is hooked to the rocker arm I, the latter being provided with a handle whereby to operate the valve by hand when starting the engine. K is the valve stem, and L the steam chest. The whole arrangement of parts is compact and strong, there being no cams, links, or other light or slender pieces in the entire engine. At the same time every bolt and nut can be got at from the outside, and is under the eye of the engineer ; while the use of guide bars, guide blocks, and crosshead, is dispensed with.

The action of the engine is very simple. Steam is admitted, by means of the slide valve and ports, alternately to the under side of each piston and exhausts, in a manner similar to other engines using a slide valve. Hence the pistons oscillate or rock in the arc of a circle. the stroke being regulated as in other steam engines. The pistons, rocking on their main centre, are completely guided without touching anything, except in passing through the

packing. The packing has no guiding or controlling duty to perform, but merely to prevent the steam from escaping. The action of the steam upon the pistons is in a direct line with the weight and strain required to turn the crank; it is a lift on both sides, balancing the weight of the piston itself. By this mode of construction there is less friction; consequently, more power is developed with the same area of piston than on any other known engine.

An engine built on this principle will, with a slight modification, make a very simple, cheap, and efficient compound engine; the advantages being the shortness of the passages necessary to convey the steam from one piston to the other, the proximity to each other of the ends of the cylinders, and the close arrangement of the ports to control both motions of the pistons—one piston being larger than the other, and using the steam from the one expansively to the other. Although applicable for any purpose where steam power is needed, it seems to us that this form of engine is admirably adapted for driving steam boat propellers, and blowing engines for smelting furnaces.

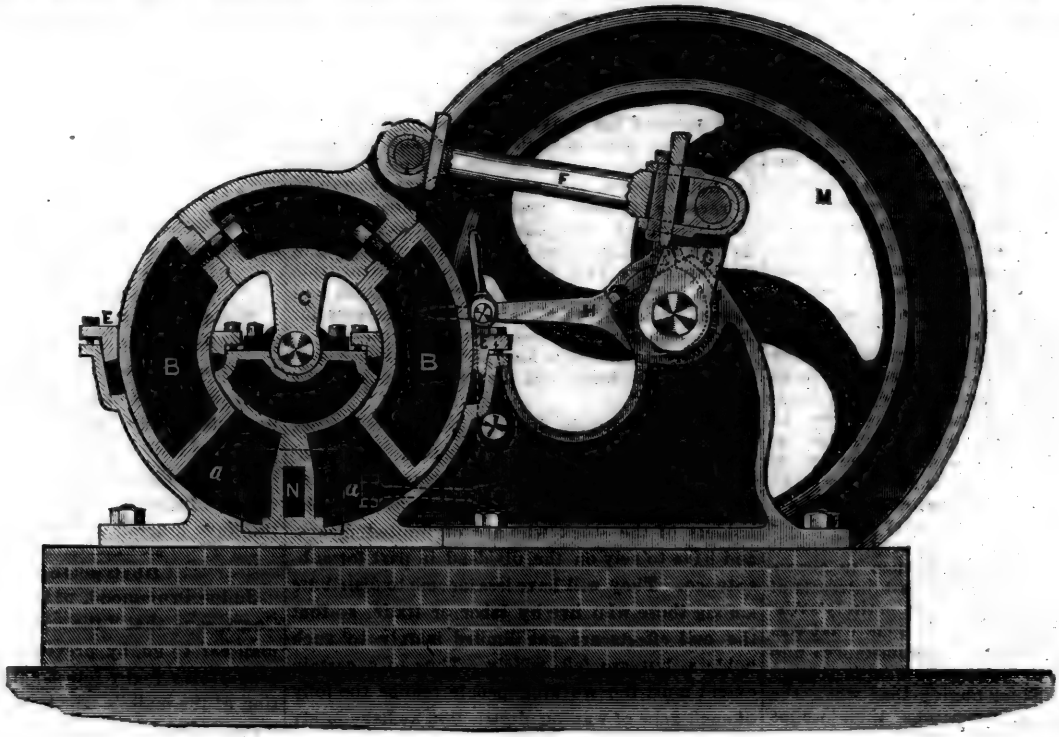

Fig. 1.—Sectional Side View.

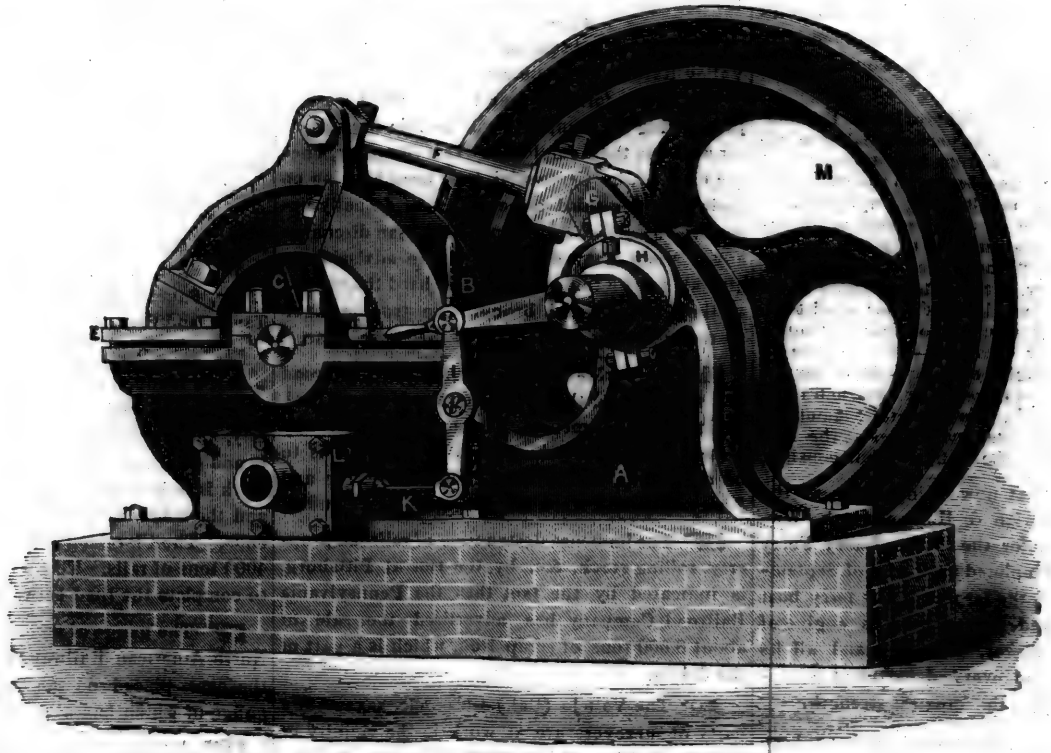

Fig. 2.—Elevation in Perspective.

### Why Wages were Reduced.

The President of the Pennsylvania Railroad Company, in his circular addressed to "all the loyal employes," etc., under date August 4, 1877, says:

The recent reduction of compensation was a necessity, growing out of the depressed condition of all business interests, and was adopted not before, but after, every means had been taken in other directions to avoid it. For the last four years the management of this company has been strenuous and earnest in seeking to secure the best revenues possible under the existing condition of business and to diminish its expenditures in every legitimate manner, so as to leave to you satisfactory compensation for your labor and to the owners of the property a fair interest upon their investment. The reduction of dividends to shareholders has been more than twice as great as the reduction of your compensation.

The causes that led to the reduction made on the 1st of June were fully explained to a large committee, known as the General Grievance Committee of Engineers and Firemen employed on the Pennsylvania Railroad and leased lines east of Pittsburg, who conferred with me on the 4th of June last. After a full interchange of views the committee advised me in their letter of that date, that "as the business of the country was so depressed in all its various branches, they believed it the duty of the engineers and firemen to cheerfully co-operate in advancing the best interests of the company." They were, therefore, entirely satisfied that the company had simply done what was right and proper under the circumstances and were ready to stand by its management in the action that had been taken, hoping that when the country became more prosperous their wages would be restored to the old standard.

### Rights of Labor.

In his decision in the cases of the men who interfered with the railroads in the hands of receivers appointed by the United States Courts, Judge Drummond said:

We all acknowledge the rights of labor. It is simply the right of the man who performs labor to obtain the best price he can from his employer, and not the right of dictating terms to the employer. The rights of labor result from an agreement made among men, not by a statement, or an order, or a dictation from one man to another. The rights of labor, as thus understood, we all admit, and it is not improper, perhaps, to call those rights sacred. But when the right of labor consists in the claim of not only refusing to labor, but interfering with the labor of others—in other words, trampling upon the rights of labor—we, of course, can have no feeling of respect for any such right as that. It is criminal; it is unlawful; it puts an end to all relations of life, and strikes at the root of everything in which the right of labor consists.

☞ The new boat now being built at the works of Messrs. Harlan & Hollingsworth, Wilmington, Delaware, for the West Jersey Ferry Company, will be completed on the 1st of September. The steamer is the largest of any ferry boat on the Delaware, and will contain an engine of six hundred horse power. The hull and all its braces are of iron, and every department is constructed with a view to the greatest strength.

☞ Certificates of incorporation have been filed with the Secretary of State of Ohio of the Alliance and Wheeling Railway company, running from Alliance in Stark county to Bridgeport, Belmont county, capital stock $450,000, by John Hunter and others; and of the Cincinnati and Northern Narrow Gauge Railroad company, to run from Cincinnati to the State line north of Bryan, Williams county, capital stock $500,000, in shares of $50 each, by James C. Anderson and others.

### No Dividend.

At a meeting of the directors of the Pennsylvania Railroad Company, recently held in Philadelphia, the following action was had with reference to the question of dividend for the quarter just passed:

In view of the heavy losses recently sustained by the Pennsylvania Railroad Company in the destruction of its property in the city of Pittsburg by mob violence, and of further losses sustained in revenue through prolonged interruption of traffic from the same cause at various points on its own and connecting lines, and in view also of the imperative duty of the company to provide for the immediate restoration of rolling stock and of such buildings as are absolutely necessary for the transaction of its business; therefore,

Resolved, That it is inexpedient at this time to declare a dividend upon the capital stock of this company.

The last quarterly dividend paid was 1½ per cent, which amounted to $1,030,000. The non-distribution of this sum will be severely felt at this time by many of the large number of the holders of the stock who are of limited means, and have to rely on the dividend in part for subsistence. They will have less income to distribute among those who live by labor or trade, so that the evil effects are not limited merely to such holders, but are felt widely. Thus to a certain extent must the working people realize the folly of such acts of wanton destruction as have lately been committed by reckless men pretending to act in behalf of their interests.

### Fewer Hands.

We see it stated that the business of the Lehigh Valley Railroad is to be conducted hereafter by a much smaller force of men than in the past, and by so doing the company will be able to pay better wages to their employes. This company, since the close of the Centennial, have been keeping on their rolls one-third more than was actually necessary to do the work; but rather than discharge any of them, they deemed it more advisable to give all a little to do during the hard times; but as they struck, and brought the trouble upon themselves, they must abide by the consequences.

☞ The strike on the Lehigh Valley Railroad has necessitated the closing of the Morris Canal. Friday last the men at Easton, Penn., were directed to move out the loaded boats, water is to be drawn out of the canal between Easton and Jersey City, and work is to be entirely suspended.

☞ The immense destruction of railroad property, rolling stock, &c., by the riot at Pittsburg, is indicated by the fact that the Pennsylvania Railroad Company has advertised the sale of about 8,000 tons of scrap iron, which is a part of the debris.

☞ The Vallejo (Cal.) Chronicle says that a party of surveyors are at work in the vicinity of Benicia, making the necessary surveys for the Northern railway line from Benecia to the junction with the California Pacific, up near Bridgeport or Suisun.

☞ The Rhode Island and Massachusetts Railroad was examined on the 1st inst. by Railroad Commissioners and a favorable report given accepting the road.

### Punishing the Strikers.

In the United States Circuit Court at Indianapolis, on the 3d inst., Judge Drummond sentenced the strikers arrested at Indianapolis, Vincennes and Terre Haute, for interfering with the operation of the roads in possession of the court. One seemed to have been the leader. It was ordered that he, for the present, be imprisoned for the space of four months in the county jail; and that the other defendants be imprisoned, for the present, for the space of two months in that jail; that they each pay a fine of $50, and the imprisonment continue until the fine and costs of this prosecution are paid.

### Transportation of Troops.

The question as to whether the Government is responsible to the railroad companies for the transportation of troops over the railroads has already been settled by the prompt payment of the bill presented to the Navy Department for the transportation of the battalion of marines from Washington to Philadelphia. The Government was charged full passenger rates, and the Secretary of the Navy ordered the bill paid.

### Obstructing the Mail.

Judge Drummond, of the United States Circuit Court, says that "the strikers who permitted the mail car to go, by preventing the transit of passenger cars really interfered with the transportation of the mail." The transportation of the mail "can only be done when other cars accompany the mail cars; to carry the mail alone entails loss, and is therefore impracticable."

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the Cleveland and Ohio River Railway Company, being a narrow gauge running from Cleveland to Gallipolis, capital stock $500,000, in shares of $50. The proposed line will pass through the counties of Cuyahoga, Medina, Summit, Wayne, Stark, Holmes, Tuscarawas, Coshocton, Licking, Muskingum, Perry, Athens, Hocking, Vinton, Meigs and Gallia. The incorporators are Jerome C. Elder, Samuel Hadden, John H. Kelly, James Taylor and Orrin Thacker.

☞ The Portsmouth (Ohio) Republican says that the roadbed of the Scioto Valley Railroad is nearly completed between Portsmouth and Waverly, and a large force is at work between Waverly and Chillicothe. All the grading and masonry work is to be completed during the present month, and the track laying is to be pushed from both ends. The Cleveland Iron Company are shipping 4000 tons of rails. This is the necessary amount to complete the road between the two points.

☞ The gauge of 26 cars of the European and North American Railway has been narrowed, and the cars placed on the Stillwater Branch, the gauge of which has also been changed.

☞ A corporation has been formed in Eastern Oregon, for the purpose of constructing and operating a narrow gauge railroad from the landing on the Columbia river to LaGrand.

☞ The Cincinnati Southern Railway is opened for business from Cincinnati to Somerset, Ky., and trains are running regularly.

☞ Finland has 398 miles of railway.

# RAILROAD EARNINGS—MONTHLY.

# RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

# American Railroad Journal.

**Saturday, August 11, 1877.**

### Financial and Commercial Affairs.

With the approach of the season of activity, in connection with the Fall trade, more firmness has been developing in the Money line, with more inquiry noted for accommodation, especially from the mercantile interest and for legitimate business purposes. The offerings of Money, however, are yet very liberal, exceeding the current requirements of borrowers. Call loans have been quoted here at 1½@4, with most of the important negotiations reported on the basis of 2@3 per cent; and very choice to prime mercantile credits are rated at 4@7, mainly 5@6 per cent per annum. The City banks, last week, reported a slight gain in their specie reserve and circulation, with a decrease in their legal tender hoard, an increase in that of loans and discounts, and a falling off in the deposit average. The loan and discount average shows an expansion of $598,200, and the item of circulation of $67,400. The average of deposits was diminished $1,898,800. The legal tender reserve was reduced $3,068,100; and the specie average augmented $151,700.

The City banks reported their average of gold last week at $14,135,800, as against $20,126,000 same date last year; and their greenback average at $54,262,100, as against $60,333,300 on Aug. 5, 1876. Their deposits stood at $219,166,600, against $226,479,800 same time in 1876. The loan item was $249,767,800 against $252,756,300 a year ago.

The City bank net reserve of specie and legal tender notes now shows an excess over the legal

requirement of reserve to liabilities of $13,606,250, as against $16,043,075 the preceding week, $9,039,775 the week ending 14th April (the lowest footing of this item thus far in the current year,) and $24,781,800 on January 27 (which latter was the highest aggregate reached this year.) The City bank exchanges in currency reached $390,467,627, or a daily average of $65,077,988.

The U. S. Sub-Treasury in this city closed the week ending on Wednesday with a currency balance of $50,880,593, against $51,471,181 the preceding week; and a coin board of $81,385,088, against $83,305,544 on the return of a week earlier. The Customs revenue of the port during the past week was $2,162,000.

The aggregate of the outstanding U. S. currency of all denominations, August 1st, was $379,334,725. The outstanding amount of legal tender notes is $359,094,220. The National bank circulation is now $315,188,888 of currency notes and $1,424,370 of national gold bank notes.

National Bank notes received at the Treasury Department in July for redemption were to the amount of $4,946,000.

The income of the Government from internal revenues last week was about 2½ millions, and during the fiscal year ending June 30, 1877, $118,438,279, against $116,700,782 in the preceding fiscal year; and from Customs last week about three millions, and in the last fiscal year $130,439,419, against $148,071,985 in the preceding fiscal year.

On Wednesday of this week the cash balances of the Treasury Department at Washington were: of Currency, $11,520,222; special deposit of legal tenders for the redemption of certificates of deposit, $56,690,000; Coin, $99 416,645, including of Coin certificates, $37,845,000.

Gold has been quiet through the week, with few and slight changes noted in the price. The Customs call has been rather more liberal. The export drain has been unimportant. The extremes of the price during the week have been 105¼@105⅝, closing at 105⅜, as against 105⅜ on Wednesday of the preceding week. The lowest point yet touched by gold was 101¼, on Friday, March 2d. The specie outflow last week was only $208,000, making the total exports of specie hence since January 1, $21,349,819, against $38,201,822 the same time in the preceding year. The imports of specie at this port last week were $14,689, and since January 1st have been $7,675,647, as against $2,669,975 same time last year. The Customs demand for gold last week averaged $360,833 per day. Foreign Exchange has been in comparatively limited demand but without marked alteration in price, closing about steady. Bankers' sixty day bills on London closed on Wednesday at $4 84¾@$4 85½; sight bills on London at $4 86½@$4 87½ to the £ sterling. The week's imports of Dry Goods and general merchandise were to the specie value of $6,928,867 as against $4,489,713 the corresponding week of 1876. The week's import entries of Foreign Merchandise at New York included $2,154,553 of Dry Goods and $4,774,814 of General Merchandise. The week's export of Domestic Produce and Miscellaneous Goods from this port were $5,217,651, against $5,918,086 same week in 1876.

Government securities have been in more general request, on investment account and rather steadier in price. At the close the market was quoted firm, leaving off on Wednesday as follows:

United States currency sixes, 124⅞@125⅛; do. 6s, 1881, registered, 111¼@111⅜; do. coupon 112⅛@112⅜; do. 1865, new, registered, 106⅞@107; do. coupon, 106⅞@107; do. 1867, registered, 108¾@109; do. coupon, 108⅞@109⅛; do. 1868, registered, 111¼@111¾; do. coupon, 111¼@111¾; do. ten-forties registered, 109⅛@109¾; do. coupon, 112⅞@113⅛; do. five per cents 1881, registered, 109¾@110; do. coupon, 109¾@110; do. 4½ per cents, 1891, registered, 108⅝@108⅞; do. coupon, 108⅝@108⅞; do. 4 per cents, 1907, reg., 105¼@105½; Central Pacific Gold Bonds, 106½@107.

The amount of U. S. bonds held by the Treasurer of the United States, as security for the National Bank circulation, is $337,566,600, and $18,905,500 as security for public deposits.

State and Railway bonds have been moderately sought after, and toward the close somewhat steadier in the instances of the more substantial loans. And in the line of Railway and Miscellaneous share property business has been quite active but at very irregular prices, leaving off heavily under speculative manipulation.

Business has been somewhat brisker in general trade lines with domestic produce however again quoted lower especially Breadstuffs and Provisions, which left off weak. Foreign merchandise has been in slack demand. Sugars and Molasses have further declined.

Hardware and Boots and Shoes have been more sought after, while Dry Goods have been attracting increased attention with prices quoted about steady.

A very tame movement has been noted in Metals, which quoted weak and unsettled. Eglinton Pig Iron quoted at $25 50; Glengarnock $27 50; Coltness $28 50@$29; No. 1 American Pig at $18@$19; No. 2 do. at $17@$18; Forge $16@$17; American Rails at works $32@$35; Old Rails $18@$19. Wrought Scrap $22@$25. Steel Rails, on the basis of $45@$48 at the mills. Ingot Copper quoted 18¾@19 for early delivery.

Ocean freights have shown more animation, especially in the Grain and Petroleum interests, and have been quoted much stronger. Liverpool steamer rates at the close for Grain, 9d, (as against 6¼@6½d. on Wednesday of last week) per bushel. Provisions,45s.@50s.; Tallow, 25s.@30s.; Leather, 50s. Measurement Goods at 17s. 6d.@20s. per ton; Cotton, ⅛d. per lb., Liverpool, by sail. Cotton, 3-16; Grain, nominal. Oil Cake and Slate, 12s. 6d.@15s.; Measurement Goods 12s.@15s.; Tobacco 25s.@27s. 6d; Grain rates on charter hence for Cork and orders left off at 5s.@9d.; for the Continent, at 6s.@6s. 6d. and from Baltimore for Cork and orders, 5s. 6d.@5s. 9d. as to time of loading and from Philadelphia at 5s.@6d. per quarter. Refined Petroleum hence for Cork and orders, 4s. @4s. 6d. for the Continent, 4s.@4s. 6d. per bbl.

## Bankers,

No. 5 Nassau St., New York.

U. S. Government Bonds bought and sold in amounts to suit investors: also, Gold, Silver and foreign coins: Deposits received in Currency or Gold, and interest allowed on Balances: Special attention paid to Investment Orders for Miscellaneous Stocks and Bonds.

Illinois Central Railroad Company,
New York, July 18, 1877.

A DIVIDEND OF TWO (2) PER CENT HAS been declared by this company, payable on the 1st day of September next, to the holders of the capital stock of this company as registered at the close of the 14th day of August next, after which, and until the 5th day of September, the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

### Chicago and Iowa Railway.

A bill has been filed in the United States Circuit Court at Chicago by John N. Denison and John W. Brooks, of Boston, Mass., to foreclose the second mortgage on the Chicago and Iowa Railway. The company was incorporated in November, 1869, the road to run from Aurora, Kane County, Ill., through Rochelle to Foreston, and to the intersection of the track of the Illinois Central Company in Ogle County. There are now outstanding 1,160 bonds of the new or second issue, aggregating $1,150,000, and default has been made in the payment of the interest due July 1, 1877. The bondholders, representing more than one-tenth of the bonds, have asked to have a trust deed foreclosed. William H. Holcomb, the company's Treasurer, was to-day appointed Receiver by Judge Blodgett, under a bond of $50,000.

☞ Nine miles of the Hillsboro' and Peterboro' Railroad between Hillsboro' Bridge and Bennington are nearly graded and ready for the rails, and work is to be begun immediately on the section between Bennington and Peterboro', nine miles in length. It is thought rails will be laid over the whole route by the close of the year.

☞ The directors of the Massachusetts Central Railroad Company, elected on the 31st ult. are: Spencer W. Richardson, Nathan Carruth, Nathan Cushing, Jacob Edwards, Edward D. Adams, Boston; John V. Barron, Concord, N. H.; Geo. Keyes, Concord, Mass.; Wm. H. Hill, Jr., Brookline, Mass.

☞ Mr. Lynskey, late of the Great Western and Grand Trunk Railways, has been appointed Superintendent of the Western Counties (Nova Scotia) Railway.

☞ The Cleveland and Columbus railroad has been finished through Brown county, Ohio, and is being pushed forward into Adams county.

### Steel Rails of Double Length.

At the steel works of the Lackawanna Iron and Coal Company in Scranton, Pa., a great improvement has been made recently in the manufacture of steel rails. Heretofore the rails have been turned out at the standard length, thirty feet, but they are now made in double bars, sixty feet long. The great advantage of making the double length instead of the single length bar lies in the saving effected in cutting off the cross ends of the rails, which in itself is a saving of about fifty per cent. Although the bar is rolled sixty feet in length, it is too cumbersome to be easily handled in the laying of tracks, and is therefore cut in two as soon as rolled. The great advantage lies in the fact that there are only two ends to be trimmed in a length of sixty feet instead of four as formerly.

☞ In the case of Pennsylvania Railroad Co. vs. Duffer, the Supreme Court of Pennsylvania held that certain statutes giving a lien to contractors, laborers and workmen, upon railroads and other property of public companies, for debts accruing to them in consequence of the construction and repairs of such property, does not include civil engineers, although they be required to render service to the company from the commencement to the completion of the work.

☞ A certificate of incorporation has been filed with the Secretary of State of Ohio of the South Covington and Cincinnati Street Railway company, capital stock $10,000, in shares of $50 each, said road to run from Fifth street, Cincinnati, to Covington, Kentucky, by A. D. Bullock and others.

☞ The Gilberton Coal Company has voted to reduce its capital from $500,000 to $100,000, each five old shares to be changed into new share at a par of $100. Stockholders whose number of shares is not divisible by five will receive $20 for each fraction or can buy fractions at the same price of the treasurer.

☞ During the month ending July 31, 1877, there arrived at the Port of New York 9,559 passengers, of whom 6,713 were immigrants, 2,242 citizens of the United States, and 604 sojourners. Of the total number of immigrants, 3,925 were males, and 2,788 females.

☞ The directors of the South Eastern (Ga.) Railway Co., elected on the 18th ult., are: James O'Halloran Q. C.; H. S. Foster; N. Pettis; S. W. Foster; G. C. Dyer; L. W. Miner; E. O. Brigham; E. L. Chandler; A. B. Foster jr; and, Chas. H. Boright.

☞ Bricks perforated with three holes, that the mortar may get a good "hold," are being used in the construction of some buildings in Minneapolis, Minn.

☞ There were 14,884¼ miles of railroad in use in the United Kingdom of Great Britain on the 1st of July, 1877.

☞ The Memphis and Charleston Railroad Company has just paid its entire indebtedness to the State of Tennessee, amounting to $1,671,916.

☞ A. W. Scott, of New Lexington, Ohio, has been appointed Receiver of the Ohio Central Railroad.

### The Question of Liability for Losses.

A conference was recently held between Mr. John Scott and General Solicitor Howard, representing the Pennsylvania Railroad, and the Allegheny County Commissioners. The gentlemen representing the company wanted the commissioners to take up all claims presented by private parties against the county for damages by the late fires and riot and try a compromise. The commissioners refused to accept the proposition or consider it in any way, as its adoption would simply place the county in the position now occupied by the railroad company in regard to the question of liability, and relieve that company of the trouble, expense and burden of taking proper legal steps toward laying responsibility where it equally belongs—on the State. As it is now, the railroad must take the initiative and sue the county for damages, and must prove all losses sustained by them.

### Statement of the Public Debt of the United States, August 1, 1877.

DEBT BEARING COIN INTEREST.

| | Amount Outstanding. | Accrued Interest. |
|---|---|---|
| 5 per cent. bonds, 1858 | $260,000 00 | $1,083 33 |
| 6 per cent. 1881 bonds, 1861 | 18,415,000 00 | 92,075 00 |
| 6 per cent. 1881 bonds, (Oregon,) 1861 | 945,000 00 | 4,725 00 |
| 6 per cent. 1881 bonds, 1861 | 189,321,350 00 | 946,606 75 |
| 6 per cent. 1881 bonds, 1863 | 75,000,000 00 | 375,000 00 |
